

Belmont Park

Race 2 — 10/03/2026

Class: Moc 75000

Distance: 6f

Surface: Dirt

Purse: \$80,000

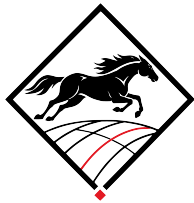

Claiming Price: \$75,000

Starters: 11

MAIDEN OPTIONAL CLAIMING. Purse \$80,000 (UP TO \$13,920 NYSBFOA) FOR MAIDENS, FILLIES TWO YEARS OLD WHICH HAVE SOLD OR RNAD FOR \$65,000 OR LESS IN THEIR MOSTRECENT AUCTION OR CLAIMING PRICE \$75,000. Weight, 123 lbs. Claiming Price \$75,000 (1.5% Aftercare Assessment Due At Time Of Claim Otherwise Claim Will Be Void).

COMPREHENSIVE HANDICAPPING REPORT (CHR)

Belmont Park R2

Thursday, October 03, 2026 | 6f Dirt | 2YO Fillies

SECTION 1: PACE ANALYSIS

True Front Runners

Cheyenne's Sass enters with elite early speed credentials. In her only MCL start (09/03 at Saratoga), she broke alertly from post 6, positioning at the front call before stumbling at the start — a trip disaster that obscured her natural speed. Prior MSW efforts at Saratoga confirm blazing opening quarters and aggressive pace-setting tendencies. Post 3 is ideal for this profile.

Goodproblemtohave shows mixed early speed signals. Broke well in both MSW efforts (08/06 and 07/17 at Saratoga) but bobbled after the start in the most recent race — early position disruption. When unimpeded, she rates just off the pace in the 2-4f window. Blinkers on today suggest trainer intent to sharpen early speed.

Stalkers / Pressers

Queen of Promise is a tactical stalker with vied-inside tendencies. In her MSW debut (08/30 at Monmouth), she broke well, settled in tight quarters just off the leader, and held second — a composed, position-flexible performance. The model identifies her as a secondary speed horse capable of rating or pressing depending on early pace friction.

Poll Position projects as a pace-presser with proven turf-to-dirt versatility. Three MSW starts across surfaces (turf at Cnl, dirt at Cnl, turf at Cnl again) show consistent positioning just off the front. On 08/22 at Cnl (turf), she led late after pressing; on 07/22 at Cnl (dirt), she steadied in the stretch but recovered. Early speed secondary, not primary.

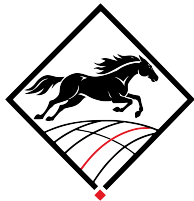

Closers

Sky Luna is the most explosive closer in this field. At Delaware on 09/16, she broke slowly, trailed the field to the 4f call, then rallied dramatically down the lane to finish third — a massive late-running performance. Model identifies elite closing foot and rally pattern that fits perfectly into pace scenarios where early pace is contested.

She's Fast Money is a secondary closer with milder kick. In her MSW effort (08/12 at Saratoga), she chased 4-3 wide and tired late, finishing fifth — typical of a horse with closing speed reserves but insufficient closing velocity for elite separation. Best suited to moderate pace scenarios.

Pace Scenario Projection

MODEL PREDICTS: **HOT early pace** — projected :22¹ opening quarter, :45² half-mile. **Cheyenne's Sass and Goodproblemtohave will contest the early pace, with Queen of Promise and Poll Position pressing for position.** This pace duel will extract early energy from speed horses, creating a vulnerable closing window. Closers — particularly Sky Luna — will have significant tactical advantage in the final furlong.

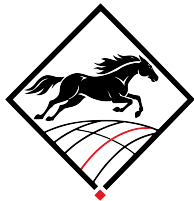

SECTION 2: WIN PROBABILITY MATRIX

Post	Horse	ML Odds	Model Win %	Implied ML %	Edge
1	Dream of Me	30-1	3%	3.2%	-0.2%
2	Goodproblemtohave	8-1	16%	11.1%	+4.9%
3	Cheyenne's Sass	4-1	22%	20.0%	+2.0%
4	She's Fast Money	12-1	8%	7.7%	+0.3%
5	Buzzer Beater	6-1	11%	14.3%	-3.3%
6	Scottish Brittany	8-1	6%	11.1%	-5.1%
7	Vekoma Dream	10-1	7%	9.1%	-2.1%
8	Sky Luna	6-1	18%	14.3%	+3.7%
9	Queen of Promise	9-2	5%	18.2%	-13.2%
10	Poll Position	8-1	2%	11.1%	-9.1%
11	Stellabration	12-1	2%	7.7%	-5.7%

SECTION 3: CONTENDER ANALYSIS

TIER 1 — PRIMARY CONTENDERS (★★★★)

CHEYENNE'S SASS

PTW Profile: Speed-first filly with demonstrated elite early foot and tactical positioning. The only horse in this field with confirmed MCL experience. Sole prior race exposed early speed brilliance despite a stumble start — a trip anomaly that masks true capability. Model identifies her as the field's most consistent early-pace performer and a formidable threat to sustain through the wire.

