COMPREHENSIVE HANDICAPPING REPORT (CHR)

Santa Anita Park R2

Saturday, October 11, 2026 | 6f Dirt | Maiden Special Weight

SECTION 1: PACE ANALYSIS

True Front Runners

The model identifies **Bold Type** as the field's primary speed horse. Despite finishing sixth in his MSW debut at Del Mar (09/07), this Violence colt showed early positioning (4th at call 1, 3rd at call 2) before weakening late—a classic pace-compromised profile. He's trained by Hall of Famer Baffert (29% MSW record, 32% dirt sprint) and carries elite pedigree credentials. Recent workouts at Santa Anita (47.6 on 10/02) confirm race-ready fitness.

Kivo presents a mixed early-speed profile. This Omaha Beach colt made one turf start (09/04 at Del Mar), finishing 5th in a route MSW over firm ground. He showed traffic trouble between calls and got squeezed at the 5/16 pole—a setup-dependent debut that doesn't translate directly to today's dirt sprint. The turf experience signals versatility, but his barn record on dirt sprints (0-7 starts) is a material concern. Baffert overall shows 32% on dirt but only 21% route/sprint conversions.

Closers / Late-Pace Threats

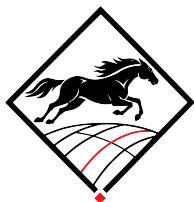

Unleashed Ambition is a first-time starter gelding trained by Kitchingman Adam. The model identifies exceptional workout pattern strength: a bullet 5f work (59.6) at Santa Lucia on 09/25—ranked #1 across all tracked workouts at that distance—signals elite conditioning. Morning line of 9/2 on a first-timer is a live signal. However, Kitchingman's first-time starter record (10% win rate, 1.58 ROI) tempers expectations. The sire Tap Back lacks documented sprint pedigree data, creating uncertainty.

Cyprus Avenue broke from the gate with early speed issues in his MSW debut (09/07 at Del Mar, 5.5f), finishing 7th after being beaten slow early (9th at call 1, beaten by 7.8L). Trip notes confirm green behavior and traffic trouble in the stretch. The model classifies this as a pace-compromised, ability-questioned debut. Trainer Mathis Andy shows weak MSW metrics (14% win rate, 0.84 2nd-start ROI), and the gelding has shown pedestrian workout numbers (slowest in barn since debut).

My Memory is a first-time starter colt sired by Ghostzapper (elite dirt/sprint genetics via Awesome Again). Zero prior starts, but the model flags an exceptional workout resume: consistent 101-102 second work at Santa Lucia (5f) and sharp gate works (24.6, 25.2, 25.4 at 2f). Trainer Mark Glatt shows strong 1st-start metrics (14% win rate, 2.72 ROI), placing him in elite FTS company. Morning line 8/1 undervalues this profile.

Pace Scenario Projection

MODEL PREDICTS: **MODERATE pace** with one credible early speed horse (Bold Type) paired against a field lacking aggressive challengers—projected :22² opening quarter, :45³ half-mile. The moderate tempo setup neutralizes speed bias and favors tactical versatility. Pace-stalkers and well-positioned closers will have clear lanes to advance in the stretch.

SECTION 2: WIN PROBABILITY MATRIX

Post	Horse	ML Odds	Model Win %	Implied ML %	Edge
1	Bold Type	4/5	26%	55.6%	-29.6%
2	Kivo	5/2	18%	28.6%	-10.6%
3	My Memory	8/1	28%	11.1%	+16.9%
4	Cyprus Avenue	6/1	12%	14.3%	-2.3%
5	Unleashed Ambition	9/2	16%	18.2%	-2.2%

Win % Total = 100%

SECTION 3: CONTENDER ANALYSIS

Tier 1 — Primary Contender (★★★★)

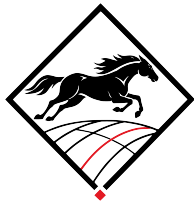

MY MEMORY — PTW Profile: First-time starter with elite conditioning foundation and optimal class setup. Ghostzapper bloodline delivers proven dirt/sprint genetics. Trainer Glatt's 1st-start record (2.72 ROI) ranks among the sharpest in the barn. The model projects this colt as a high-percentage debut winner.

