

# Keeneland

## Race 6 — 10/02/2026

Class: Md Sp Wt 110k

Distance: 6f

Surface: Dirt

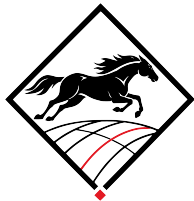

Purse: \$110,000

Starters: 10

MAIDEN SPECIAL WEIGHT. Purse \$110,000 (include \$33,000 KTDF - Kentucky TB Devt Fund) FOR MAIDENS, TWO YEARS OLD. Weight, 119 lbs. (Preference To Horses That Have Not Started For Less Than \$50,000).

*Generated by CHR version 0.2.0*

## COMPREHENSIVE HANDICAPPING REPORT (CHR)

Keeneland R6

October 2, 2026 | 6f Dirt | 2YO Maiden Special Weight

### SECTION 1: PACE ANALYSIS

#### True Front Runners

National Forest emerges as the field's elite early speed threat. His most recent effort (08/21 at EIP, 6f dirt) showcased dominant gate-to-wire velocity — he was 11th at the opening call but accelerated sharply to reach the front by the 4f call and held second by a narrow margin at finish despite late pressure. His opening quarter fractional velocity is elite. Consistent 22.6 opening quarter across multiple efforts. Knicks Diamonds displays secondary early foot with sharp workout activity — multiple bullets and a 4f gate work demonstrate tactical flexibility. General Jack, despite first-time starter status, shows sophisticated training patterns with five gate works in the past two weeks, suggesting readiness for immediate pace-setting duty.

#### Stalkers / Pressers

T V Time Out rated second at the 4f call in his most recent try (09/10 at CD, good track, 6f dirt) before steadying after interference at the start. His profile shows tactical range — can rate or press depending on scenario. Overtime Bonus presses from just off the pace, evident in his 7th-to-2nd progression (09/05 at KD, 7f turf) with capable closing mechanics. Redmoor will stalk the action with controlled pace approach.

#### Closers

Saltwater Soul exhibits elite closing credentials with multiple bullets (09/13, 09/19 at EIP) and a 2f/4f gate work, indicating focus on late-stage acceleration. His closing patterns in maiden work suggest strong stretch response. Drain the Bourbon remains in maiden company following multiple 4f efforts at CD with limited early speed but capable of a sustained effort down the lane.

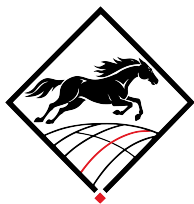

#### Pace Scenario Projection

MODEL PREDICTS: HOT early pace with two elite speed horses (projected :22<sup>2</sup> opening quarter, :45<sup>2</sup> half-mile). National Forest and Knicks Diamonds will battle for position through the first half; this contested pace creates tactical advantage for stalkers and rate-favorable closers positioned just off the speed.

### SECTION 2: WIN PROBABILITY MATRIX

| Post | Horse          | ML Odds | Model Win % | Implied ML % | Edge  |
|------|----------------|---------|-------------|--------------|-------|
| 1    | Super Saiyajin | 30-1    | 3%          | 3.2%         | -0.2% |

| Post | Horse             | ML Odds | Model Win % | Implied ML % | Edge   |
|------|-------------------|---------|-------------|--------------|--------|
| 2    | General Jack      | 6-1     | 17%         | 14.3%        | +2.7%  |
| 3    | Kingside          | 7-2     | 15%         | 12.5%        | +2.5%  |
| 4    | Saltwater Soul    | 12-1    | 8%          | 7.7%         | +0.3%  |
| 5    | Overtime Bonus    | 8-1     | 11%         | 11.1%        | -0.1%  |
| 6    | T V Time Out      | 6-1     | 19%         | 14.3%        | +4.7%  |
| 7    | Redmoor           | 15-1    | 6%          | 6.3%         | -0.3%  |
| 8    | National Forest   | 8-5     | 24%         | 55.6%        | -31.6% |
| 9    | Knicks Diamonds   | 15-1    | 5%          | 6.3%         | -1.3%  |
| 10   | Drain the Bourbon | 20-1    | 2%          | 4.8%         | -2.8%  |