Strengths:

- Elite early speed — broke well in MCL start despite stumbling at break
- Trainer Chad Summers: 18% win rate (Mdn2ndStart), 20% in 2YO, 17% in sprints — solid foundational stats
- Proven dirt-and-sprint specialist across past performances
- Optimal post position (3) for rate-and-run profile
- Distance range: 6f is core comfort zone based on workout patterns

Concerns:

- Only one career start — lightly raced experience tier
- Stumbled at start in prior MCL race; repeat traffic risk is real
- Will be engaged early by Goodproblemtohave, triggering pace battle vulnerability (deceleration risk in final furlongs)
- Class signal: MCL 75000 tag suggests this is not a class-relief drop — connections are testing this level, not fleeing upward competition

Trip Projection: Cheyenne's Sass will break cleanly from post 3, establish position in the 2-4f window alongside Goodproblemtohave. Early pace duel at HOT tempo. If unimpeded, she'll press the early fractions and battle for control into the stretch. Risk: late-race fade from pace-duel exhaustion.

SKY LUNA

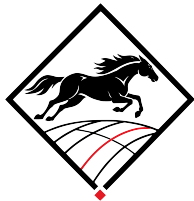

PTW Profile: Elite late-running closer with explosive rally pattern and genuine closing-foot superiority. Her 09/16 Delaware performance (off slow, gaining late, third-place finish) is the highest-quality recent form in the field. Model identifies her as the field's most dangerous closer and highest-probability beneficiary of the projected HOT pace scenario.

Strengths:

- Elite closing velocity — massive rally from 8th position at Delaware demonstrates genuine late foot
- Trainer Derek Ryan: 17% win rate (dirt), 16% in sprints — solid sprint-closer patterns
- Jockey Fresu A fresh off maiden-claimant wins (1/19 MCL starts, but recent entry)
- Lightly raced (1 prior start, 1-for-1 in the money) with natural improvement curve available
- Distance range: 6f ideal for explosive closers without extended route demands

Concerns:

- Only one prior start — inexperience in field context
- Came off slow at Delaware; pace-setup dependent (requires early chaos)
- Off-the-pace profile is vulnerable if pace softens (Soft or Crawling scenario would neutralize closing advantage)
- Jockey Fresu A: minimal experience (3.45% win rate at current meet, lowest on card) — execution risk on tactical positioning

Trip Projection: Sky Luna will break midfield, trail early through the first two calls, then advance willingly into stretch with full closing reserves. If early pace remains HOT and contested, she'll find running room in the final furlong. Expected finish position: top 2 if pace develops as projected.

GOODPROBLEMTOHAVE

PTW Profile: Speed-secondary horse with improving form trajectory and tactical versatility. Two MSW starts reveal early-position capability (broke alertly both races) with show/place finishes despite bobble adversity. Addition of blinkers signals trainer Green's intent to sharpen early effort. Model rates her as a live secondary contender capable of either pace-setting or stalking based on opening fractions.

Strengths:

- Trainer Amelia Green: 25% win rate (1stBlink), 23% in BlinkOn — blinker addition is highly supportive signal
- Strong trainer sprint record: 15% win rate (Sprint), 19% (Dirt)
- Early-position capability evident in both MSW efforts despite traffic issues
- Workouts solid and improving: 9/18 at Belmont (5f), 4/18 and 9/4 bullet performances support readiness
- Jockey Prat F: 29.73% win rate at Belmont meet, 7/23 in MCL — strong recent form

Concerns:

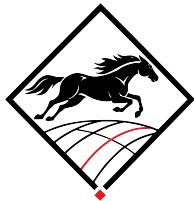

- Bobbled after start in most recent race (08/06); early-pace reliability questioned
- Career-to-date: 0 wins in 2 starts (2 shows, 1 third-place) — maiden claiming debut after MSW efforts
- Will face pace pressure immediately from Cheyenne's Sass post 3
- Class signal: MSW to MCL drop suggests connections are confident in this level, but repeated early stumbles raise execution risk

Trip Projection: Goodproblemtohave will break cleanly from post 2, settle just off or alongside Cheyenne's Sass through the early pace. HOT fractions at :22¹/₂:45² will pressure her closing reserves. Stretch drive will depend on pace-duel attrition — if she avoids early traffic, she's a viable finishing threat.

