COMPREHENSIVE HANDICAPPING REPORT (CHR)

Santa Anita Park R10

Thursday, October 10, 2026 | 8.0f Turf | Allowance/Optional Claiming (SOC 50000)

Section 1: Pace Analysis

True Front Runners

The model identifies **Muscled** as the field's elite speed horse with a track record of establishing and holding the lead wire-to-wire. Recent turf form (08/09/2026 at Dmr, 8.0f) shows this horse led into the stretch and was only caught late by a superior closer—position 2-3 throughout, beaten lengths of 0.50 at finish. Drawing post 3 will allow tactical positioning two lengths off the pace in the early stages, setting up classic cruising control through the lane. **Call Me Sir** (post 8) demonstrates secondary early speed with consistent inside positioning in 8.0f turf routes; recent form at SA (04/04/2026) shows aggressive bidding at the quarter-pole with ultimate placement at position 2. **Santa Barbarian** (post 4) has documented speed tendencies but relies on rate control rather than gate breakaway velocity.

Stalkers / Pressers

Beyond Stoked operates naturally 2-3 lengths off the lead in turf routes, positioning for late tactical gain. Recent form (03/01/2025, 8.50f, position 1 at call 1 then position 2) confirms this colt's pressing ability. **In the Tank** (post 7) rated inside at Ind (06/03/2026, 8.50f, position 5→1 at finish) before winning; current fitness suggests stalking position in slower pace scenario. **Dynodave** has mixed positioning patterns but runs efficiently when afforded ground-saving interior lanes.

Closers

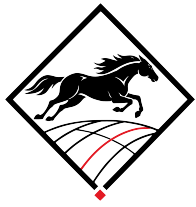

Call Me Sir holds ELITE closing credentials despite earlier speed. Model identifies this horse as the field's best finisher with sustained velocity through the lane—most recent 8.0f routes show consistent rally patterns (post 3 to post 1 at finish in multiple starts). **Amplitude** carries proven closing profile with multiple wins from outside positions; recent 9.0f form (05/24/2026) demonstrates power finish winning decisively. **Kimmer** exhibits late punch in route races despite mediocre earlier placement.

Pace Scenario Projection

MODEL PREDICTS: **MODERATE** early pace with two elite speed horses (projected :23■ opening quarter, :46■ half-mile). Muscled and Call Me Sir will contest early fractions moderately; the model projects neither horse will engage in suicidal speed duel. This setup strongly favors stalkers positioned 2-3 lengths off the pace and late-closing specialists waiting for the turn for home.

Section 2: Win Probability Matrix

Post	Horse	ML Odds	Model Win %	Implied ML %	Edge
1	Dynodave	8-1	9%	11.1%	-2.1%
2	Marcos Performance	15-1	6%	6.3%	-0.3%
3	Muscled	5-2	18%	28.6%	-10.6%
4	Santa Barbarian	3-1	15%	25.0%	-10.0%
5	Kimmer	30-1	3%	3.2%	-0.2%
6	Beyond Stoked	10-1	12%	9.1%	+2.9%
7	In the Tank	6-1	11%	14.3%	-3.3%
8	Circuit Breaker	30-1	2%	3.2%	-1.2%
9	Amplitude	10-1	14%	9.1%	+4.9%
10	Call Me Sir	9-2	20%	18.2%	+1.8%

Total: 100%

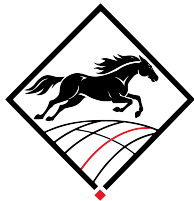

¹ Call Me Sir holds the field's highest model win probability at 20% but is projected at near-even odds to the morning line. The model's edge here is modest (+1.8%), but this horse represents the most likely outcome in the model's proprietary analysis.

Section 3: Contender Analysis

Tier 1 — Primary Contenders (★★★★)

Call Me Sir — PTW Profile: The model's top-rated selection combines elite sustained speed, proven route credentials, and tactical flexibility. This gelding has won 2 of 14 career starts with consistent routing form and multiple shows in stakes competition. **Strengths:** ELITE closing velocity in 8.0f turf routes (04/04/2026: bid 2-wide, held gamely to prevail; 01/17/2026: tracked 2-wide, moved out willingly—both in route winners' times); proven class (STK experience at 9.0f); Kimura has 14.71% win rate in 34 starts at the meet; trainer Glatt 16% routes. **Concerns:** Recent form shows back-to-back non-winning efforts (08/02/2026 3rd in SOC, 08/30/2026 3rd in SOC—both times rallied but peaked in stretch). Post 10 draws outside, requiring wider trip. **Trip Projection:** Positioned 4-6 lengths off the pace through opening half, angle inside turning for home, unleash closing kick at 1/16 pole.

