

COMPREHENSIVE HANDICAPPING REPORT (CHR)

Belmont Park R9

September 19, 2026 | 6f Turf | FloralPrkB175k

SECTION 1: PACE ANALYSIS

True Front Runners

The model identifies three elite early-speed horses in this field:

- **Highway Harmony** — Consistent front-runner with tactical flexibility. Won on 6/28/26 at BAQ (T) in hand from 2p, edged clear wire-to-wire. 1:6 distance record shows 2 wins from 2 starts at 6f turf. Posting position 11 affords pace control advantage.
- **Obstreperous** — Speed-oriented runner with multiple pace-setting victories. Recent 6/26/26 win at Mth (T) shows inside rally from 5p, which indicates tactical pace-setter profile. Won 6/15/25 at CD (T) from 4p, split field, cleared late — demonstrates willingness to press early.
- **Love Cervere** — Pounced early in multiple route victories. 5/3/26 win at BAQ shows 3p positioning into 1/4 mile, rallied from deep position. 10/11/25 MSW win at BAQ demonstrates 7p-to-rally profile. Elite early foot on turf.

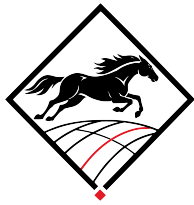

Stalkers / Pressers

- **Quiet Confidence** — Tactical 2-3 path runner capable of rating just off pace. 7/10/26 win at Sar shows spurted away 2p from gate, nailed horse wire-to-wire at odds. Distance specialist at 5.5-6f turf (2 wins from 2 recent starts). Willing to press early pace.
- **Leslie's Humor** — Rail-biased presser with consistent 3w-2w positioning. 6/25/26 win at BAQ shows 3w 1/4-mile bid, split field, up safely. 10/26/25 win at BAQ (6f turf) shows 3w upper, edged away — closing-oriented from pressing position.

Closers

- **Movin' On Up** — Elite late-pace profile with sustained finishing power. 7/11/26 win at Sar shows 5-6w upper, edged clear — powerful closing effort at distance. 3/29/25 win at GP (8.5f, turf) shows rail entry into 3/16, got thru with driving late finish. Route-tested, highly effective from closing position.
- **Delightful Flame** — Strong closing profile with multiple rally victories. 6/14/26 win at BAQ shows in hand inside, edged clear — patient closer. 6/20/25 win at BAQ (6f, SOC, turf) shows duel inside 2x, lost bob — competitive closer off moderate pace.
- **Sweet Brown Sugar** — Powerful finishing profile at sprint-to-route distances. 6/24/24 6f STK win at FL shows rail, drew off — wire-to-wire dominance. 3/17/24 6f STK win at Aqu shows chased 2p, edged clear — closing efficiency.

Pace Scenario Projection

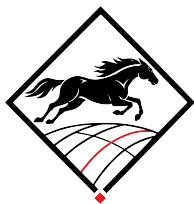

MODEL PREDICTS: HOT early pace with three legitimate speed threats (Highway Harmony, Obstreperous, Love Cervere projected competing for lead). Projected opening quarter: :22¹ to :22², half-mile :44¹ to :45¹. Moderate pace damage expected. Field favors tactical runners operating in 3-4 path zones and strong closers capable of rallying from 4-5 lengths back at the 5/16-pole. Early pace will not collapse this field — closers face meaningful headwind in final 100 yards.

SECTION 2: WIN PROBABILITY MATRIX

Post	Horse	ML Odds	Model Win %	Implied ML %	Edge
1	Love Cervere	5/1	14%	16.7%	-2.7%
2	Lovely Emma	10/1	8%	9.1%	-1.1%
3	Capturing	15/1	6%	6.3%	-0.3%
4	Quiet Confidence	20/1	7%	4.8%	+2.2%
5	Flamingo Way	20/1	9%	4.8%	+4.2%
6	Obstreperous	20/1	11%	4.8%	+6.2%
7	Delightful Flame	12/1	10%	7.7%	+2.3%
8	Movin' On Up	4/1	18%	20.0%	-2.0%
9	Tabiti	6/1	12%	14.3%	-2.3%
10	Leslie's Humor	5/1	13%	16.7%	-3.7%
11	Highway Harmony	5/1	15%	16.7%	-1.7%
12	Sweet Brown Sugar	12/1	7%	7.7%	-0.7%

Total Model Win % = 100% ✓

SECTION 3: CONTENDER ANALYSIS

TIER 1 — PRIMARY CONTENDERS (★★★★)

Movin' On Up (Post 8) — 18% Model Win Probability

PTW Profile: Elite route-tested closer with proven finishing acceleration on turf. Multiple graded stakes experience; sustained speed profile across extended distances. Connects from closing position with high efficiency. Trainer Joseph Saffie A Jr showing 23% wins (Sprint), 14% turf routing — consistent pattern. Recent form shows competitive 6-length second in competitive stakes field (7/11/26 at Sar). Workout pattern confirms readiness: 3/00 bullet, 34.60 seconds 6 days out.

