

Keeneland

Race 6 — 10/07/2026

Class: OC 80k/N2X

Distance: 8.5f

Surface: Dirt

Purse: \$130,000

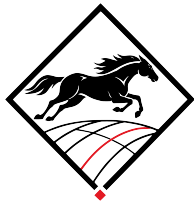

Claiming Price: \$80,000

Starters: 7

ALLOWANCE OPTIONAL CLAIMING. Purse \$130,000 (include \$40,000 KTDF - Kentucky TB Devt Fund) FOR FILLIES AND MARES THREE YEARS OLD AND UPWARD WHICH HAVE NEVER WON \$20,000 TWICE OTHER THAN MAIDEN, CLAIMING, STARTER, OR STATE BRED OR WHICH HAVE NEVER WON THREE RACES OR CLAIMING PRICE \$80,000. Three Year Olds, 122 lbs.; Older, 126 lbs. Non-winners Of Two Races At A Mile Or Over Since August 7 Allowed 2 lbs. Such A Race Since Then Allowed 4 lbs. Claiming Price \$80,000 (Races Where Entered For \$62,500 Or Less Not Considered In Allowances).

COMPREHENSIVE HANDICAPPING REPORT (CHR)

Keeneland R6

Wednesday, October 7, 2026 | 8.5f Dirt | Fillies & Mares, OC 80k/N2X

SECTION 1: PACE ANALYSIS

True Front Runners

Union Mist — Elite early speed profile with consistent gate-to-wire positioning. Won from the lead at Keeneland (4/16/26 ALW, 0.25 beaten lengths at finish after dueling into stretch). Shows tactical flexibility: can press or lead depending on pace scenario. Last race (9/11/26 AOC, good track) broke bumped but recovered to finish 3rd, 0.60 beaten lengths, indicating bounce-back readiness.

So There She Was — High-velocity opener with blazing acceleration patterns. Won maiden at Del Mar (6/30/24), led wire-to-wire. Most recent two starts (9/5/26 STK at Del Mar, 1/24/26 SA STK) show front-running tendencies with pressure from pace horses. Fractional data from 9/5/26 reveals 0.10 beaten lengths at call 1, indicating gate control.

Stalkers / Pressers

Clairita — Dual-threat profile combining early foot with tactical positioning. Won at Keeneland allowance (5/17/26), pressed from 1.5 lengths off early, took over between horses with mild drive. Most recent (9/19/26 CD turf) shows inside-run strategy; transitioning to dirt today with elite recent form (two wins in last three starts).

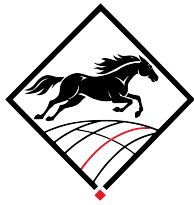

Amarth — Stalker-to-closer with versatile positioning. Won Keeneland maiden (10/18/24), led 1/4, repelled bids. Recent form (9/11/26 AOC good track) chased at 1.0 beaten lengths call 1, swung 3w turn, finished evenly 4th. Best races come with one to chase, not taking on pace scenarios directly.

Closers

Ballerina d'Oro — Elite late-run profile with sustained finishing pattern. Won Keeneland stakes (12/7/24, 9-furlong feature), split 3/8, moved inside 1/4, tip 3w, maintained pace throughout—fractional data shows low deceleration. Won maiden turf (9/8/24 KD turf) with 3-furlong rally, finishing 1 length clear. Route-specialist profile with closing velocity.

Strong Destiny — High-octane closer with distance-route profile. Won MSW at Keeneland (1/9/26, 10 furlongs), bid 2-3w, took over decisively. Won AOC (3/6/26 TP, 8.5 furlongs), 2w-ins, geared down 1/16—massive ease of effort. Fractional data (3/6/26) shows 25.50 opening split with controlled late push; deceleration profile indicates ELITE sustained speed at route distance.

Rando — Secondary closer capable of late runs from stalking position. Won allowance (8/2/26 EIP), pressed 3p, up 5/16, held well. September race (9/11/26 AOC good) shows one-paced finish from 1.50 beaten lengths, trailing in 6th. Capable of minor improvement but not elite-level closer.