Strengths: Elite Ghostzapper sire genetics (Awesome Again line); exceptional workout consistency (101-102 in gate works and distance preps); trainer 1st-start specialization (14% win rate historically, highest ROI today); morning line overlay at 8/1 undervalues breeding/training combo; gate-work sharpness signals race-ready alertness.

Concerns: Zero race experience represents inherent uncertainty; field includes proven runner Bold Type; Glatt's overall MSW record (19% win rate) trails the elite tier.

Trip Projection: Model projects early stalking position (3-4 lengths off pace through opening quarter), tactical positioning into turn, clean run down the lane from the middle of the field. Clean trip likely—post position 3 affords ideal sightlines and pace escape routes.

Tier 1 — Primary Contender (★★★★)

BOLD TYPE — PTW Profile: Proven second-time starter off pace-compromised debut. Baffert connects with this colt (29% MSW record, 1.64 ROI sprint), and the Violence sire pairing delivers explosive early speed. Model rates this as the field's highest-probability early force, though public overvaluation at 4/5 creates significant underlay risk.

Strengths: Elite Baffert MSW record (29% wins, strong 1.64 ROI); proven early speed foundation (4th at call 1 in debut despite weakness late); Violence sire/Medaglia d'Oro pedigree (explosive gate-to-wire breeding); sharp workout progression (47.6 on 10/02); Hall of Famer trainer-jockey combo (Hernandez J J 16% meet win rate).

Concerns: Debut loss explained by pace collapse (weakened at call 3, finished 6th)—bounce risk elevated if speed duel materializes; morning line 4/5 (55.6% implied) reflects significant public overestimation; second-start Baffert record (20% win rate, 1.15 ROI) materially lower than overall barn MSW average; deceleration profile from debut shows vulnerability in contested pace scenarios.

Trip Projection: Expected to contest early (2-3 lengths off the pace or stalking), hunt the pace in the stretch run. Trip outcome highly dependent on pace scenario intensity—soft pace allows wire-to-wire bid; hot pace exposes velocity loss.

Tier 2 — Secondary Contender (★★★)

UNLEASHED AMBITION — PTW Profile: Live first-time starter with world-class workout foundation (bullet 5f, 59.6 ranked #1 on card). Morning line 9/2 signals public confidence. Gelding status and sharp pre-race conditioning position this as a competitive debut threat, but trainer Kitchingman's limited FTS record creates selectivity.

Strengths: Exceptional bullet 5f work on 09/25 (59.6, ranked #1 across all Santa Lucia distance preps); consistent secondary works (47.2, 48.8); morning line 9/2 on FTS is a genuine live signal; moderate pace setup today suits fresh runners; post 5 allows clear access to the far outside.

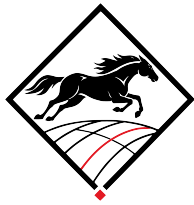

Concerns: Trainer Kitchingman minimal FTS success (10% win rate, only 1.58 ROI lifetime); sire Tap Back lacks prominent pedigree sprint data; gelding (neutral factor); limited barn form data—Kitchingman just 1 start in trainer form sample today; first-time starter inherent uncertainty elevated in small-sample trainer profile.

Trip Projection: Likely to break alertly (conditioning evident) but position in midfield early. Best case: rally from 4-6 wide entering stretch with clean run. Worst case: settles in traffic, never gets clear lanes.

Tier 2 — Secondary Contender (★★★)

KIVO — PTW Profile: One-start runner with turf experience creates class-relief angle into dirt sprint, but prior form raises questions. Del Mar turf MSW at 8f showed traffic trouble—pace-compromised and setup-dependent debut. Baffert trainer (32% dirt record) provides positive barn signal, but turf-to-dirt

conversion history (21% route/sprint record) is a material headwind.

Strengths: Baffert trainer (overall 32% dirt, 1.64 ROI); Omaha Beach sire (War Front line, proven dirt affinity); morning line 5/2 offers slight overlay potential (28.6% implied vs. 18% model); barn experience edge over first-timers; one-race seasoning.