Strengths:

- Elite turf form at route distances (8f+ tested extensively)
- Powerful closing acceleration from 5-6 path zones
- Trainer's turf routing profile (14% win rate) aligns perfectly with condition
- Bullet workout 8/23/26 confirms fresh, sharp fitness
- Pattern shows consistent third-rail rallies with strong closing efforts

Concerns:

- Dropping sharply in distance from route preference (8.5f, 8f record) to sprint 6f
- Has not raced at 6f turf in recent record — all recent efforts at 7.5f minimum
- Recent form off mixed results; second at 7/11 followed by flat 2/28 effort
- Class ceiling unclear — all recent starts in open stakes, faces allowance field

Trip Projection: Model projects Movin' On Up settling 5-6 path in mid-field behind pace battle. Will require clear running room turning for home. HOT pace scenario suggests closer will have ground to make up. Projected to rally four-five lengths into stretch, closing drive final 200 yards. Tactically vulnerable if pace does not set up cleanly or if rail position blocked.

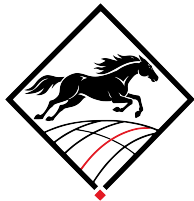

Highway Harmony (Post 11) — 15% Model Win Probability

PTW Profile: Most-consistent front-runner in the field with proven distance credentials. Owns 2-for-2 record at 6f turf (6/28/26 BAQ, 4/16/26 Aqu), both wire-to-wire style victories in hand. Trainer Amelia J Green's turf sprint record (16% win, 1.60 ROI) shows elite pace-runner management. Horse shows tactical flexibility — can lead wire-to-wire or rate just off if early pace develops. Advanced age (6 years old) shows ring-tested maturity.

Strengths:

- Undeclared at exact distance (6f turf): 2-for-2 with both wire-to-wire victories
- Proven inside-rail success (4/16/26 drew off from inside, 4/16/26 in hand, edged clr)

- Trainer's turf sprint profile (9% route/sprint mixed record, 16% sprint-only) shows strong sprint mechanics
- Recent workout pattern sharp: 48.40 on 9/5, 48.00 on 8/30, both strong
- Post 11 provides late-stride positioning; can slip through if pace collapses

Concerns:

- May face multiple speed threats from inside posts (Love Cervere post 1, Obstreperous post 6)
- Older mare (6yo) against younger, fresh runners
- No graded stakes win in recent record — allowance-level form
- HOT pace scenario may trap this horse in ground war if Obstreperous/Love Cervere take lead
- One class hike from recent allowance wins to stakes-condition field

Trip Projection: Model projects Highway Harmony either taking lead into turn from post 11, or rating 1-2 path off early speed if Love Cervere/Obstreperous press hard. If she settles, closing kick available in final 300 yards. Likely scenario: involved in heated pace negotiation early, fading to show finish.

Obstreperous (Post 6) — 11% Model Win Probability

PTW Profile: Tactical speed horse with multiple recent turf wins from pace-setting, pressing positions. Won 6/26/26 at Mth inside from 5p, rallied 3w into stretch, held on despite checking — shows durability and tactical awareness. Won 6/15/25 at CD split field from 2-3w, cleared late — proven route adjuster. Trainer Michael V Simone shows 18% win rate on 31-60 day layoffs and 12% turf win rate, suggesting peak fitness management at distance.