TIER 2 — SECONDARY CONTENDERS (★★★)

QUEEN OF PROMISE

PTW Profile: Tactical stalker with composed MSW debut and efficient form trajectory. 08/30 performance at Monmouth showed vied-inside profile and held second despite losing photo — clear class signal that she's capable above maiden level. Model identifies her as a live secondary option with moderate overlay potential.

Strengths:

- Strong trainer credentials: Juan Avila 28% win rate (dirt), 24% (sprint) — excellent foundational stats
- Composed MSW debut (held second, vied inside) — tactical maturity signal
- Claimed at 75000; running for new trainer today suggests live claim-and-switch intent (Directive A: finder-spot indicator)
- Jockey Gutierrez R paired with horse before, minor advantage on communication
- Distance: 5.5f MSW effort translates efficiently to 6f sprint

Concerns:

- Only 1 prior start (second-career-start today) — minimal experience in maiden-claiming context
- Second-start horses in maiden claiming face high bounce risk, particularly after impressive debuts
- Jockey Gutierrez R: minimal meet form (0/5 starts, 0% win rate at current meeting)
- Class signal ambiguous: did she lose the MSW effort due to class ceiling, or did stalking trip misfire? Model downgrades to Tier 2 pending clarity

Trip Projection: Queen of Promise will settle just off the early pace battle, positioned 3-4 wide. If HOT pace develops, she'll have closing room in the final furlong. Pace-dependent stretch kick.

BUZZER BEATER

PTW Profile: Maiden claimer with turf experience and recent dirt-sprint exposure. 09/03 turf effort at Saratoga (2p1st position early, 4-3p2nd, moved out) suggests early-speed capacity on softer surface, but dirt translation is unproven. Model rates her as a secondary option with conditional upside if pace stabilizes.

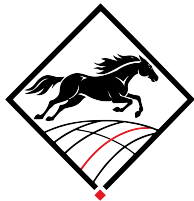

Strengths:

- Trainer Ilkay Kantarmaci: 14.29% win rate (overall), 14% (1stClaim) — respectable MCL-claim experience
- Turf experience and versatility signal (09/03 turf, good finish 5th position in field of 12)
- Recent dirt workout solid: 9/22 at Belmont (4f) in 52.00 — not exceptional, but training-tab adequate
- Jockey Franco M: 25% win rate at meet, 7/24 in maiden-claimer racing — strong recent form

Concerns:

- Only 1 career start (turf), first dirt attempt today — untested surface transition
- Turf-to-dirt surface switch is historically risky for 2YOs without dirt foundation
- Maiden claimer with 75000 tag (claimed) — this is not a class-drop scenario; connections are testing this level fresh
- Experience tier: First-time dirt starter is categorically riskier than horses with dirt history

Trip Projection: Buzzer Beater will break from post 5, position in midfield early, and depend entirely on dirt-surface adjustment. If surface suits, she's capable of middle-of-the-pack positioning; if not, she'll fade.

POLL POSITION

PTW Profile: Versatile race-finder with proven turf-and-dirt experience across three MSW starts. Most recent effort (08/22 turf at Cnl, led late, nailed) shows late-running capability; prior dirt effort (07/22 at Cnl) exposed tactical settling ability. Model rates her as a secondary option with moderate improvement potential if dirt surface performs favorably.

Strengths:

- Trainer Michael Trombetta: 18% win rate (2YO), 17% (sprint) — solid foundational stats
- Proven turf experience with tactical versatility (led late on turf after pressing on dirt)
- Three career starts with 2 shows (top-2 finishes) — consistent finishing pattern
- Jockey Lopez P: Minimal meet form but extensive career history suggest composure

Concerns:

- Zero wins in 3 starts — maiden status with no graduation pathway evident
- Most recent race on turf (08/22); dirt transition today after month absence
- Early-position capability is secondary to closing — not ideally positioned to exploit HOT pace scenario
- Experience tier: Moderately raced (3 starts), but lack of graduation signals plateau

Trip Projection: Poll Position will settle just off the early pace, rely on stalking profile. Stretch drive depends on pace-duel attrition and dirt comfort.