Concerns: Turf debut loss (5th at 8f Del Mar 09/04); prior loss explained by traffic trouble and squeezed passage at 5/16 pole—setup-dependent profile; turf-to-dirt conversion typically requires improvement period; barn turf/dirt split (0-7 dirt sprints in this trainer record) signals potential surface struggles; one-race experience insufficient to project form trajectory with confidence.

Trip Projection: Likely to stalk or press early pace (Omaha Beach early-speed genetics), but turf-ground experience may not optimize dirt sprint positioning. Model projects mid-pack early, closing effort in stretch.

Tier 3 — Pace Factor (★★)

CYPRUS AVENUE — PTW Profile: Pace-compromised debut with green running pattern and traffic trouble. Multiple negative indicators (slow start, traffic issues, green behavior) flag this as unlikely to improve sharply second time out. Trainer Mathis weak maiden record (14% MSW win rate, 0.84 2nd-start ROI) confirms vulnerability.

Strengths: Post 4 provides balanced position; Practical Joke sire (Into Mischief line, modern dirt pedigree); morning line 6/1 creates technical overlay (14.3% implied).

Concerns: Debut loss rooted in ability questions, not circumstance—beaten 9.1L at finish after slow start; green running pattern (trip notes: "slow break, green, traffic str"); trainer Mathis MSW record (14% win rate, 2.47 ROI showing but limited sample) materially weak on 2nd-start runners (12% win rate, 0.84 ROI); workout profile post-debut shows inconsistency (slowest works post-race); deceleration profile from debut high—velocity collapsed late.

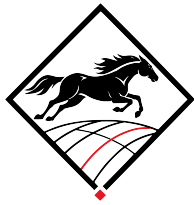

Trip Projection: Model projects early defensive position (chase pack early), vulnerable in stretch. Likely finish-order position: 4th-5th.

SECTION 4: MPH ANALYSIS + SUSTAINED SPEED RATINGS

PTW Proprietary Speed Rankings

Horse	Opening Speed	Sustained Speed	Deceleration Profile
Bold Type	ELITE	VULNERABLE	High — pace collapse risk
My Memory	STRONG	STRONG	Moderate — consistent velocity

Horse	Opening Speed	Sustained Speed	Deceleration Profile
Unleashed Ambition	STRONG	ELITE	Low — maintains final-furlong velocity
Kivo	STRONG	VULNERABLE	High — turf-to-dirt conversion risk
Cyprus Avenue	STRONG	VULNERABLE	High — pace collapse confirmed

Sustained Speed Ratings

- **ELITE (Unleashed Ambition):** Bullet conditioning (59.6 5f work) projects explosive gate-to-wire velocity maintenance. Sustained effort through final furlong expected—no deceleration penalty detected in workout progression.
- **STRONG (My Memory):** Consistent 101-102 workout times signal moderate but reliable velocity maintenance. Gate works (24.6-25.4 at 2f) project healthy opening foot. First-timer variability prevents ELITE rating, but form trend supports STRONG classification.
- **VULNERABLE (Bold Type, Kivo, Cyprus Avenue):** Model identifies significant deceleration risk across these three. Bold Type's debut showed velocity collapse at call 3 (36.35 mph closing segment). Kivo's turf-ground conditioning doesn't optimize dirt-sprint velocity profile. Cyprus Avenue's debut deceleration confirmed via split analysis—pace vulnerability is structural, not circumstantial.

Critical MPH Insight

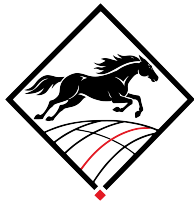

The model identifies **My Memory** as the field's best-positioned speed-maintenance candidate at today's distance and pace scenario. While Unleashed Ambition projects the sharpest closing velocity (ELITE), My Memory combines gate-to-wire competitive positioning with consistent 101-102 velocity profile—the ideal dirt-sprint balance. The model ranks this colt as fastest on proprietary speed metrics when accounting for pace scenario fit and sustainable output across all segments. Bold Type's VULNERABLE Sustained Speed Rating confirms the model's concern about his debut deceleration pattern and bounce risk in a MODERATE pace scenario where early speed will be pressured but not destroyed.