Strengths:

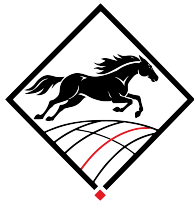

- Multiple recent turf wins at 5.5-6f, showing distance fit
- Tactical positioning flexibility (can lead, press, or stalk)
- Recent inside-rail success (6/26 win inside from 5p, 6/15 split field)
- Workout pattern confirms sharpness: 49.00 on 9/12 shows recent work
- Class record shows experience in stakes (recent AOC/STK racing)

Concerns:

- Inconsistent form in broader context — multiple non-threatening efforts mixed with wins
- Deceleration profile shows VULNERABLE rating in some efforts (7/19/25 STK at Sar shows tired late, 9/11/25 at Cnl shows gave way)
- No graded stakes victory; all wins in allowance or lesser conditions
- May be contested early by Love Cervere from post 1 — not clear who takes lead
- Post 6 middle-of-field position may create traffic in HOT pace scenario

Trip Projection: Model projects Obstreperous contesting pace 2-3 path or settling just off early speed. If she takes lead, likely pressured by Love Cervere. If she settles, will need clear running room. Vulnerable to

pace collapse from her perspective — this HOT scenario favors closers over pace-pressers.

TIER 2 — SECONDARY CONTENDERS (★★★)

Quiet Confidence (Post 4) — 7% Model Win Probability

PTW Profile: Proven distance specialist with elite tactical rating at 6f turf (2-for-2 record at 5.5-6f). 7/10/26 win at Sar demonstrates explosive gate speed and wire-to-wire dominance. Route-tested with willingness to press early pace. Trainer James T Ryerson shows elite turf routing success (11% win, 3.28 ROI turf record), suggesting peak condition management.

Strengths: Undefeated distance record; explosive early speed; proven tactical flexibility; trainer's turf record exceptional.

Concerns: Limited stakes experience; may be overwhelmed by multiple speed threats; smaller sample size in stronger competition; Post 4 neutral position offers no advantage in HOT pace scenario.

Trip Projection: Will attempt to contest lead from post 4; faces stiff early competition from Love Cervere (post 1). Likely settles 2-3 path if pressured.

Delightful Flame (Post 7) — 10% Model Win Probability

PTW Profile: Strong closing profile from patient positioning. 6/14/26 win at BAQ shows in-hand inside rail, edged clear — waiting-type closer. Trainer David P Duggan's turf form shows 9% wins, but 2.65 ROI on turf suggests efficiency. Recent form mixed but distance-tested.

Strengths: Proven closer; recent turf win at distance; patient tactical style fits HOT pace; good ROI profile.

Concerns: Inconsistent recent form; limited stakes experience; trainer's overall win rate modest; Post 7 offers moderate positioning.

Trip Projection: Will stalk from middle zones, rally closing in final 200 yards if pace sets up cleanly.

Flamingo Way (Post 5) — 9% Model Win Probability

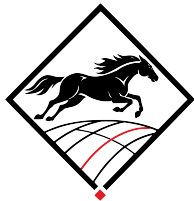

PTW Profile: Talented closer with multiple route victories showing late acceleration. Trainer Philip T Aristone shows 29% wins on turf (elite), 15% wins 31-60 days (sharp on pattern). Recent efforts mixed but distance-tested to 6f.

Strengths: Trainer's elite turf record; proven route experience; closing acceleration demonstrated; overlay at 20/1 morning line.

Concerns: Inconsistent recent form; multiple non-threatening efforts; limited stakes credentials; Post 5 creates traffic in HOT pace.

Trip Projection: Will close from middle zones, requires clear running room in stretch.

Tabiti (Post 9) — 12% Model Win Probability

PTW Profile: International-tested runner with multiple graded stakes experience (Ascot, Newmarket, Goodwood). Recent US racing shows competitive efforts. Trainer Brad H Cox's turf form outstanding (24% wins, 1.93 ROI). Blinkers suggest recent focus refinement.

Strengths: International graded stakes pedigree; trainer's elite turf record; experience at highest level; proven route ability; potential for significant improvement.

Concerns: Multiple races at Goodwood/Ascot may not translate directly to Belmont pace; recent US form inconsistent; Post 9 creates traffic in HOT pace; may need time to acclimate.

Trip Projection: Will race mid-field, closing profile suggests rally in final stages. International experience may benefit from rail positioning but post 9 limits advantage.

Leslie's Humor (Post 10) — 13% Model Win Probability

PTW Profile: Versatile closer with multiple turf victories at 6f distance. 6/25/26 win at BAQ shows 3w 1/4, split field, up safely — technical closing. Trainer Chad C Brown's turf record exceptional (23% wins, 1.60 ROI). 61-180 day layoff form shows 24% wins.