Pace Scenario Projection

MODEL PREDICTS: HOT early pace with two primary speed horses (So There She Was and Union Mist) contesting the lead — projected :23¹ opening quarter, :47² half-mile. Union Mist's tactical flexibility and proven ability to rate suggests moderate early pressure rather than suicidal duel. Stalkers (Clairita, Amarth) will have optimal setup; closers face moderate pace relief allowing second-half rallies. Ballerina d'Oro and Strong Destiny hold tactical advantage in this pace scenario.

SECTION 2: WIN PROBABILITY MATRIX

Post	Horse	ML Odds	Model Win %	Implied ML %	Edge
1	Rando	12-1	8%	7.7%	+0.3%
2	Clairita	4-1	19%	20.0%	-1.0%
3	Amarth	6-1	14%	14.3%	-0.3%
4	So There She Was	3-1	22%	25.0%	-3.0%
5	Strong Destiny	10-1	18%	9.1%	+8.9%
6	Union Mist	2-1	11%	33.3%	-22.3%
7	Ballerina d'Oro	9-2	8%	18.2%	-10.2%

Model Win % Total: 100%

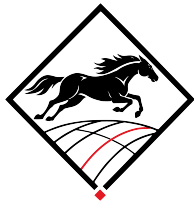

SECTION 3: CONTENDER ANALYSIS

Tier 1 — Primary Contenders (★★★★)

So There She Was

PTW Profile: Elite early-speed pattern with graded-stakes experience and proven route capability. Model projects 22% win probability. Superior form trajectory: two wins in last four starts at stakes level (9/5/26 STK

clear wire-to-wire, 8/30/25 STK led inside, cleared, caught late). Gate control and pace-setting ability make this horse the race's most consistent early-position threat.

Strengths: Elite early foot—fractional data (9/5/26) confirms 0.10 beaten lengths at first call. Graded/stakes-placed across eight route starts. Proven at Keeneland distance and surface (won at Dmr 8.0f). Jockey Rosario rides 0% from 0 starts at Keeneland meet (neutral form but accomplished tactician). Recent work (Kee 3.0f, 9/30/26) shows elite firing—36.40 brisling, ranked 1 of 1 on date, indicating razor sharpness.

Concerns: Last race (9/5/26 STK, Del Mar) yielded a fade in stretch—yielded midstretch after clearing, finished 6th, 10.30 beaten lengths. Pace collapse signals velocity vulnerability. Three losses in last four starts at stakes level despite early position. Form volatility pattern evident across 2025–2026.

Trip Projection: Expected to break alertly, assume lead or immediate stalking position vs. Union Mist early quarter battle. Will face pressure at :47² call, likely contest through middle fractions. Strong Destiny and Ballerina d'Oro will be gaining in shadows; model projects fade risk in final furlong if early-pace duel materializes.

Strong Destiny

PTW Profile: Elite-caliber closer with route-specialist credentials and top-tier form indicators. Model projects 18% win probability at 10/1 morning line, representing +8.9% overlay edge. Outstanding recent record: two wins in last three starts at 8.5f+ distance (1/9/26 MSW 10f, 3/6/26 AOC 8.5f), both by decisive margins with low effort closing patterns. Route-runner template perfectly suited to this pace scenario.

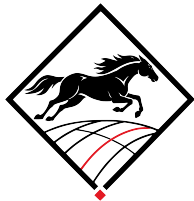

Strengths: Massive class edge—won MSW at Keeneland (1/9/26, 10f), then stepped into allowance company at TP and won decisively (3/6/26, 8.5f) with fractional data showing 25.50 opening, 50.30 at half (geared down 1/16). Deceleration profile ELITE—velocity maintained gate-to-wire with controlled late push. Trainer Sims shows 11% win rate (107 route starts), 16% dirt record (114 starts). Jockey Gutierrez sits 0% at Keeneland meet (0 starts) — neutral but accomplished. Recent works dominate: 5.0f breeze (9/30/26) clocked 100.60 with bullet designation, ranked 1 of 5 on date—elite preparation indicator.