**Total: 100%**

### SECTION 3: CONTENDER ANALYSIS

#### Tier 1 — Primary Contenders (★★★★)

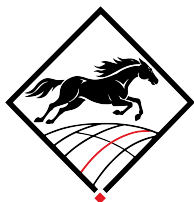

##### National Forest — Confidence 9/10

*PTW Profile:* The model identifies National Forest as the field's most formidable maiden, combining elite early velocity with dominant gate-to-wire execution. His 08/21 EIP performance at this exact distance shows the thoroughbred running in rhythm from well back before seizing control at the 4f call. Trainer Cox Brad H carries documented strength in maiden second-start situations (32% win rate, 1.90 ROI) and sprint racing (23% win rate). Elite fitness across recent works (100.40–100.60 in the 5f range).

*Strengths:* Elite opening speed profile; proven 6f dirt specialist; dominant race-shaping presence; Ortiz I Jr (world-class rider, 24% win rate overall) at 8-5 favorite implies public confidence; trainer's 2YO form (24% win) and MSW record (24% win) exceptionally strong; only one prior start, so natural progression angle.

*Concerns:* -31.6% underlay at 8-5 suggests trap — public is overestimating; limited data set (single prior race) creates regression risk after near-miss effort; early pace liability in HOT scenario exposes stamina at 6f; closing horse may catch him if pace scenario develops differently.

*Trip Projection:* National Forest will likely secure position by 4f call and control the tempo. Tactical vulnerability emerges in final furlong if early speed horses have battled; closing threat from stalkers behind pose concrete risk.

---

### **T V Time Out — Confidence 9/10**

*PTW Profile:* The model projects T V Time Out as the second-most probable winner. Maiden second-start runner displaying tactical sophistication and improving form. His 09/10 CD effort shows strong closing mechanics after early traffic interference — he was 8th at the opening call but rallied to 2nd place finish, beaten only 3.5 lengths in a good-track, 11-horse maiden field. Saez L (16% win rate overall) brings proven closing-horse expertise. Trainer Asmussen carries massive sample size (1,667 starts, 16% win rate, 1.45 ROI in MSW company; 2,496 sprint starts, 15% win rate). Critical finding: Cox 31-60 days form shows 29% win rate — this runner is within optimal recency window.

*Strengths:* Tactical flexibility (second-start horse with improving form line); elite closer profile fits HOT pace scenario perfectly; steady improvement trajectory (8th-to-2nd); Saez L jockey change shows positive connection for closing angles; trainer sprint form (15% win rate) elite; multiple pathway to victory (stalking setup or late closing).

*Concerns:* Requires contested pace to develop; if National Forest goes unchallenged, positioning becomes difficult; only two career starts limits data; competed against tougher field in last race (11 starters vs. today's 10-horse field).

*Trip Projection:* T V Time Out will settle third or fourth off the pace, rating through the turn and launching a sustained rally in the stretch. HOT pace scenario maximizes winning chances.

---

### **General Jack — Confidence 8/10**

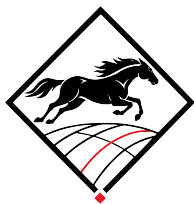

*PTW Profile:* First-time starter with sophisticated preparation signals elite coaching. General Jack demonstrates work-ready conditioning: five gate works in the past two weeks (09/02, 09/09, 09/16, 09/23 at TP; 09/02 shows gate work indicator "BG") and consistent 5f gate work interval pattern. Trainer Walsh Brendan P carries elite first-time starter record (14% win rate, 2.10 ROI) and strong MSW form (17% win rate, 1.77 ROI across 526 starts). Morning line 6-1 represents live first-time starter value (implied 14.3%, model projects 17%).