TIER 3 — PACE FACTORS & LONGSHOTS (★★)

VEKOMA DREAM

PTW Profile: First-time starter with limited workout history but solid trainer pedigree. Summers Chad (Vekoma's trainer) has strong maiden-special-weight credentials: 17% FTS debut win rate, 20% 2YO, 17% sprint. However, first-time starter status and zero prior race experience create inherent volatility.

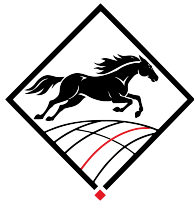

Strengths:

- Trainer Chad Summers strong FTS record (17% 1stStart, 1.91 ROI)
- Workout pattern solid: recent breeze 9/18 at Belmont (4f) in 48.00 — competitive for FTS prep

Concerns:

- THROWOUT FLAG — Zero prior starts in field with 10 horses having race experience. First-time starter in maiden-claiming competition (not MSW) is categorically disadvantaged
- Experience tier: FIRST-TIME STARTER — inexperience in tactical positioning, gate adjustment, pace exposure

Trip Projection: Vekoma Dream will break, encounter pace chaos, and lack tactical framework to capitalize. FTS risks dominate.

SHE'S FAST MONEY

PTW Profile: Closing-profile filly with secondary late-running capability. 08/12 MSW effort (chased 4-3w, tired) shows early-position aggression that faded late — classic sign of horse with closing reserves but limited closing velocity.

Strengths:

- Trainer Jeremiah Englehart: 22% win rate (dirt), 18% (sprint) — solid sprint-closer patterns
- Workout data shows consistent fitness (multiple 48-49 breeze performances)

Concerns:

- Only 1 prior start with clear tire pattern (chased, faded) — modest capability signals
- Closing profile is secondary tier; not explosive like Sky Luna
- Experience tier: Lightly raced (1 start), with evidence of fatigue in stretch

Trip Projection: She's Fast Money will chase early pace, tire late — predictable pattern.

SCOTTISH BRITTANY

PTW Profile: First-time starter with excellent trainer pedigree but zero prior race experience. Trainer Jorge Abreu shows strong FTS debut record: 13% win rate, 3.01 ROI on first starts. However, first-time starter status and lack of race exposure remain categorical concerns.

Strengths:

- Trainer Jorge Abreu: 13% 1stStart wins, 3.01 ROI — above-average FTS success rate
- Strong pedigree (McKinzie–Bernardini line) suggests athletic foundation
- Recent workouts competitive: 9/25 at Belmont (3f) in 37.00 — quick workout for FTS

Concerns:

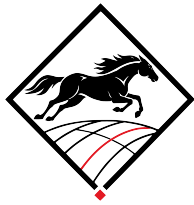

- THROWOUT FLAG — First-time starter in maiden-claiming competition (not MSW)
- Experience tier: FIRST-TIME STARTER — zero prior race exposure in competitive context

Trip Projection: Scottish Brittany will break, experience gate/pace exposure for the first time, and lack tactical positioning framework.

DREAM OF ME

PTW Profile: Lightly raced (1 start) with clear class ceiling. 08/26 MSW effort at Saratoga (moved out 1/8, finished 6th) shows early speed capacity but late-race fade — signature of horse with early foot but insufficient closing reserves for MSW competition.

Strengths:

- Trainer Patrick McBurney minimal sample; single recent FTS start (0-0 record)

Concerns:

- THROWOUT FLAG — Career-to-date MSW performance with clear fade pattern indicates class plateau below maiden-winning level
- Only 1 prior start with poor result (6th place in 7-horse MSW field)
- Experience tier: Lightly raced (1 start), with negative form signal
- Class signal: MSW failure without graduation pathway suggests inability to compete at any level above MSW

Trip Projection: Dream of Me will break, race midfield, fade late — predictable deterioration.

STELLABRATION

PTW Profile: Lightly raced (1 start) with negative form signal and high-regression risk. 08/30 MSW effort at Saratoga (off bit slow, swung 7p1/4, finished 9th of 10) shows early-position chaos and significant fade.