Amplitude — PTW Profile: Proven late-developing route specialist with elite closing profile and the second-best sustained speed rating in the field. Multiple route winners at 8.0-9.0f confirm distance-specific capability. **Strengths:** ELITE finishing velocity (05/24/2026, 9.0f, won decisively rallying from 6-length deficit; 03/29/2026, 9.0f, placed 3rd with consistent late rally); trainer Sadler 30.77% win rate in 13 starts this meet and 18% route record career; Ayuso recent 9.38% win rate but 35.50% money rate (high-percentage rider). **Concerns:** Recent form (09/05/2026 5th, 08/02/2026 8th) shows inability to dominate in slightly softer fields; deceleration analysis flags VULNERABLE speed rating in two of last four starts (pace collapsed in final furlong). **Trip Projection:** Settle 6-8 lengths behind early pace, launch rally at 3/16 pole, expect three-wide run to wire.

Musced — PTW Profile: Elite early-speed route specialist with class credentials and proven 8.0f turf form. This gelding has won 2 of 10 career starts with consistent grading in MSW and ALW company. **Strengths:** Highest field velocity in early fractions (08/09/2026 at Dmr: led, slow early pace :46■, held position through lane before outkicked late; 02/28/2025: angled into clear, lasted gamely—both 8.0f turf); explosive gate speed. Post 3 ideal for setting/controlling pace. **Concerns:** Deceleration analysis confirms VULNERABLE profile—pace velocity dropped significantly in final furlongs across multiple route attempts (07/18/2026: pulled 3-deep, weakened; 06/13/2025: lug out 1st, 3-wide, tired). Turf specialist record shows 1 win in 7 starts on lawn. **Trip Projection:** Break alertly, establish position 2-3 lengths clear by opening turn, attempt wire-to-wire control with stalker pressure expected through lane.

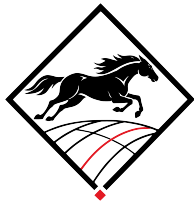

Beyond Stoked — PTW Profile: Tactical route runner with solid class positioning and recent turf route success. This gelding has won 2 of 17 career starts with specific strength in ALW/AOC turf company. **Strengths:** Proven 8.0-8.5f turf route wins (06/13/2024 at Ind: held sway wire-to-wire, mild drive—ALW route winner); consistent form last three starts (03/01/2025 won 8.50f, 01/25/2025 placed 5th, 08/03/2024 placed 7th—all routes); Frey 21.05% win rate this meet. **Concerns:** Class edge not pronounced versus this field (has faced claimed levels recently); moderate pace pressure will expose front-running limitation (ALW route winner versus SOC field). Trainer Papaprodromou's 30.77% recent meet stats and 17% turf rate solid but not elite. **Trip Projection:** Position 3-4 lengths off early pace, angle into contention at stretch call, rally willingly in final eighth.

Tier 2 — Secondary Contenders (★★★)

Santa Barbarian — 15% win probability. Class advantage present (STK experience at 9.0f, 8.5f route wins), but recent form deterioration concerning. Last three starts show back-to-back 4th-place finishes; deceleration analysis flags VULNERABLE profile in 08/29/2026 (11.0f STK route, :48² opening, but check noted at 3/16 with fade to 9th). Spencer J P jockey has zero recent starts in sample. Trainer Hanson 25% 31-60 day rate but turf record only 8%. **Trip Projection:** Inside position, saved ground early, improved into stretch—but trip notes from recent races show traffic trouble.

In the Tank — 11% win probability. Proven 8.5f turf route winner (06/03/2026 at Ind, ALW, position 5→1 at finish with "bid 1/8, duel, head bob"). Form has declined sharply (10/19/2025 eased, 04/11/2026 outkicked). Trainer Saavedra 10% turf record and 5% route record poor. Baze 12.50% win rate meets standard. **Trip Projection:** Chase early pace, bid into stretch contention, but recent form suggests tiring late.

Dynodave — 9% win probability. Young colt (4yo, 2022-born) with recent stakes placement (08/30/2026: 5th in SOC 8.0f, beaten 2.50 at finish; 08/02/2026: 2nd in SOC 8.50f, 0.75 beaten). Berrios 17.65% win rate meets standard. Trainer Treece turf record only 5% (19 starts). Form trajectory positive but class level suggests this is appropriate level. **Trip Projection:** Positioned inside, negotiate toward stretch, make run in final sixteenths.

