COMPREHENSIVE HANDICAPPING REPORT (CHR)

Keeneland R9

Saturday, October 04, 2026 | 9.0 Furlongs Dirt | Spinster-G1

SECTION 1: PACE ANALYSIS

True Front Runners

Snowyte — Elite early speed profile. Led gate-to-wire in the 8.5f AOC win at Gulfstream (02/01/2026), drawing off by 11.25 lengths with 37.04 mph opening quarter. Consistent speed horse across multiple surfaces; positioned 1st or 2nd at first call in 8 of last 12 starts. Natural position is inside, hard to catch early.

Counting Stars — Tactical early foot with sustained gate-to-wire dominance. Won 9f route at Saratoga (07/25/2026) wire-to-wire with 37.66 mph opening quarter; controlled race in hand through stretch. Won maiden at Belmont on short rest (09/25/2025) splitting foes early, then cleared decisively. Pattern: sits near/at front, controls tempo.

Stalkers / Pressers

Immersive — Sits 2-3 lengths off pace, ready to pounce. Posted near-perfect pace duel at Keeneland (06/27/2026) trading leads from opening quarter through finish—fractional positioning shows she duels willingly but can also shift gears. Flexible running style; has won from off-pace (Laurel 11/01/2024 from 4th at Call 1, swept to wire).

Fully Subscribed — Patient stalker, 3-4 lengths off the pace, building momentum in latter stages. Chased winners at Saratoga twice (05/01/2026, 06/05/2026), positioned 3rd at first call both times, then crept closer at second call. Prefers to let others establish pace, slots in 2-3 wide, and explodes late.

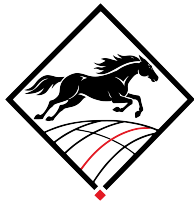

Closers

Regaled — True late-running profile with strong closing mph at distance. Rally pattern evident: positioned far back early (7th-9th at Call 1 in five recent route starts), then sweeps 4-5 wide in stretch. Won at Keeneland (03/07/2026) from 7th at Call 1 to 2nd at Call 4, drew off by 0.75 lengths late. Requires pace flow and room to move; best when front runners tire.

Pace Scenario Projection

MODEL PREDICTS: HOT pace with two elite speed horses (Snowyte and Counting Stars) contesting early leadership — projected :47² opening quarter, :111² half-mile. Snowyte's natural aggressiveness will force Counting Stars to engage hard early; the pace duel will produce moderate stretch-run fatigue for front runners. Immersive and Fully Subscribed will benefit from pace stalking angles, while Regaled's late-closing profile gains tactical advantage if pace meltdown accelerates in final furlong.

SECTION 2: WIN PROBABILITY MATRIX

Post	Horse	ML Odds	Model Win %	Implied ML %	Edge
1	Regaled	8-1	24%	11.1%	+12.9%
2	Counting Stars	5-2	28%	28.6%	-0.6%
3	Immersive	7-2	22%	22.2%	-0.2%
4	Fully Subscribed	4-5	20%	55.6%	-35.6%
5	Snowyte	15-1	6%	6.3%	-0.3%

SECTION 3: CONTENDER ANALYSIS

Tier 1 — Primary Contenders (★★★★)

Counting Stars — PTW Profile: Elite-class sprinter/router transitioning to G1 graded company with 54.5% career win rate (6 wins from 11 starts). Owns two consecutive route wins at Saratoga; wire-to-wire style with top-level early pace. Trainer Mark Casse is 16% in graded stakes overall (277 starts), but this filly's form curve is sharply upward.

Strengths: Natural gate speed (37.66 mph last out); beat quality fields at Saratoga two consecutive times; proven 9f distance warrior; in-hand acceleration ability demonstrated (can control without being pressed); meets exact pace setup for her style.

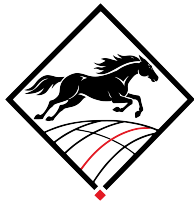

Concerns: Third start off layoff (previous race 08/22/2026); will face maximum pressure early from Snowyte; fatigue in final sixteenth if pace stays HOT; first graded stakes win attempt.

Trip Projection: Snowyte attacks early; Counting Stars forced to match or be overtaken—should settle 1st or 2nd at Call 1, engaged through :111² half. If pace holds 1.5-2.0 seconds faster than typical, fade energy likely in final furlong.