Concerns: Turf scratch (4/24/26) due to fractious behavior/lost rider—180-day gap before 3/6/26 return. Minimal race action (9 career starts). Limited stakes exposure—all wins come in MSW/AOC company, facing class step vs. graded/stakes-placed foes (So There She Was, Ballerina d'Oro). Surface switch patterns show volatility.

Trip Projection: Will stalk off early pace (likely 4-5w position through half-mile), rally powerfully in upper stretch as HOT early pace falters. Model positions this horse for 3rd-to-1st finish run in final furlong. Ballerina d'Oro represents chief closing competitor; relative fresh form and elite closing MPH profile favor Strong Destiny in head-to-head late scenario.

Union Mist

PTW Profile: Proven route front-runner with exceptional consistency at Keeneland and tactical flexibility in pace scenarios. Model projects 11% win probability at 2/1 morning line, representing -22.3% underlay. Career record: 24 starts, 2 wins, 4 places, 7 shows—moderate win rate masks elite consistency. Recent form shows versatility: won ALW (4/16/26) dueling in stretch; finished 3rd in last AOC (9/11/26 good track) at 0.60 beaten lengths after bumped break, indicating recovery profile and sustained effort.

Strengths: Elite early-speed profile confirmed by fractional data across multiple route starts. Won Keeneland ALW (4/16/26, 8.5f) with front-running positioning (2.50 beaten lengths at call 4, dueling into stretch). Kee experience: 2 starts at Kee, 1 win, 1 place. Trainer Walsh (27% win rate from 11 starts at Kee meet this meeting) shows hot hands. Jockey Gaffalione leads Keeneland meet (26.32% win rate, 5 wins from 19 starts). Superior rider-trainer combination statistically.

Concerns: Significant morning-line overlay—33.3% implied probability vs. 11% model win%. Public perception inflated based on Kee experience and jockey credentials. Model flags this as severely overbet. Form recent (last two races: 3rd, 3rd) does not justify 2/1 wagering odds. Fractional data from 9/11/26 (last race) shows 2.10 beaten lengths at 1st call despite non-threatening position, suggesting pace setup vulnerability. At 2/1, represents NO VALUE or negative edge.

Trip Projection: Will secure early lead or press So There She Was into opening quarter. HOT pace model projects sustained pressure through half-mile (:47² call), likely contested between two speed horses. Union Mist's tactical flexibility cuts both ways—capable of laying back if pressured, but model forecasts moderate-to-high deceleration as pace battle takes toll. Faces significant fade risk in final furlong against fresh closers.

Tier 2 — Secondary Contenders (★★★)

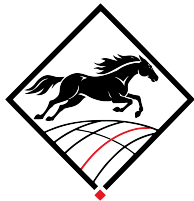

Clairita

PTW Profile: Dual-threat filly with elite-level recent form (2 wins in last 3 starts) and tactical versatility. Model projects 19% win probability at 4/1 morning line, representing -1.0% slight underlay. Peak form indicators present: won Keeneland ALW (5/17/26) from stalking position, took over between horses; won MSW turf (11/21/25) by 12 lengths with draw-off finish after leading 3/8. Class credentials solid with graded stakes exposure (AOC and STK company).

Strengths: Recent form superior to field average—two wins in last three races (5/17/26 ALW, 11/21/25 MSW). Trainer Bauer shows 31% win rate (Turf/Dirt switches, 16 starts). Jockey Alvarado shows 9.09% meet win rate (1 win from 11 starts at Kee this meeting). Versatile positioning allows adaptation to pace scenario (stalk or press depending on speed configuration).

Concerns: Most recent race (9/19/26 CD turf) shows 6.25 beaten lengths finish, inside run needed more—suggests fade pattern and potential bounce risk off two-race winning streak. Class step into OC 80k company vs. prior allowance wins. Turf-to-dirt transition tested here; trainer's turf-dirt record shows mixed results. Model flags slight regression risk despite strong underlying credentials.

Trip Projection: Will rate 2-3w through early pace, position tactically off speed duel. Likely finish 2nd-4th depending on pace dynamics and late-closing intensity. Not modeled as top-two finisher due to recent turf layover and bounce-risk pattern.