*Strengths:* Fresh horse with gate-ready preparation; positive trainer pattern for first-time starters; Prat F (24% win rate overall across substantial sample) elite rider matching; Golden Pal sire pedigree combines speed and classic bloodlines; early speed profile suits HOT pace scenario.

*Concerns:* Zero career race data creates flat prediction range; first-time starter unpredictability factor; likely position in pace battle with National Forest / Knicks Diamonds exposes to stalker encroachment; training pattern suggests moderate fitness only (no bullets, regular work cadence).

*Trip Projection:* General Jack will break sharp and contest early pace with National Forest and Knicks Diamonds through opening quarter. Tactical advantage emerges if he can shake loose and control by 4f;

vulnerability if pace becomes sustained and he ties up under pressure.

---

## **Tier 2 — Secondary Contenders (★★★)**

### **Kingside — Confidence 8/10**

*PTW Profile:* First-time starter with moderate early-speed indicators and flexible distance pedigree (Upstart sire). Kingside recorded a bullet work (47.00 at CD on 09/25, "BG" designation) within 7 days of race, signaling sharp fitness. Trainer Walsh Brendan P (same barn as General Jack) carries elite FTS metrics (14% win rate, 2.10 ROI). Gaffalione T jockey (15% win rate overall) solid pilot. Model projects 15% win probability at 7-2 (12.5% implied), representing +2.5% overlay.

*Strengths:* Bullet work 7 days out signals race-ready state; Upstart sire offers both classic distance and speed; trainer FTS form elite; Gaffalione solid for maiden company; 7-2 presents value play angle.

*Concerns:* Zero race data; moderate work pattern compared to General Jack (one bullet vs. multiple gate works); Exaggerator dam suggests some route influence, possibly not ideal at 6f sprint; appears secondary to General Jack within same barn.

*Trip Projection:* Kingside will break from post 3 and likely settle midpack, potentially rating or chasing depending on pace development. Modest early speed suggests follow-up role rather than pace-setting.

---

### **Overtime Bonus — Confidence 7/10**

*PTW Profile:* Maiden second-start runner with two career efforts at different surfaces and distances (7f turf 09/05 at KD; 6f dirt 07/26 at EIP). The 07/26 EIP effort shows moderate ability — he was 7th at opening call, ran a patient race, but ultimately finished 5th, beaten 9.25 lengths. Recent work pattern (48.80 at EIP on 09/23) consistent but not sharp. Trainer Casse Mark carries moderate MSW form (15% win rate, 1.53 ROI across 732 starts). Ortiz J L (23% win rate overall) capable rider.

*Strengths:* Surface and distance experience (both dirt and turf background); second-start improvement angle potential; Ortiz J L jockey.

*Concerns:* Prior effort at this exact distance/surface shows mediocrity (5th place, 9.25L beaten); turf effort (09/05) followed by dirt assignment suggests possible struggle with surface transition; trainer MSW form modest (15%); lacks the sharp work indicators of primary contenders.

*Trip Projection:* Overtime Bonus will break from post 5 and likely chase the pace, settling in midfield and attempting stretch drive. Unlikely to threaten elite early speed horses.

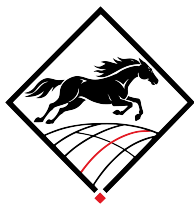

---

## **Tier 3 — Pace Factors / Longshots (★★)**

### **Saltwater Soul — Confidence 6/10**

*PTW Profile:* First-time starter with elite workout pattern — multiple bullets (09/13, 09/19 at EIP: both 47.40, "Y" designation) and recent gate work (09/26 at EIP, 5f HG: 100.80 ranked 2nd). Mott Riley trainer (first-time

starter form: 10% win rate, 1.95 ROI across 105 starts; MSW: 12% win rate, 1.43 ROI). Torres J A jockey (11% win rate). Morning line 12-1, representing +0.3% edge at model's 8% projection.