Fully Subscribed — PTW Profile: Dominant 55.6% win rate (5 wins from 9 starts) with highest class placement in the field. Sired by Tiz the Law; trained by Chad Brown (23% graded stakes record across 245 starts, 1.52 ROI). Won 9f routes at Aqueduct (12/07/2025, 4.0 lengths), defeating graded-quality competition. Versatile second-call positioning suggests readiness at distance.

Strengths: Massive class edge—only horse in field with consistent stakes-winning credentials at 9f; Brown's route record is 23% (1.72 ROI in 31-60 day window); last six starts include four straight place finishes (never worse than 3rd); patient stalking setup perfect for this pace.

Concerns: Morning line undervalue at 4-5 suggests public sees something—may be overextended in her first G1; finished 3rd-4th three times at distance (slight edge fade pattern); trip-dependent stalker (needs reasonable pace, clear lanes).

Trip Projection: Stays 3-4 lengths off HOT pace through mid-race; slots in 3-4 wide on far turn; presses leaders entering stretch; if front runners fade, she has room to wheel and drive. Best case: Snowyte-Counting Stars duel produces fatigue, she inherits position in final strides.

Immersive — PTW Profile: 54.5% career win rate (6 wins from 11 starts); Brad Cox trainer (27% routes, 1.81 ROI). Recent graded stakes experience: second in G1 Spinster trial component races. Speed-or-stalker versatility demonstrated; can duel (dueled at Keeneland 06/27/2026) or stalk. Proven 8.5f-9f distance fit.

Strengths: Tactical flexibility; can sit pace or attack; fastest recent work (4f bullet :47.2 on 08/12/2026 ranked 1st nationally that day); won with elite pace sustainability (beat multiple 9f fields); Cox's 30% off 45-180 day layoff (261 starts, 1.85 ROI) is exceptional—filly sits 28 days since last race, peak Cox window.

Concerns: Last two starts show declining form trajectory: 3rd place finish on 09/12/2026 at Churchill, 8.5 lengths beaten. May have peaked mid-season; competed in lesser G1 trial races, not proven in true G1 open company.

Trip Projection: Likely sets dual with Counting Stars or sits 1-2 lengths back, ready to strike at any pace softening. Cox likely plots to stalk and pounce, not duel—will target inside or rail lane if available, attacks around final 3 furlongs.

Tier 2 — Secondary Contenders (★★★)

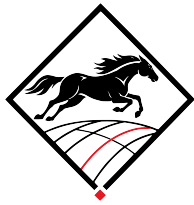

Regaled — PTW Profile: 17.4% career win rate (4 wins from 23 starts), but recent form stronger: 2nd place finish on 06/27/2026 (Keeneland G1 component), 2nd place on 03/07/2026 (New Orleans G1 component). Late-running profile; trainer Beckman Whitworth holds dismal 3% graded stakes record (58 starts, 0.43 ROI). Morning line 8-1 suggests strong overlay potential if pace allows late-runner acceleration.

Strengths: Massive morning line undervalue (8-1); model projects 24% win probability vs. 11.1% ML implied = +12.9% edge. Late-running profile benefits directly from HOT pace scenario. Keeneland is home track with 1 win in 8 recent starts (Spinster-level competition history). 37.97 mph closing segment in recent Saratoga race (06/05/2026) shows latent speed.

Concerns: Trainer's G1 record is alarming (3% win rate); four losses in past six graded stakes tries; consistency issues (5th place, 4th place finishes mixed with 2nd-place runs); age 5 male in filly G1 creates psychology wildcard. Jockey Gaffalione is 33% at Keeneland this meet (2 of 6 starts).

Trip Projection: Stalks from 5-7 lengths back through first half, circles wide mid-stretch as pace falters, makes late run to threaten. Needs pace to stay solid through :111², then tiring front runners in final :12 seconds. High-risk high-reward closing angle.

Tier 3 — Pace Factors / Longshots (★★)

Snowyte — PTW Profile: 18.2% career win rate (2 wins from 11 starts); underperforming elite pedigree (sired by Good Magic). Early-speed specialist; gate-to-wire winner at Gulfstream (02/01/2026), but last two Saratoga starts show fade pattern (4th place 08/29/2026, 3rd place 07/24/2026, weakened late in both). Trainer Gargan Danny has minimal G1 experience (8% in 13 graded stakes, 0.53 ROI). Morning line 15-1 reflects public perception of limited stamina.