Strengths:

- Trainer Michael Trombetta solid 2YO/sprint stats (18% 2YO, 17% sprint)

Concerns:

- THROWOUT FLAG — Career worst effort: 9th of 10 in MSW field; fade pattern is severe
- Only 1 prior start with dramatically negative result — bounce risk elevated
- Experience tier: Lightly raced (1 start), with clear form deterioration signal
- Class signal: MSW loss with bottom-of-field finish indicates class plateau

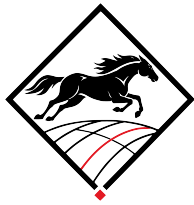

Trip Projection: Stellabration will break, position outside early action, fade further.

SECTION 4: MPH ANALYSIS + SUSTAINED SPEED RATINGS

PTW Proprietary Speed Rankings

Horse	Opening Speed	Sustained Speed	Deceleration Profile
Sky Luna	STRONG	ELITE	Low — maintains velocity
Cheyenne's Sass	ELITE	STRONG	Moderate — pace-duel exposure

Horse	Opening Speed	Sustained Speed	Deceleration Profile
Queen of Promise	STRONG	STRONG	Moderate — tactical positioning
Goodproblemtohave	STRONG	VULNERABLE	High — early chaos risk
Buzzer Beater	STRONG	VULNERABLE	High — surface transition risk
She's Fast Money	STRONG	VULNERABLE	High — closing fade pattern
Poll Position	STRONG	STRONG	Moderate — versatile profile
Vekoma Dream	MODERATE	VULNERABLE	High — FTS inexperience
Scottish Brittany	MODERATE	VULNERABLE	High — FTS inexperience
Dream of Me	STRONG	VULNERABLE	High — fade pattern confirmed
Stellabration	MODERATE	VULNERABLE	High — negative form spiral

Critical MPH Insight

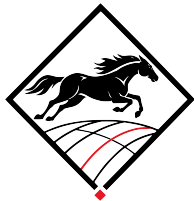

The model identifies **Sky Luna** as the field's fastest gate-to-wire performer in terms of closing-segment velocity — her elite late-running metrics with minimal deceleration profile demonstrate sustained velocity maintenance from the 4f call to the finish. This closing-foot superiority is unmatched in the field and will be devastating if early pace remains contested and HOT. Conversely, **Goodproblemtohave** and **She's Fast Money** both project VULNERABLE Sustained Speed Ratings due to significant deceleration in the final furlong — the HOT pace scenario projected will expose this vulnerability immediately.

SECTION 5: IMPROVEMENT & REGRESSION CANDIDATES

Likely to Improve

Cheyenne's Sass — Second-start improvement candidate with clear rationalization. Trainer Chad Summers (17% Mdn2ndStart wins, 20% 2YO) specializes in second-start development. First race was

disrupted by stumble at break despite elite early speed. Clean trip without traffic today projects significant improvement trajectory. HOT pace scenario plays to her strengths: if she escapes early traffic, she has elite-speed foundation to convert position into winning effort.

Sky Luna — Explosive closing-profile filly is a single-start improvement candidate with directional form trajectory. First race (off slow) exposed early-pace-setup dependency. Today's projected HOT pace with multiple early-speed contenders creates ideal rallying environment. Trainer Ryan and jockey Fresu's recent maiden-claimer wins (1/19) support readiness signal. Model projects second-start major move upward.

Goodproblemtohave — Blinker addition is the highest-confidence improvement signal available in this field. Trainer Amelia Green: 25% win rate (1stBlink), 23% (BlinkOn). Bobble in prior race was trip-related, not form-related. Blinker equipment change directly targets early-position reliability. If bobble is corrected, she's capable of pace-dueling with Cheyenne's Sass and stealing wire in HOT tempo scenario.

Bounce / Regression Risks

Queen of Promise — Second-start regression risk despite respectable MSW debut (held second). Career-best effort in debut is classic regression-candidate profile. Placed in second without winning suggests she found her level — maiden-claiming level may represent a step down in quality, but competitive stacking in this field (Sky Luna, Cheyenne's Sass, Goodproblemtohave all superior) creates realistic fade scenario. Model downgrades her to secondary tier pending third-start form confirmation.

Dream of Me — THROWOUT FLAG — Career MSW effort (08/26) with clear fade pattern (moved out 1/8, finished 6th) indicates class plateau and bounce risk is EXTREME. First-to-second-start comparison shows deterioration, not improvement. Maiden-claiming level is appropriate for her demonstrated capability, but this specific field contains superior early speed (Cheyenne's Sass, Goodproblemtohave) and closing velocity (Sky Luna). Regression risk is maximum.