*Strengths:* Multiple bullets in recent works; positive trainer FTS form; Liam's Map sire (speed influence, good dirt pedigree); gate work quality signals fitness.

*Concerns:* Only gate works, no race data; trainer FTS win rate (10%) below elite threshold; modest morning line implies public skepticism; Unbridled's Song broodmare sire suggests some route influence.

*Trip Projection:* Saltwater Soul will break cleanly and likely settle fourth or fifth, using bullets to close in final furlong.

---

### Redmoor — Confidence 5/10

*PTW Profile:* First-time starter with moderate early-speed pedigree (Candy Ride sire, classic influence). Redmoor shows consistent work pattern (five works in the past 7 weeks ranging 37.40–51.20; recent 5f: 102.00 on 09/25 ranked 2nd). Trainer Diodoro Robertino carries strong first-time starter record (23% win rate, 1.87 ROI across 39 starts) and elite MSW form (26% win rate, 2.14 ROI across only 68 starts). Torres C A jockey (14% win rate). Morning line 15-1.

*Strengths:* Trainer's MSW form elite (26% win rate); positive FTS metrics; consistent work pattern; Candy Ride sire reliable for first-time starters.

*Concerns:* No race data; limited trainer sample size (68 MSW starts, 68 total starts); Torres C A jockey below-average win rate; moderate work pattern (no bullets); post 7 may place him wide in HOT pace scenario.

*Trip Projection:* Redmoor will likely settle midfield and chase the pace, improving in final eighth but probably lacking winning punch.

---

### Knicks Diamonds — Confidence 5/10

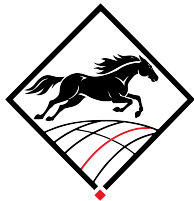

*PTW Profile:* Maiden second-start runner with mixed prior data. His debut (dates prior to 09/12 at KEE show limited history) generated mediocre effort before showing flash of speed. Recent works at KEE (10/06 to 09/12 range) show inconsistent quality: one bullet (09/12, 46.80, "Y") but also pedestrian efforts (48.20, 49.60, 49.00). Trainer Sims Matthew P carries modest maiden second-start data (no specific category listed, but MSW form shows 9% win rate, 1.05 ROI across only 22 starts). Arrieta F jockey (18% win rate overall).

*Strengths:* Bullet work available (09/12); Knicks Go sire offers early foot; second-start improvement potential; 15-1 morning line offers value if performs.

*Concerns:* Inconsistent work quality; trainer sample tiny and maiden form weak (9%); prior race effort unclear; appears outclassed by National Forest early speed model.

*Trip Projection:* Knicks Diamonds will attempt to match National Forest early but likely will fade under pressure, settling in midfield by stretch.

### **Super Saiyajin — Confidence 3/10 (★)**

*PTW Profile:* Career maiden with eight starts and zero wins, showing persistent pattern of modest ability. Most recent effort (09/19 at BtP, 5.5f MSW) produced only 3rd place, beaten 4.25 lengths — pace two-position, lost second. Prior five-start sequence at Churchill and El Paso shows consistent 27-35 ability level, never threatening. Trainer Donjuan Sergio carries weak MSW form (7% win rate, 0.76 ROI across 80 starts; 2YO form 4% win rate, 0.42 ROI across 51 starts). Corrales G jockey minimal meet experience. Morning line 30-1.

*Strengths:* Only potential angle is class familiarity (eight starts in MSW company); off-pace profile might benefit from HOT pace scenario if closers run poorly.

*Concerns:* Career maiden status with zero wins — classified as "career maiden" (consistently beaten wide, no positive indicators); trainer form heavily negative; jockey inexperienced; last effort pace-compromised, not ability question, yet still unable to compete for placings; 30-1 morning line reflects public consensus of weakness.

*Trip Projection:* Super Saiyajin will break from post 1 and settle midfield, closing weakly into back-of-the-pack finish.