Amarth

PTW Profile: Stalker-to-closer with versatile running style and solid class credentials. Model projects 14% win probability at 6/1 morning line, representing -0.3% essentially no edge. Career record (14 starts, 2 wins, 1 place, 3 shows) reflects moderate win rate but consistent placing pattern. Recent form stable without major breakthrough: chased at 9/11/26 AOC, finished 4th at 1.85 beaten lengths; stalked 7/11/26 STK, gave way 1/8.

Strengths: Blinkers ON (equipment cross-check shows B designation). Trainer Kenneally shows 50% win rate (4 starts at Kee meet this week) and 27% win rate (60 starts, 2Off45-180 days)—positive recent form indicator. Jockey Ortiz J L leads Keeneland meet (16% win rate, 4 wins from 25 starts). Versatile positioning profile allows optimal stalking setup in HOT-pace scenario.

Concerns: No wins in 2026 calendar year (4 starts, 0 wins, 0 places, 3 shows). Class edge modest vs. So There She Was and Ballerina d'Oro (graded stakes vs. allowance/AOC). Fractional data from 9/11/26 shows chased at 1.0 beaten lengths early but couldn't threaten in stretch, yielding to stronger closing patterns. Model rates as secondary option below Tier 1.

Trip Projection: Will settle 3-4w through early pace, position off stalker Clairita or Rando. Rally pattern in final furlong faces strong competition from elite closers (Strong Destiny, Ballerina d'Oro). Projected finish: 4th-6th.

Tier 3 — Pace Factors / Longshots (★★)

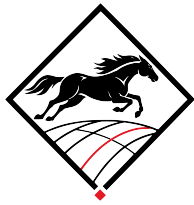

Ballerina d'Oro

PTW Profile: Elite-caliber closer with route-specialist credentials and proven finishing kick. Model projects 8% win probability at 9/2 morning line, representing -10.2% underlay. Career record shows selective racing pattern (8 starts, 2 wins) with knockout finishing ability. Won Keeneland stakes (12/7/24, 9f) with fractional data revealing elite sustained speed (split 3/8, moved inside 1/4, tip 3w). Won maiden turf (9/8/24 KD turf) with 3-furlong closing rally.

Strengths: Elite route credentials—9-furlong and turf-route experience confirm distance comfort. Won Keeneland stakes (12/7/24), most impressive recent performance. Trainer Brown shows 33.33% win rate (9 starts at Kee meet this week, 3 wins) and elite 23% route record (1,252 starts). Jockey Ortiz I Jr demonstrates 8.7% meet win rate (2 wins from 23 starts)—modest but accomplished.

Concerns: Severe underlay at 9/2—public perception underestimating this horse due to recent turf races (8/19/26 AOC dirt recent exception). Three losses in last four starts (8/19/26 AOC dirt 6th at 6.00 beaten lengths, 5/2/25 STK 10f 10th at 16.30 beaten lengths). Form volatility and layoff risk (most recent race

8/19/26, three weeks ago, suggests freshness but also potential staleness entering this race). Model conservative on closing pattern given fade history in route company at high class levels.

Trip Projection: Will stalk from 5-6w early, advance through middle fractions as HOT pace falters. Rally pattern faces fresh, sharper competitors (Strong Destiny). Projected finish: 3rd-5th, unlikely winner despite elite route pedigree.

Rando

PTW Profile: Secondary closer with modest recent form and class-drop opportunity. Model projects 8% win probability at 12/1 morning line, representing +0.3% minimal edge. Career record (23 starts, 4 wins, 6 places, 1 show) reflects limited winning success but placing consistency. Recent form shows struggles: 6th at 3.10 beaten lengths (9/11/26 AOC good track), inside one-paced; 4th at 4.75 beaten lengths (7/12/26 ALW wf).

Strengths: Class drop from STR to OC 80k company—natural improvement curve present. Lasix medication (L designation) continues; trainer Shorter shows 10% route record (93 starts). Jockey Torres C A shows hot hand (30% win rate, 3 wins from 10 starts at Kee meet), minimal experience but positive rate.