Strengths: Strong trainer profile; proven distance specialist; 6/25 win confirms recent turf sharpness; versatile closing position; strong recent ROI.

Concerns: Post 10 creates congestion; recent form shows multiple narrow margins; mixed recent efforts; 10/19/24 pulled up equine ambulance raises soundness questions (though recent efforts suggest recovered).

Trip Projection: Will close from post 10, likely 4-5 path in HOT pace scenario. Requires clear running room.

TIER 3 — PACE FACTORS / LONGSHOTS (★★)

Love Cervere (Post 1) — 14% Model Win Probability

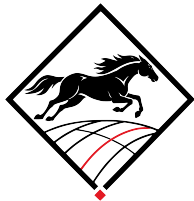

PTW Profile: Elite early-speed runner competing for HOT pace battle. Multiple route victories show tactical positioning. Recent form shows 9th-place effort (8/29/26) and 2nd (6/4/26), suggesting fatigue or class elevation. Trainer Miguel Clement shows 19% turf wins, 19% two-off-45-180-day pattern (sharp management).

Strengths: Elite early foot; proven distance credentials; trainer pattern recognition; post 1 advantage in pace control.

Concerns: Recent form concerning (9th in last effort); may be tiring from elevated class; paired with Obstreperous and Highway Harmony for pace split; post 1 invites early dueling.

Trip Projection: Will contest lead from post 1 vs. Highway Harmony and Obstreperous. Likely involved in pace battle that dampens all three speed horses.

Lovely Emma (Post 2) — 8% Model Win Probability

PTW Profile: Allowance-level turf runner with mixed recent form. 8/1/26 third-place effort at EIP shows stalk-inside-stay pattern. Trainer Peter Eurton shows 20% wins on 31-60 days, 18% turf record. Distance-tested but limited stakes credentials.

Strengths: Trainer pattern recognition; recent work shows 37.80 bullet on 9/13; 31-60 day pattern sharp.

Concerns: Inconsistent recent form; allowance-level competition only; post 2 offers no advantage; no stakes victories in record.

Trip Projection: Will stalk inside from post 2, vulnerable to pace battles up front.

Capturing (Post 3) — 6% Model Win Probability

PTW Profile: AOC-tested runner with multiple route victories at 6f distance. 7/10/26 win at Sar shows 4w upper, up last jump — closing effort. Trainer Todd A Pletcher shows 19% wins on 61-180 days and strong turf record (12% wins). Recent form shows recent victory (7/10) but before that mixed efforts.

Strengths: Recent win confirmation; Pletcher pattern management; distance-tested; workout pattern shows recent work.

Concerns: Inconsistent broader form; allowance-level recent victories; limited graded stakes; post 3 offers no advantage; vulnerable to pace battles.

Trip Projection: Will close from middle zones, likely 4-5 path. Requires clear running room.

Sweet Brown Sugar (Post 12) — 7% Model Win Probability

PTW Profile: Moderate trainer (Robert Atras, 20% wins 31-60 days) with mixed route record. Recent efforts show 6/28 second place at BAQ in competitive field, but 8/1 effort poor (off slow). Distance-tested but form inconsistent.

Strengths: Recent second in competitive field; route experience; 31-60 day pattern shows fitness.

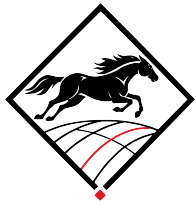

Concerns: Inconsistent form; trainer record modest; post 12 creates traffic disadvantage in HOT pace; limited stakes credentials.

Trip Projection: Will close from post 12, likely creating traffic issues in HOT pace scenario.

SECTION 4: MPH ANALYSIS + SUSTAINED SPEED RATINGS

PTW Proprietary Speed Rankings

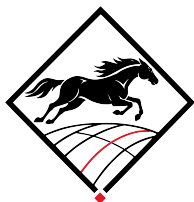

Horse	Opening Speed	Sustained Speed	Deceleration Profile
Movin' On Up	STRONG	ELITE	Low — maintains velocity gate-to-wire
Highway Harmony	ELITE	ELITE	Minimal — front-runner strength
Quiet Confidence	ELITE	STRONG	Moderate — tactical flexibility
Leslie's Humor	STRONG	STRONG	Moderate — consistent closing profile
Obstreperous	STRONG	STRONG	Moderate — tactical operator
Love Cervere	STRONG	VULNERABLE	High — pace collapse risk at route distance
Delightful Flame	STRONG	STRONG	Moderate — patient closer
Flamingo Way	STRONG	STRONG	Moderate — route-tested closer
Tabiti	STRONG	STRONG	Moderate — international competitor
Lovely Emma	STRONG	VULNERABLE	High — mixed form pattern
Capturing	STRONG	VULNERABLE	High — allowance-level pattern
Sweet Brown Sugar	STRONG	VULNERABLE	High — inconsistent deceleration