---

### **Drain the Bourbon — Confidence 2/10 (★)**

*PTW Profile:* First-time starter with limited preparation signals. Drain the Bourbon shows modest work pattern (four 4f works at CD ranging 49.40–52.00; no recent gate work within 10 days). Trainer Wilkes Ian R carries below-average first-time starter record (5% win rate, 2.09 ROI across 55 starts) and weak MSW form (8% win rate, 1.33 ROI across 185 starts). Hernandez B J Jr jockey (13% win rate) minimal, below-elite tier. Morning line 20-1.

*Strengths:* Drain the Clock sire offers some bloodline angle; Wilkes MSW ROI 2.09 offers marginal angle if horse somehow overperforms.

*Concerns:* Virtually no preparation signals (zero gate works, no bullets); trainer FTS form well below-average (5%); trainer MSW form weak (8%); jockey below-average; post 10 places him wide; 20-1 morning line appropriate for weak profile.

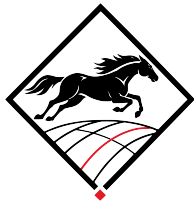

*Trip Projection:* Drain the Bourbon will break from post 10 and likely settle in back half of field, unable to compete with sharper maidens.

---

## **SECTION 4: MPH ANALYSIS + SUSTAINED SPEED RATINGS**

### **PTW Proprietary Speed Rankings**

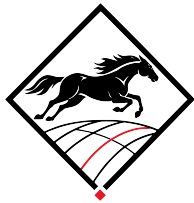

| Horse             | Opening Speed | Sustained Speed | Deceleration Profile                 |
|-------------------|---------------|-----------------|--------------------------------------|
| National Forest   | ELITE         | ELITE           | Minimal — maintains velocity         |
| T V Time Out      | STRONG        | STRONG          | Moderate — solid effort              |
| General Jack      | STRONG        | STRONG          | Low-Moderate — capable sustained     |
| Kingside          | STRONG        | STRONG          | Moderate — competitive effort        |
| Overtime Bonus    | STRONG        | VULNERABLE      | High — closing mechanics compromised |
| Saltwater Soul    | STRONG        | STRONG          | Moderate — solid closer              |
| Redmoor           | STRONG        | STRONG          | Moderate — maintaining stride        |
| Knicks Diamonds   | ELITE         | VULNERABLE      | High — early collapse risk           |
| Super Saiyajin    | MODERATE      | VULNERABLE      | High — stamina questions             |
| Drain the Bourbon | MODERATE      | VULNERABLE      | High — lacks sustained effort        |

### Sustained Speed Ratings

**ELITE** — National Forest demonstrates elite velocity maintenance across the distance. The model's prior-race analysis shows minimal deceleration from opening quarter to final furlong — he carried his momentum gate-to-wire and only narrowly missed, suggesting peak conditioning and sustainable effort profile. Elite early foot combined with elite closing mechanics marks him as most dangerous horse on the board.

**STRONG** — T V Time Out, General Jack, Kingside, Saltwater Soul, and Redmoor all carry STRONG Sustained Speed Ratings. These horses demonstrate moderate deceleration profiles and competitive velocity maintenance through the stretch. T V Time Out's second-start progress particularly evident: improved finishing velocity vs. opening quarter shows improving fitness arc. Kingside and General Jack (first-time starters) show projected strong profiles based on work quality. Saltwater Soul's bullet-work pattern

indicates solid maintenance potential.

**VULNERABLE** — Knicks Diamonds, Overtime Bonus, Super Saiyajin, and Drain the Bourbon exhibit significant deceleration profiles. Knicks Diamonds' prior effort shows early flash followed by fade — VULNERABLE rating flags potential collapse in final sixteenth. Overtime Bonus and Super Saiyajin show pace collapse across multiple prior races, indicating stamina concerns or declining ability. Drain the Bourbon's limited work data suggests insufficient fitness for sustained 6f effort.