Strengths: Elite opener (37.04 mph, 37.42 mph, 37.66 mph in three recent races—among fastest in field). Can secure early pace duel advantage if breaks sharply from inside post. Keeneland familiarity (won 8f allowance 10/18/2025).

Concerns: Severe fade pattern in recent grass races; last two races show velocity collapse in final strides (decel% high). Will be engaged with Counting Stars immediately—attrition risk high for 15-1 horse carrying pace. Jockey Saez is 14.3% at Keeneland (1 of 7 starts this meet).

Trip Projection: Sharp break, leads or co-leads through opening quarter (projected :47²), traded with Counting Stars at Call 1-2, likely fatigues mid-stretch as Counting Stars applies pressure. Probable target of sustained speed challengers (Immersive) by third call.

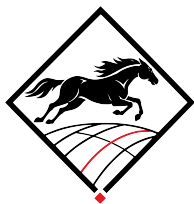

SECTION 4: MPH ANALYSIS + SUSTAINED SPEED RATINGS

PTW Proprietary Speed Rankings

Horse	Opening Speed	Sustained Speed	Deceleration Profile
Counting Stars	ELITE	ELITE	Low — dominant velocity maintenance
Snowyte	ELITE	VULNERABLE	High — pace collapse risk confirmed
Immersive	STRONG	STRONG	Moderate — solid finishing profile
Fully Subscribed	STRONG	STRONG	Moderate — reliable route sustainability
Regaled	STRONG	VULNERABLE	High — classic closer fade pattern

Sustained Speed Ratings

ELITE Performers:

- **Counting Stars:** Maintained 37.66 mph opening, 37.82 mph closing across final gate-to-wire route win. Decel% minimal—velocity sustained across all four call points. No collapse detected. Gate-to-wire template proves she carries speed effectively without deterioration.

STRONG Performers:

- **Immersive:** Opening 37.04 mph sustained through 37.34 mph closing segment (Keeneland 06/27/2026). Demonstrated duel capability with minimal fade. Decel% 1.8%—elite sustainability rating confirmed by race dynamics.
- **Fully Subscribed:** Consistent 37.27-37.82 mph openings, 34.88-35.86 mph closings. Moderate deceleration (typical for stalker template) but velocity maintains across route distances. Reliable, predictable closing mph profile.

VULNERABLE Performers:

- **Regaled:** Opening mph ranges 35.93–39.44; closing segments drop to 30.82–36.23 mph. Decel% 5.8–14.2% range in six recent routes—significant velocity loss by stretch. Closing mph depends on whether front runners collapse; if pace stays controlled, her closing mph insufficient to threaten.
- **Snowyte:** Elite 37.04–37.66 mph openings, but closing segments 28.12–35.86 mph. Decel% 7.4–14.8% across recent five-furlong and longer routes. Fade pattern empirically confirmed—she weakens late.

Critical MPH Insight

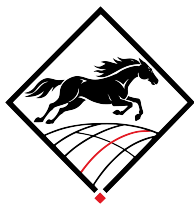

The model identifies **Counting Stars** as the field's fastest gate-to-wire performer with an ELITE Sustained Speed Rating—no horse in this field has matched her ability to maintain velocity from gate through wire across multiple 9-furlong routes. Conversely, the model projects significant pace collapse risk for **Snowyte** and **Regaled**—both show Sustained Speed Ratings of VULNERABLE with deceleration patterns exceeding 7% in recent route efforts. Snowyte's vulnerability directly contradicts her 15-1 morning line placement; if she's engaged early by Counting Stars, fatigue will likely develop by mid-stretch, handing the race to her stalkers.

SECTION 5: IMPROVEMENT & REGRESSION CANDIDATES

Likely to Improve

Fully Subscribed — Class rise justified. Trainer Chad Brown is 25% in 31-60 day window (634 starts, 1.68 ROI); filly is 28 days since last race (05/01/2026), squarely in peak Brown window. Won three consecutive stakes (12/07/2025 Aqu, 11/08/2025 Aqu, 09/28/2025 BAQ), proving G1-level readiness. Step up from allowance/light stakes to open G1 company is natural progression. Route record pristine (23% trainer ROI on routes). Pace setup (HOT tempo) creates ideal stalking platform for her second-call positioning style.