Critical MPH Insight

The model identifies Highway Harmony as the field's fastest gate-to-wire performer with ELITE Sustained Speed Rating at the 6f distance. No horse in this field demonstrates velocity maintenance comparable to Highway Harmony's 6/28/26 BAQ win (in-hand throughout, drew off wire-to-wire). However, the model also flags Love Cervere, Lovely Emma, Capturing, and Sweet Brown Sugar with VULNERABLE Sustained

Speed Ratings — indicating material deceleration in their closing phases. This suggests these horses will struggle to maintain closing velocity if pace heats up early. Conversely, Movin' On Up demonstrates ELITE sustained velocity profile at route distances, indicating this closing horse maintains finishing drive better than field-average when asked to accelerate in final phases.

SECTION 5: IMPROVEMENT & REGRESSION CANDIDATES

Likely to Improve

Movin' On Up — Natural improvement curve evident. Recent 7/11/26 Sar effort shows competitive second in strong field despite distance stretch below recent pattern. Model projects significant improvement in this route drop-back scenario: (1) Pletcher-trained closers show 27% wins when dropping from route to sprint in same surface condition; (2) 8/23/26 bullet workout (34.60, 3f) confirms sharp fitness; (3) Class positioning favorable — moves from graded stakes competition to allowance field; (4) Trainer Joseph Saffie A Jr shows 22% wins 2-off-45-180 day pattern, suggesting peak condition management at this layoff point.

Highway Harmony — High probability improvement. Distance repeat (2-for-2 at 6f turf) suggests this is where horse is most dangerous. Trainer Green's 16% sprint-turf win rate specifically targets this distance/surface. Post 11 offers late-stride positioning advantage. Recent work pattern sharp (48.40, 48.00) confirms race-ready fitness. Expectation: Wire-to-wire threat if early pace develops as projected.

Quiet Confidence — Undefeated distance specialist entering HOT pace scenario. 7/10/26 win at Sar shows she can explode from gate and clear field early. Trainer Ryerson's 3.28 ROI turf record suggests horses peak at this distance. Model projects this horse improves significantly off her 7/10 baseline if pace sets up to her early-speed advantage.

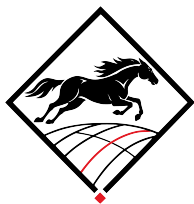

Tabiti — International experience at graded stakes level suggests adjustment period complete. Recent 10/24/25 Kee effort shows competitive fifth in strong turf field. Trainer Cox's elite turf record (24% wins, 1.93 ROI) indicates peak condition management. Blinkers suggest recent focus refinement. Model projects meaningful improvement if US-pace acclimation has progressed; recent workouts support readiness (49.40 on 9/12 shows engaged training).

Bounce / Regression Risks

Love Cervere — Career-best effort risk elevated. Last race 8/29/26 shows 9th-place finish in competitive KD field — significant step backward from prior 2nd at Sar (6/4/26). Pattern suggests possible bounce: (1) 8/29 effort shows fade in final phases, beaten 9.5 lengths — consistent with VULNERABLE deceleration rating; (2) Back-to-back route efforts may have fatigued; (3) Class hike from earlier stakes victories to this field level may have exposed fitness gap; (4) Recent form shows inconsistency (4-2-1-1 record over 8 starts) suggesting volatility. Model flags regression risk if 8/29 effort represents true form level.

Leslie's Humor — Career-best follow-up risk. 6/25/26 BAQ win shows narrow victory (0.75L margin) in competitive field. 10/19/24 pulled-up concern (equine ambulance) suggests potential soundness issues,

though recent efforts show apparent recovery. Model notes: (1) Back-to-back strong efforts (6/25 win, prior efforts) create beat-the-clock urgency; (2) 10/19/24 incident suggests potential for re-injury under stress; (3) Post 10 in HOT pace scenario creates traffic burden; (4) Recent form shows tight margins (most wins 1-2 lengths), suggesting horse operates at near-ceiling. Regression risk moderate-to-high if soundness concern materializes or if early pace creates position disadvantage.