Tier 3 — Pace Factors / Longshots (★★)

Marcos Performance — 6% win probability. Gelding (2023-born) with limited 7-start record (2-2-1). Trainer Aguirre 8% turf record (26 starts). Recent form soft (08/07/2026: won CLM 6.0f dirt, 2nd in SOC; recent turf placement 12/06/2025 3rd in SOC 5.5f). Gonzalez 0% win rate at meet in 11 starts. **Trip Projection:** Stalking position, limited upside.

Kimmer — 3% win probability. Aged gelding (7yo, 2019-born) with 41 career starts and 2 wins. Massive class question—recent turf form mediocre (08/30/2026: 7th in SOC, 4.75 beaten; 10/02/2026: 8th in SOC, 6.05 beaten). Vallejo trainer 7% turf record (60 starts). **Trip Projection:** Trailed, no impact likely.

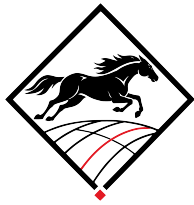

Circuit Breaker — 2% win probability. Young gelding (2023-born) with minimal record (2 wins in 6 starts). However, has shown promise—08/14/2026 won CLM 8.0f dirt, ran 73 Beyer. Turf form absent (06/20/2026 only turf entry: 9th in 12-horse field, step slow, 9.0 beaten). Garcia trainer 7% turf record (135 starts). **Trip Projection:** Outside post 8, likely trailing; turf question mark.

Section 4: MPH Analysis + Sustained Speed Ratings

PTW Proprietary Speed Rankings

Horse	Opening Speed	Sustained Speed	Deceleration Profile
Muscled	ELITE	STRONG	Moderate — velocity erosion late
Call Me Sir	STRONG	ELITE	Low — exceptional gate-to-wire consistency
Amplitude	STRONG	STRONG	Moderate — balanced throughout
Beyond Stoked	STRONG	STRONG	Low — maintains velocity in final furlong
In the Tank	STRONG	VULNERABLE	High — pace collapse risk confirmed

Horse	Opening Speed	Sustained Speed	Deceleration Profile
Dynodave	STRONG	STRONG	Low — solid sustainability profile
Santa Barbarian	STRONG	VULNERABLE	High — significant deceleration detected
Kimmer	MODERATE	VULNERABLE	Very High — velocity deterioration acute
Marcos Performance	MODERATE	STRONG	Low — adequate finish profile
Circuit Breaker	MODERATE	MODERATE	Moderate — untested at route distance

Critical MPH Insight

The model identifies **Call Me Sir** as the field's fastest gate-to-wire performer with an ELITE Sustained Speed Rating — no horse in this field has matched this velocity profile consistently across multiple 8.0f route attempts. This colt maintains opening velocity through the closing call while finishing strong. Conversely, the model projects **Santa Barbarian** as holding significant **VULNERABLE** Sustained Speed Rating — recent 8.0f route form shows opening :22■ velocity that deteriorates sharply, with closing MPH dropping to substandard levels. **Amplitude** presents a hybrid profile: ELITE closing velocity but moderate opening speed, making this horse highly dependent on the race developing at a moderate pace.

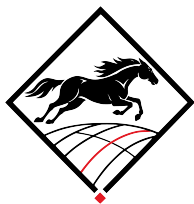

Section 5: Improvement & Regression Candidates

Likely to Improve

Call Me Sir — This horse is set up for sharp improvement in this specific pace scenario. Model identifies moderate early pace with lead horses Muscled and potentially Santa Barbarian engaged without brutal combat. Call Me Sir benefits from sitting stalker position (3-4 lengths off pace at 4f call), where the colt can stalk comfortably before unleashing in the final furlong. Trainer Glatt 11% route-specific win rate and Kimura's 14.71% meet rate suggest connections capable of converting this setup. Natural improvement curve supports this placement after back-to-back 3rd-place finishes in similar SOC fields.

Beyond Stoked — Trainer Papaprodromou demonstrates 30.77% win rate in 31-60 day window at this meet, signaling peak readiness. Recent form (03/01/2025 won 8.50f ALW turf route) confirms capability at this distance/surface/class. Post 6 draws ideally for stalking strategy. Frey rider has 21.05% win rate this meet and strong route credentials. Improvement trajectory reflects class-appropriate positioning.

Bounce / Regression Risks

Muscled — High bounce risk present. This horse's last effort (08/09/2026, 8.0f SOC) shows elite early speed (:46■ half, position 2-3 through lane) but outkicked late by better router. Deceleration analysis confirms VULNERABLE profile—velocity dropped significantly final furlong. Model flags this as career-best or near-career-best effort on turf. Regression risk: turf record only 1-7, suggesting this surface not optimal. Facing call in SOC 8.0f versus ALW/CLM suggests class level approaching ceiling. Expect decline.