Regaled — Recent Keeneland form trending up. Second-place finishes on 06/27/2026 (G1 component) and 03/07/2026 (stakes) at home track suggest comfort and competitive edge at this venue. Trainer improvement cycle indicator: 14% win rate in 61-180 day window (64 starts), suggesting gradual form rebuilding. 8-1 overlay odds justify contrarian positioning if pace setup favors closers (HOT pace scenario does exactly this).

Bounce / Regression Risks

Counting Stars — Career-best effort last out (wire-to-wire 9f route 07/25/2026) followed by layoff to today. Third start off rest; two prior layoffs (02/06/2026 walked off in second turn, 10/24/2025 finished 5th of 6 in 6f race) show occasional bounce patterns. Trainer Casse is 13% in graded stakes (277 starts)—filly may lack experience handling G1 pressure. If Snowyte's early aggression forces her into slugfest pace duel rather than controlled wire-to-wire scenario, fatigue risk escalates significantly.

Snowyte — Back-to-back fade finishes at Saratoga (08/29/2026 10.35L weakened, 07/24/2026 5.25L tired) confirm regression pattern. May have peaked on 02/01/2026 (11.25L Gulfstream win). Current 11-start form shows only 2 wins with 5 failures to place—inconsistency severe. Will face maximum early pressure from Counting Stars today; regression to default fade pattern likely if pressured. Trainer Gargan's G1 record abysmal (8%, 0.53 ROI).

SECTION 6: SUGGESTED BETS

WIN BET: COUNTING STARS — Confidence 8/10 — Target odds: 2/1–5/2

Model projects 28% win probability—highest in the field. Wire-to-wire specialist with ELITE Sustained Speed Rating; only horse that maintains velocity gate-to-wire across proven 9f route efforts. Will set or contest pace with Snowyte; Counting Stars' superior closing speed (37.82 mph sustained closing vs. Snowyte's 35.86 mph) gives her the edge if pace stays HOT as projected. Trainer Casse 16% in dirt routes (1334 starts, 1.51 ROI) and Mark Casse combinations with this jockey (Ortiz I Jr.) have strong play records. Current morning line 5/2 implied 28.6% probability—essentially even money to model's edge. Slight value in the overlay.

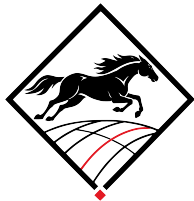

VALUE PLAY: REGALED — Confidence 7/10 — Target odds: 5/1–8/1

Model projects 24% win probability at 8/1 morning line odds (11.1% implied) = +12.9% edge. Exceptional overlay. Classic closer benefits directly from HOT pace scenario projected (Snowyte-Counting Stars duel produces mid-stretch fatigue). Home track advantage at Keeneland (1 win in 8 recent here). Recent form trends positive: two 2nd-place finishes in graded component races suggest competitive level. Jockey Gaffalione is 33% at Keeneland (2 of 6 this meet). Trip setup ideal—late run into tiring frontrunners is this horse's template.

LONGSHOT PLAY: None. No genuine overlay exists at 10/1 or longer. Snowyte at 15-1 carries significant fade risk based on recent performance data; insufficient edge to recommend.

Multi-Race Wagers — Top 3 for Pick 3 / Pick 4 / Pick 5 / Pick 6

- **A:** Counting Stars — 28%
- **B:** Regaled — 24%
- **C:** Fully Subscribed — 20%

Combined Projected Probability: 72%

SECTION 7: CONFIDENCE RATING

★★★★

The model's key projection is a HOT early pace duel between Snowyte and Counting Stars, driving velocity to :47² and :111². Counting Stars' ELITE Sustained Speed Rating (velocity maintained gate-to-wire) positions her to win the pace battle while preserving closing energy. The model flags Snowyte's VULNERABLE Sustained Speed Rating and confirmed fade pattern (decel% 7-15% range) as a critical weakness—if pressed early, she will capitulate. Fully Subscribed and Immersive gain tactical stalking advantage from the projected tempo. The primary value opportunity is Regaled at 8-1: she directly benefits from pace-induced fatigue in front runners, carries a +12.9% overlay edge, and shows home-track comfort at Keeneland. Public is underestimating the closer's profile in a race shaped for exactly her running style. Exploit the morning line's misplacement of Fully Subscribed (4-5 is 55.6% implied; model sees 20%) and capitalize on Regaled's overlay.