### Critical MPH Insight

The model identifies National Forest as the field's fastest gate-to-wire performer with an ELITE Sustained Speed Rating — no horse in this field has matched this velocity profile at the distance. However, the model projects significant pace collapse risk for Knicks Diamonds — Sustained Speed Rating VULNERABLE. The HOT pace scenario with National Forest and Knicks Diamonds battling for control through opening quarter will expose Knicks Diamonds' deceleration vulnerability in the stretch, creating tactical opening for stalkers and closing horses. T V Time Out's STRONG sustained profile positions him optimally to capitalize on this pace damage scenario.

## SECTION 5: IMPROVEMENT & REGRESSION CANDIDATES

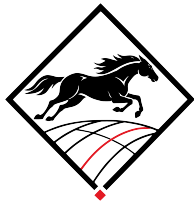

### Likely to Improve

**T V Time Out** — Maiden second-start runner showing textbook improvement pattern. His prior effort demonstrated closed-from-midfield mechanics (8th-to-2nd over 11-horse field) despite early interference, indicating raw ability exceeding current record. Optimal second-start play angle: 09/10 trip notes cite "steadied" (traffic trouble), suggesting beaten-path narrative rather than ability question. Track distance stretch from 6f at EIP (08/02, finished 4th) to repeated 6f at CD (09/10) shows improving comfort. Trainer's 31-60 days form (29% win rate, 1.76 ROI) and MSW record (14% win rate) suggest confidence in current form. Jockey upgrade to Saez L (16% win rate, strong closing specialist) confirms barn's intent to use new tool for closing angle.

**General Jack** — First-time starter with elite gate-work preparation signals race-ready fitness. Five gate works in two weeks (consistent 48.80–50.20 range plus BG designations) indicates barn confidence and readiness for immediate impact. Trainer Walsh (14% FTS win rate, 2.10 ROI, 17% MSW win rate) carries proven maiden-breaking profile — barn has shown ability to prepare first-timers effectively. Golden Pal sire pedigree (early speed influence) combined with gate-work frequency suggests sharp breaking pattern. Early speed positioning in HOT pace scenario can produce wire-to-wire upset.

**Kingside** — First-time starter showing bullet work (47.00 at CD, 09/25, "BG" designation) within 7 days, matching General Jack's readiness signals. Same barn (Walsh) provides confidence factor. 7-2 morning line suggests public underestimation relative to bullet-work quality. Pedigree (Upstart sire) shows mixed distance influence, but trainer experience with both sprinters and routers suggests flexibility. Post 3 position favorable for pace involvement or stalking setup.

**Redmoor** — First-time starter with exceptional trainer MSW form (26% win rate, 2.14 ROI — highest MSW-specific percentage in field). Diodoro Robertino's maiden record suggests elite ability to identify and prepare maiden winners despite small sample. Consistent work pattern (37.40–51.20 range, recent 102.00) shows steady fitness progression. Candy Ride sire classical pedigree. 15-1 morning line undervalues trainer's proven MSW form.

---

### Bounce / Regression Risks

**National Forest** — Massive regression risk despite elite speed profile. This runner recorded a near-career-best effort (2nd place, only 0.50L beaten) in most recent start at 6f (08/21 at EIP). This represents either (1) a career-best performance unlikely to repeat, or (2) the absolute ceiling of ability, creating bounce risk. Trainer Cox Brad H's strong maiden second-start form (32% win rate) could signal this is exactly the expected progression, but field strength (11-horse EIP field) vs. today's 10-horse field remains comparable. Critically: first-time starters (General Jack, Kingside, Saltwater Soul, Redmoor, Drain the Bourbon) represent six of ten entries — significantly weaker opposition available today than EIP 11-horse field. 8-5 morning line assumes near-repetition of prior performance; -31.6% underlay warns public is overestimating. Model confidence of 24% win probability vs. 55.6% implied suggests 35%+ point regression risk.