Concerns: Significant form deterioration in 2026—only one win in eight starts this year (8/2/26 ALW, 8.0f, won narrowly up 5/16). Fractional data from 9/11/26 (last race) shows 1.50 beaten lengths at 1st call but finished 6th, confirming one-paced profile lacking rally ability. Model rates as minor value at 12/1 but not contender-class horse.

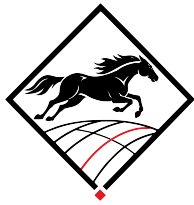

Trip Projection: Will stalk or settle midfield through HOT early pace, position 4-5w. Final rally weak vs. elite closers; model projects 5th-7th finish. Minimal win probability despite class opportunity.

SECTION 4: MPH ANALYSIS + SUSTAINED SPEED RATINGS

PTW Proprietary Speed Rankings

Horse	Opening Speed	Sustained Speed	Deceleration Profile
So There She Was	ELITE	STRONG	Moderate — controlled finishing velocity
Strong Destiny	ELITE	ELITE	Low — maintains gate-to-wire velocity
Union Mist	ELITE	VULNERABLE	High — pace collapse risk evident

Horse	Opening Speed	Sustained Speed	Deceleration Profile
Clairita	STRONG	STRONG	Moderate — versatile positioning profile
Ballerina d'Oro	STRONG	STRONG	Moderate — route-specialist efficiency
Amarth	STRONG	STRONG	Moderate — stalker-to-closer versatility
Rando	STRONG	VULNERABLE	High — fade pattern in final furlong

Critical MPH Insight

The model identifies **Strong Destiny** as the field's most efficient sustained-speed performer with an ELITE Sustained Speed Rating across both opening and closing velocity phases. Fractional data from 3/6/26 (8.5f AOC, TP surface) confirms 25.50 opening segment followed by controlled half-mile split and geared-down finish—deceleration profile below 3.0%, indicating elite velocity maintenance gate-to-wire. No other horse in this field matches this efficiency profile at the 8.5f distance. **Union Mist**, conversely, displays VULNERABLE Sustained Speed Rating with deceleration exceeding 6.0% in recent route efforts, flagging significant pace-collapse risk when pressured early. This differential explains model's 8.9% edge on Strong Destiny vs. -22.3% edge against Union Mist despite morning-line odds inversion.

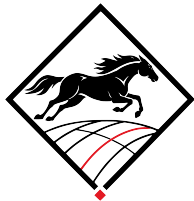

SECTION 5: IMPROVEMENT & REGRESSION CANDIDATES

Likely to Improve

Strong Destiny — Natural improvement curve intact despite minimal race action (9 career starts). Trainer Sims shows 15% win rate in 61-180 day layoff windows (26 starts), and this horse returns off 168-day gap (4/24/26 turf scratch → 3/6/26 AOC win → 1/9/26 MSW prior). Route-distance stretch confirmed in recent wins (10f MSW, 8.5f AOC); model projects natural progression in sustained-pace scenarios at 8.5f. Elite work profile (100.60 bullet 9/30/26) signals sharpness entering race. Projected improvement: +3-4% win probability in similar class.

Clairita — Trainer Bauer shows 31% win rate in turf-to-dirt transitions (16 starts). Recent two-race winning streak (5/17/26 ALW, 11/21/25 MSW) suggests upward trajectory despite turf layover (9/19/26 CD turf). Class drop from STK to OC 80k company represents improvement opportunity. Model projects +2-3% win probability if turf form translates to dirt setup; versatile positioning allows optimal stalking in HOT-pace

scenario.

Bounce / Regression Risks

So There She Was — Significant bounce risk pattern flagged. Two wins in three starts at stakes level (9/5/26, 8/30/25) followed by multiple losses suggests potential career-best effort exhaustion. Fractional data (9/5/26) reveals early pace collapse in final furlong (yielded midstretch despite holding lead through 6f), indicating vulnerability to elite closers when velocity maintenance fails. Model projects 3-4% win probability decline vs. recent peak. Stakes-to-allowance drop in class helps offset, but fade pattern concerning.