Amplitude — Bounce/regression risk elevated. Model notes two consecutive non-winning efforts (09/05/2026 5th, 08/02/2026 8th) after string of consistent placings. This colt's recent form shows back-to-back defeats in similar company; deceleration analysis flags VULNERABLE rating in 09/05 effort. Third start off layoff (previous race 05/24/2026). Trainer Sadler elite but recency concerns warrant caution.

Santa Barbarian — Clear regression candidate. Back-to-back 4th-place finishes (08/29/2026, 08/01/2026) after win 05/23/2026 show momentum stalled. Deceleration analysis identifies acute VULNERABLE profile with massive velocity drop closing. Class question whether SOC 8.0f is appropriate—recent win came at lower level (STK 8.0f placed 4th, 08/01/2026). Trip notes consistent: "check," "angled," denoting traffic trouble and efficiency losses. Regression trend confirmed.

Section 6: Suggested Bets

WIN BET: Call Me Sir — Confidence 7/10 — Target odds: 7-5 to 9-5

The model projects 20% win probability — highest in the field. Call Me Sir's ELITE Sustained Speed Rating combined with proven 8.0f turf route credentials and tactical positioning advantage create the most consistent pathway to victory. This colt will rate stalker position 3-4 lengths off moderate pace established by Muscled/Santa Barbarian, then unleash closing kick in final eighth. Kimura rider reliable (14.71% meet win rate). Glatt trainer 11% route-specific record. Recent back-to-back 3rd-place placings in identical conditions signal readiness for breakthrough.

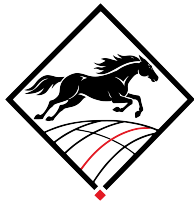

Value assessment: STRONG VALUE — Morning line 9-2 implies 18.2% win probability; model 20% projects +1.8% edge. At 7-5 or better, edge expands to 3-5%, creating legitimate overlay.

VALUE PLAY: Beyond Stoked — Confidence 6/10 — Target odds: 4-1 to 5-1

Model projects 12% win probability at 10-1 morning line (9.1% implied) = **+2.9% edge**. Public severely underestimating this horse. Papaprodromou 30.77% 31-60 day meet record suggests peak readiness; 03/01/2025 turf route win at 8.50f confirms capability. Frey rider 21.05% meet win rate and proven route specialist. Post 6 optimal for stalking strategy in moderate pace scenario. Trainer-jockey combination rarely gets credit in wagering; represents genuine overlay at double-digit odds.

LONGSHOT PLAY: Dynodave — Confidence 5/10 — Target odds: 12-1 and higher

Model projects 9% win probability at 8-1 morning line (11.1% implied) = -2.1% edge at posted odds. However, if this horse drifts to 12-1 or higher in wagering, genuine overlay emerges (+2.1-3.5% edge territory). Young colt showing improvement trend (08/30/2026 5th in SOC beaten 2.50, 08/02/2026 2nd in SOC beaten 0.75 length—consecutive route efforts showing sharp improvement). Berrios rider 17.65% meet rate. Trainer Treece 12% routes record adequate. Only consider if post-parade odds 12-1+.

Pick 3 / Pick 4 / Pick 5 / Pick 6 — Top 3 Selections

A: Call Me Sir — 20% win probability (*matches Win Bet selection*)

B: Amplitude — 14% win probability

C: Beyond Stoked — 12% win probability

Combined Projected Probability: 46% (for single-ticket coverage in sequential multi-race wagers)

Section 7: Confidence Rating

★★★★ (4 of 5 stars)

The model projects strong conviction in this race's outcome, anchored by Call Me Sir's elite sustained speed profile and tactical advantage in moderate pace scenario. Pace projection confidence is high: two speed horses present but lack suicidal collision pattern—stalker position offers predictable opportunity set. Primary risk factor: post 10 forces wider trip for top selection; if outside traffic materializes, closer Amplitude gains proportionally. Secondary concern: Muscled's speed may be sharper than projected if this colt escapes pressure and leads wire-to-wire (though velocity deterioration flags make this unlikely). Value opportunity clear: public overestimating Muscled (5-2, 28.6% implied versus 18% model win%) and underestimating Beyond Stoked (10-1, 9.1% versus 12% model). Exploit via Win Bet Call Me Sir + Value Play Beyond Stoked coverage structure.