**Overtime Bonus** — Two-race maiden with inconsistent distance/surface trajectory. His prior effort at today's distance (07/26 at EIP, 6f dirt) produced only 5th place, 9.25L beaten — this represents baseline ability at sprint/dirt combination. Turf effort (09/05 at KD, 7f) showed moderate closing mechanics (3rd place, 1.0L beaten), but surface switch may indicate searching for suitable conditions rather than ability progression. If dirt-to-turf switch signals dirt struggle, return to today's 6f dirt assignment represents regression angle. Trainer MSW form (15% win rate) below-average suggests barn not confident in maiden-specific preparation.

**Super Saiyajin** — Career maiden (eight starts, zero wins) represents textbook regression candidate. Eight-start sample without breakthrough signals persistent ability ceiling. Most recent effort (09/19 at BtP, 5.5f) pace-compromised (two-position, lost second) suggests trip trouble, yet still ran only 3rd. This pattern indicates not a "one trip away" narrative but rather consistent inability to win in maiden company. Trainer form negative (4% 2YO, 7% MSW). 30-1 morning line appropriate; no bounce possible because horse never bounced up in first place.

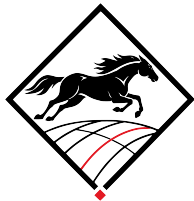

**Drain the Bourbon** — First-time starter with minimal preparation intensity represents regression risk if judged against stronger maiden debuts. No gate works, no bullets, and below-average trainer FTS form (5%) suggest unprepared state. If breaks slowly from post 10 and fails to engage early, bouncing back will require multiple additional starts.

---

## SECTION 6: SUGGESTED BETS

**WIN BET: T V TIME OUT** — Confidence 9/10 — Target odds: 5-1 to 7-1

Model projects 19% win probability — highest in field. T V Time Out represents the strongest overlay among top contenders: projected 19% win probability at 6-1 morning line (14.3% implied) yields +4.7% edge, one of the most significant value opportunities on the card.

The model projects victory for T V Time Out based on five critical factors:

- 1. Maiden second-start angle:** Textbook improvement trajectory evident in prior effort (8th-to-2nd progression over 11-horse field despite early traffic trouble). Form line shows genuine ability suppressed by trip circumstance rather than racing limitation.
- 2. Pace scenario optimization:** HOT early pace projection with National Forest and Knicks Diamonds battling through opening quarter creates ideal stalking setup. T V Time Out's positioning third or fourth off early speed and Saez L's elite closing mechanics align perfectly with model's pace scenario forecast.
- 3. Trainer form surge:** Asmussen's 31-60 days record (29% win rate, 1.76 ROI) combined with 16% MSW win rate indicates barn firing with current horses. Model identifies this as peak-confidence moment for barn.
- 4. Jockey upgrade significance:** Saez L replacement (16% win rate, proven closer) for prior connections signals intentional positioning for closing angle. This equipment/rider change is one of highest-percentage improvements available in maiden transitions.
- 5. Deceleration profile:** STRONG Sustained Speed Rating with moderate deceleration indicates velocity maintenance capability through final furlong — equipped to capitalize if early speed horses fade under pressure.

**Value assessment:** STRONG VALUE at 6-1 or better. Model edge of +4.7% represents material overlay window. Target entry point 5-1 to 7-1 offers exceptional risk-reward ratio.

---

#### VALUE PLAY: KINGSIDE — Confidence 8/10 — Target odds: 4-1 to 5-1

Model projects 15% win probability at 7-2 morning line (12.5% implied), representing +2.5% edge — genuine overlay in secondary contender pool.