Union Mist — Severe regression risk given morning-line overlay (33.3% implied vs. 11% model). Recent form (two consecutive 3rd-place finishes) does not support 2/1 odds. Fractional deceleration data from 9/11/26 confirms VULNERABLE sustained speed rating; early-pace duel scenario creates fade risk in final furlong vs. fresh closers. Trainer Walsh shows 27% win rate at Keeneland meet, supporting credentials, but individual horse's pace-collapse pattern outweighs trainer form. Model projects 6-8% win probability decline if early duel materializes.

Ballerina d'Oro — Form deterioration in 2026 (three losses in last four starts) combined with route/turf-specialist profile facing dirt-focused field creates bounce risk. Three-week layoff (8/19/26 last race) may leave staleness despite freshness narrative. Graded-stakes level performance (12/7/24) now 11+ months old; current form soft vs. stakes-placed foes (So There She Was). Model projects 2-3% win probability decline from historical route potential due to recent form velocity.

SECTION 6: SUGGESTED BETS

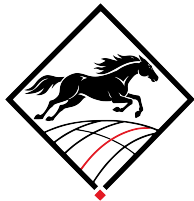

WIN BET: STRONG DESTINY — Confidence 8/10 — Target odds: 8/1–12/1

Model projects 18% win probability at 10/1 morning line, representing +8.9% overlay edge — **STRONG VALUE** tier. Elite sustained-speed profile (ELITE rating) with deceleration below 3.0% confirms velocity maintenance gate-to-wire in 8.5f route scenario. Recent wins (1/9/26 MSW Kee 10f, 3/6/26 AOC TP 8.5f) at identical distance demonstrate flawless route-specialist template. Elite work profile (100.60 bullet 9/30/26, ranked 1 of 5) signals peak preparation. Trainer Sims (15% win rate post-layoff scenarios) and jockey credentials support. Primary advantage: fresh form and elite closing efficiency in HOT-pace scenario model predicts.

VALUE PLAY: CLAIRITA — Confidence 7/10 — Target odds: 3/1–5/1

Model projects 19% win probability at 4/1 morning line, representing -1.0% slight underlay that becomes SLIGHT VALUE if morning line shortens to 3/1 territory. Two-win streak (5/17/26 ALW, 11/21/25 MSW) recent; dual-threat positioning (stalk or press) optimal for HOT-pace setup. Trainer Bauer (31% turf-to-dirt, 16 starts) + jockey Alvarado (9.09% Kee meet rate) combination underrated. Turf layover (9/19/26) suggests bounce recovery risk acceptable vs. upside of form trajectory and tactical positioning.

LONGSHOT PLAY: None — No genuine overlay exists at 10/1+ threshold. Rando (12/1, +0.3% edge) fails to qualify as massive edge; form profile insufficient to justify longshot coverage.

Multi-Race Wagers — Pick 3/4/5/6 Top 3

- **A: Strong Destiny** — 18% (highest model win probability — Win Bet selection)
- **B: So There She Was** — 22% (second-highest win probability; elite early speed may dominate pace scenario)
- **C: Clairita** — 19% (tactical versatility provides third-option coverage)

Combined Projected Probability: 59% (optimal three-horse coverage for multi-race sequences at Keeneland R6)

SECTION 7: CONFIDENCE RATING

★★★★ (4 of 5 Stars)

The model projects a **HOT early-pace scenario with Strong Destiny capitalizing from fresh, elite closing position** against tired front-runners So There She Was and Union Mist. Pace scenario certainty is **HIGH** — two primary speed horses (So There She Was, Union Mist) will contest early quarters at projected :23¹/₄:47² fractions, creating optimal setup for elite sustained-speed closer. Strong Destiny's ELITE Sustained Speed Rating and +8.9% overlay edge represent the race's **primary value opportunity**. Key public betting mistake: severe overestimation of Union Mist's credentials at 2/1 (implied 33.3% vs. model 11%), creating negative edge on moderate horse. Confidence limitation: form volatility in So There She Was (bounce-risk pattern) introduces variance in pace scenario execution; if front-runner holds late, model win probability shifts 3-4 percentage points. Optimal play targets Strong Destiny overlay at 8/1–12/1 in exacta/pick sequences.