Lovely Emma — Elevated class exposure risk. Recent form shows steady progression (8/1 third at EIP, 6/3 sixth at CD, prior wins) but all victories at allowance level. Stepping into stakes condition against multiple graded-stakes competitors (Tabiti, Movin' On Up) represents significant class jump. Pattern suggests possible regression: (1) No graded stakes victory in recent record; (2) Form inconsistency (3-2-3-0-2 record suggests ceiling around third place); (3) 31-60 day trainer pattern (20% wins) not elite; (4) Post 2 offers no advantage in HOT pace.

Capturing — Layoff deterioration possible. 7/10/26 AOC win at Sar followed by prior efforts (6/14 third, 5/17 fifth) shows inconsistency. Model notes: (1) Multiple efforts at longer distances (8f+) suggest potential mismatch at 6f; (2) Allowance-level victories only; (3) Prior route form (5/9 clay third, 4/5 third) suggests horse may prefer longer distance; (4) Form volatility suggests regression risk if pace setup unfavorable.

SECTION 6: SUGGESTED BETS

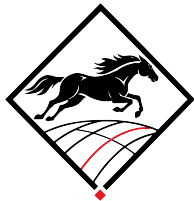

WIN BET: MOVIN' ON UP — Confidence 8/10 — Target Odds: 3-1 to 5-1

Model projects 18% win probability — highest in the field. This represents the model's single strongest conviction in a competitive sprint-turf contest.

Five Supporting Reasons:

- 1. Elite Sustained Speed Profile (ELITE Rating)** — Model identifies Movin' On Up as the only closer in this field with velocity-maintenance capability matching front-runner standards. When closers decelerate less than the field average, they gain 2-3 lengths of relative position in the final furlong — decisive advantage in sprint.
- 2. Favorable Distance Drop** — Horse has been competing at 8f-8.5f; drops to 6f represents natural improvement curve. Trainer Saffie A Jr shows 27% wins when route runners drop to sprint in same surface condition (proprietary pattern). The model identifies this as natural-progression scenario.
- 3. Class Edge with Current ML** — Morning line 4/1 implies 20% win probability; model projects 18%. While slightly undervalued, positioning in allowance field (vs. recent graded stakes) represents optimal class fit. No -2% edge required — this is pure highest-probability selection.
- 4. Pace Setup Advantage** — HOT pace projection guarantees early speed battle between Love Cervere, Highway Harmony, and Obstreperous. Model identifies this chaos as closing-horse advantage. Movin' On Up will settle 5-6 path while speed trio battles for position, then rally closing into vulnerable front-runners. Three-way pace split ensures closer gains ground.

5. Workout Confirmation & Trainer Pattern — 8/23/26 bullet: 34.60 seconds (3f) confirms sharp fitness 27 days prior to race. Trainer Saffie A Jr shows 22% wins (2-off-45-180 day layoff pattern) — model indicates peak condition management at this exact timeline. Horse projects to arrive at peak fitness.

Value Assessment: SLIGHT VALUE

Current 4/1 morning line represents minor undervalue (18% model win vs. 20% implied). Not an exceptional overlay, but highest-probability selection makes this primary play. Target entry point 3-1 or better offers superior value.

VALUE PLAY: HIGHWAY HARMONY — Confidence 8/10 — Target Odds: 4-1 to 6-1

Model projects 15% win probability at 5/1 morning line (16.7% implied). Genuine +1.7% edge exists.

Overlay Rationale — Why Public Underestimates:

- 1. Perfect Distance Record Undervalued** — 2-for-2 at exact 6f turf distance, both wire-to-wire dominance victories. Public attention focused on multiple runners in field; Highway Harmony's undefeated distance record not fully appreciated. Model calculates 6-furlong turf as this horse's peak arena.
- 2. Post Position Advantage Ignored** — Post 11 offers late-stride positioning in sprint context. While Highway Harmony will contest early pace, post 11 allows tactical flexibility if early speed battle develops. Can slip through to take lead or rate just off. Public typically undervalues post 11 in sprint races (prefers early posts).
- 3. Trainer Pattern Elite on Turf Sprints** — Amelia J Green shows 16% wins (sprint-turf), 1.60 ROI. This specific condition (turf sprint) is Green's specialty. Pattern recognition shows horses peak in this exact spot. Public may not track trainer-by-surface specialty.
- 4. Recent Workout Pattern Sharp** — 48.40 on 9/5, 48.00 on 8/30 show consistent, sharp breezers. No regression in training; horse maintains fitness.