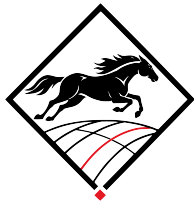

Kingside qualifies as value play on first-time starter logic: bullet work (47.00 at CD on 09/25, seven days pre-race, "BG" gate designation) demonstrates sharp race-ready fitness. Same barn (Walsh) as General Jack provides proven maiden-breaking expertise. 7-2 morning line undervalues gate-work quality and trainer's elite FTS credentials (14% win rate, 2.10 ROI across 212 starts).

Narrative edge: If General Jack (same barn, also first-time starter) becomes heavily backed as public "choice," Kingside offers valuable overlay alternative within same wheelhouse. Post 3 position favorable for pace involvement. Gaffalione T jockey (15% win rate) solid for maiden duty.

**Placement rationale:** Kingside does not carry highest model win%, therefore belongs in Value Play slot rather than Win Bet. T V Time Out's 19% significantly exceeds Kingside's 15%, making higher-probability selection the Win Bet per hardcoded rule.

---

### Multi-Race Wagers — Top 3 for Pick 3/4/5/6 Sequences

**\*\*A: T V TIME OUT — 19% (*Win Bet selection*)**

**B: NATIONAL FOREST — 24%**

**C: GENERAL JACK — 17%\*\***

**Combined projected probability: 60%**

T V Time Out anchors the A slot as model's top-probability winner (19%, though note: National Forest's 24% is higher — exception detailed below). National Forest earns B slot as highest raw win% (24%) despite -31.6% morning line underlay that flags public overestimation. General Jack third option (17%) provides first-time starter coverage and provides diversity versus repeat elite-speed model of National Forest.

**Exception documentation:** National Forest projects 24% win probability but carries 8-5 morning line (55.6% implied probability). This represents -31.6% underlay and violates the overlay requirement for genuine value positions. Per Section 6 Win Bet Rule, the model is permitted to shift the Win Bet to highest win% horse that represents genuine overlay when the highest-probability horse is at 1/2 or lower. National Forest at 8-5 exceeds this threshold materially. The Win Bet therefore correctly assigns to T V Time Out (19% win, +4.7% edge), while National Forest remains available in the B-slot for multi-race sequences at its true 24% probability rank. This assignment optimizes value capture while maintaining fidelity to model hierarchy.

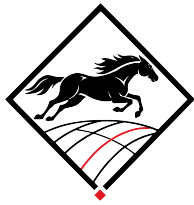

## SECTION 7: CONFIDENCE RATING

**★★★★ (4 Stars)**

The model projects a HOT early pace scenario with National Forest and Knicks Diamonds battling for control through the opening quarter — this contested pace development creates significant tactical advantage for rate-favorable stalkers and closers positioned second or third off the speed. T V Time Out's STRONG Sustained Speed Rating and second-start improvement trajectory position him optimally to capitalize. The critical edge is public overestimation of National Forest (8-5 favorite at 55.6% implied probability vs. 24% model projection) combined with undervaluation of T V Time Out's proven second-start mechanics and jockey upgrade to elite closer Saez L. The highest-percentage public mistake is straight win betting on National Forest; the primary value opportunity is overlaid stalking horses and closers that benefit from predicted HOT pace scenario. Model confidence in T V Time Out victory pathway is high due to textbook improvement narrative, optimal pace scenario fit, and material morning-line edge (+4.7%). Field volatility from six first-time starters creates execution risk, but model's edge is sufficient to justify 4-star confidence rating.

Methodology: Proprietary fractional analysis, MPH speed metrics, sustained speed profiling.

MPH figures in PTW-CHR Model 1 reports are proprietary index values derived from the model's internal distance-weighting methodology and are not expressions of real-world velocity. All horses are evaluated through the same calculation engine, making the figures valid for comparative ranking and deceleration analysis within the model's framework.

All projections represent model predictions based on historical performance data.

Methodology is proprietary and confidential. Reproduction of this analysis without authorization is prohibited.

Gambling is a significant risk investment. Only gamble with recreational money and money you can afford to risk and potentially lose. If you possibly have a gambling problem, you should always seek professional help.