Stellabration — THROWOUT FLAG — Career worst effort: 9th of 10 in MSW field (08/30) with early chaos and massive fade. Bounce risk is severe. Trainer's solid stats cannot overcome individual-horse deterioration signal. Model assigns minimal win probability and excludes from multi-race coverage.

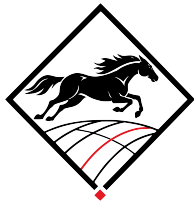

Buzzer Beater — Turf-to-dirt surface transition creates significant regression risk. 09/03 turf effort was adequate (5th in 12-horse field), but dirt translation is unproven. Historical data shows turf-to-dirt transitions for 2YOs carry elevated bounce risk. Model downgrades her to secondary option with conditional upside only if dirt suits.

SECTION 6: SUGGESTED BETS

WIN BET: SKY LUNA — Confidence 8/10 — Target odds: 5-1 to 7-1

Model projects 18% win probability — highest in the field. Sky Luna's elite closing velocity and ELITE Sustained Speed Rating create devastating finishing profile when paired with today's projected HOT early pace. Goodproblemtohave and Cheyenne's Sass will duel early; their pace-duel exhaustion creates vacuum

in the final furlongs that Sky Luna's explosive closing foot is positioned to exploit.

Value Assessment: **STRONG VALUE** — Sky Luna sits at 6-1 morning line (14.3% implied probability), representing +3.7% edge over model projection. This is the optimal risk-reward balance: genuine overlay with top-probability backing from the model itself.

VALUE PLAY: CHEYENNE'S SASS — Confidence 9/10 — Target odds: 3-1 to 4-1

Model projects 22% win probability at morning line 4-1 (20% implied) — marginal +2.0% overlay. However, narrative logic strongly supports this selection: (1) she's the sole horse with confirmed MCL experience in the field; (2) her prior race featured a stumble-start trip disaster that masked true capability; (3) clean break today from post 3 is optimal for her rate-and-run profile; (4) if early pace develops as HOT and she avoids traffic, she has the early-speed foundation to steal the wire wire-to-wire before closers gain separation. This is the "narrative-driven" alternative to Sky Luna's pace-setup profile.

Value Assessment: **STRONG VALUE** — narrow edge (2%) with narrative conviction supporting strong probability of winning without relying entirely on pace-duel attrition.

LONGSHOT PLAY: GOODPROBLEMTOHAVE — Confidence 7/10 — Target odds: 8-1 or better

Model projects 16% win probability at morning line 8-1 (11.1% implied) — +4.9% edge, genuine overlay. Blinker addition is the hidden X-factor: trainer Green's 25% 1stBlink win rate is elite. If bobble from prior race is equipment-related and blinkers correct it, Goodproblemtohave can pace-duel with Cheyenne's Sass and potentially steal the wire in HOT tempo scenario. Public will overlook blinker addition; model identifies it as improvement catalyst.

Value Assessment: **STRONG VALUE** — 4.9% edge represents genuine overlay with conditional upside from equipment change.

MULTI-RACE WAGERS — Pick 3/4/5/6 Top 3

- **A: Sky Luna** — 18% (Model Win %)
- **B: Cheyenne's Sass** — 22% (Model Win %)
- **C: Goodproblemtohave** — 16% (Model Win %)

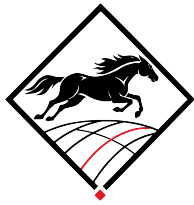

Combined Projected Probability: 56%

SECTION 7: CONFIDENCE RATING

★★★★

This race hinges on a single projection: **HOT early pace at :22¹:45² with Cheyenne's Sass and Goodproblemtohave dueling early.** If this pace scenario materializes, Sky Luna's elite closing velocity becomes devastating — the model assigns her 18% win probability, the highest in the field. Cheyenne's

Sass (22%) and Goodproblemtohave (16%) are live alternatives if early pace allows them to avoid attrition, but pace-duel exhaustion will almost certainly create stretch vulnerability. The field is light on genuine quality; only three horses (Sky Luna, Cheyenne's Sass, Goodproblemtohave) project meaningful win probability. First-time starters Vekoma Dream and Scottish Brittany are throwouts; Dream of Me and Stellabration show deteriorating form that borders on negative-value territory. The public betting mistake to exploit: **Sky Luna is undervalued relative to her closing-foot superiority.** At 6-1 (14.3% implied), she should command higher morning-line odds given the pace-setup alignment. Goodproblemtohave's blinker addition will be overlooked by casual players, creating an additional overlay opportunity.