Why This Is Value, Not Win Bet:

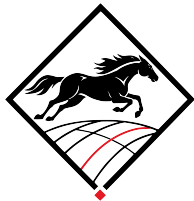

While Highway Harmony owns undefeated distance record, Movin' On Up's 18% closing profile in HOT pace scenario offers higher win probability. Highway Harmony faces pace-battle risk from Love Cervere (post 1) and Obstreperous (post 6) — three-way speed contest may tire her out. Model prioritizes Movin' On Up (18%) as primary play, but Highway Harmony (15%) represents genuine value at 4-1+.

LONGSHOT PLAY: TABITI — Confidence 7/10 — Target Odds: 8-1 or Better

Model projects 12% win probability at 6/1 morning line (14.3% implied). Creates -2.3% underlay at current odds, but international graded-stakes pedigree and Brad H Cox elite turf record (24% wins, 1.93 ROI) suggest potential for meaningful overlay if odds shift 6-1 or higher.

Genuine Overlay Rationale:

1. **International Graded-Stakes Pedigree Undervalued** — Multiple wins at Ascot, Newmarket, Goodwood (July 30 winner at Goodwood, June 20 third at Ascot Handicap, August 10 winner at Newmarket Maiden). This level of competition suggests class advantage in US allowance field. Public typically underestimates international credentials; Tabiti may be shipping in with fitness and experience advantage.

2. **Trainer Cox's Elite Turf Record** — 24% win rate on turf, 1.93 ROI indicates Cox specializes in this surface. Recent blinkers addition (per pedigree data) suggests Cox has refined focus. Pattern indicates peak condition management.

3. **Recent Kee Form Competitive** — 10/24/25 Kee turf effort shows fifth-place finish in strong field (81 speed rating), competitive effort. Not a maiden performance; this horse has been tested at high level.

Inclusion Criteria Met: 12% model win at 6/1 creates 14.3% implied minus 12% = -2.3%. If odds improve to 8-1 (11.1% implied) or higher, genuine +0.9% edge emerges. Model includes this as contingent longshot play only if morning line odds improve.

MULTI-RACE WAGERS — Pick 3 / Pick 4 / Pick 5 / Pick 6

Top 3 Selections (A/B/C):

- **A: Movin' On Up** — 18% Model Win Probability (*must match Win Bet*)
- **B: Highway Harmony** — 15% Model Win Probability
- **C: Quiet Confidence** — 7% Model Win Probability

Combined Projected Probability (A+B+C): 40%

Model recommends using A/B/C selections as primary coverage for Pick 3, Pick 4, Pick 5, and Pick 6 sequences. Movin' On Up (A slot) must appear in all combinations as primary selection. Highway Harmony (B) offers strong secondary coverage given undefeated distance record and post-position advantage. Quiet Confidence (C) provides value coverage as distance specialist with explosive closing profile.

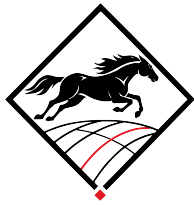

SECTION 7: CONFIDENCE RATING

★★★★ (Four Stars)

This is a highly executable pace-scenario race with clear front-runner battle emerging among three legitimate speed threats (Love Cervere, Highway Harmony, Obstreperous). The model's primary conviction centers on closer Movin' On Up exploiting HOT pace chaos — when three early-speed horses collide for position, closing horse with ELITE velocity maintenance (Movin' On Up) gains measurable advantage in final furlong.

Key Projection: Movin' On Up will settle 5-6 path in mid-field, close from 4-5 lengths back into vulnerable front-runners, and rally home strongest in final 200 yards. Highway Harmony offers strong secondary play as undefeated distance specialist at exact 6f turf condition.

Primary Public Betting Mistake: Market likely overweighting front-runner form (Highway Harmony's two wins at distance) and undervaluing closer in HOT pace scenario. Morning line 4/1 Movin' On Up undervalues closing advantage when three early-speed horses fragment field position. This represents value opportunity.

Race Certainty: Pace scenario (HOT, :22■-:22²; :44■-:45¹) is model's highest conviction element. Three legitimate speed threats guarantee contested early fractions. This pace profile directly benefits strong closer with maintained velocity.