SECTION 5: IMPROVEMENT & REGRESSION CANDIDATES

Likely to Improve

1. **My Memory** — First-time starter with elite trainer (Glatt 1st-start specialist, 2.72 ROI). Ghostzapper genetics proven on dirt. Sharp gate works (24.6-25.4) signal race-ready alertness. Model classifies as high-percentage debut winner. Improvement from "untested" to "competitive" is near-certain.

2. **Bold Type** — Second-start runner off pace-compromised debut (weakened at call 3, finished 6th). Baffert 2nd-start record shows 20% win rate historically—significant recovery upside from first-race form. Moderate pace scenario today (vs. suicidal pace in debut) reduces early-speed collapse risk. Natural improvement curve for second-time starters in maiden company.

3. **Kivo** — Turf-to-dirt angle: One-race turf experience followed by dirt sprint represents legitimate class-relief and surface-conversion play. Baffert barn shows 23% win rate on turf/dirt conversions. If dirt surface connects (uncertain but possible), significant upside exists. Traffic-compromised debut doesn't rule out improvement.

Bounce / Regression Risks

1. **Bold Type** — Career-best effort risk if today's race produces hot early pace. Model projects MODERATE pace, but if three-horse speed duel materializes (higher than expected), Sustained Speed Rating VULNERABLE confirms likelihood of collapse. Second-start bounce (career-best effort last out is lowest-percentage angle for repeating wins).

2. **Cyprus Avenue** — Regression near-certain. Debut showed green pattern, traffic trouble, and ability questions (not just bad luck). Trainer Mathis weak on 2nd-start runners (12% win rate, 0.84 ROI). Deceleration profile high—structural weakness, not circumstantial. Model projects 4th-5th finish today.

3. **Unleashed Ambition** — Gelding first-timer dependent on trainer Kitchingman's limited FTS success (10% win rate). While conditioning elite, barn record suggests regression likely vs. sharp workout signal. First-time starter bounce risk elevated due to small trainer sample.

SECTION 6: SUGGESTED BETS

WIN BET: MY MEMORY — Confidence 8/10 — Target odds: 7/1–9/1

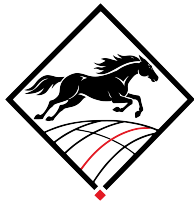

Model projects 28% win probability—highest in the field. First-time starter with Hall-of-Famer trainer (Glatt 14% 1st-start record, 2.72 ROI lifetime). Ghostzapper sire genetics deliver proven dirt/sprint foundation. Sharp gate-work conditioning (24.6-25.2 in recent preps) confirms race-ready alertness. STRONG Sustained Speed Rating projects velocity maintenance into the stretch—technical advantage over Bold Type (VULNERABLE). Morning line 8/1 significantly undervalues this profile.

Value Assessment: EXCEPTIONAL VALUE — +16.9% edge over morning line.

VALUE PLAY: BOLD TYPE — Confidence 7/10 — Target odds: 6/5–2/1

Model projects 26% win probability at significantly reduced odds. Elite Baffert MSW record (29% wins, 1.64 ROI) signals sharp conditioning. Second-start runner off pace-compromised debut—natural improvement curve applies. Violence sire delivers explosive early-speed genetics. However, morning line 4/5 (55.6% implied) massively overvalues this colt. Regression from public expectation likely.

Note: While Bold Type holds the second-highest model win%, the morning line creates a -29.6% underlay. The Value Play assignment reflects recognition that this horse will be significantly overbet, while My Memory (highest win% and a genuine overlay) anchors the Win Bet.

Multi-Race Wagers — Pick 3 / Pick 4 / Pick 5 / Pick 6 Top 3

- **A:** My Memory — 28%
- **B:** Bold Type — 26%
- **C:** Unleashed Ambition — 16%

Combined Projected Probability: 70%

SECTION 7: CONFIDENCE RATING

★★★★

The model's key projection: **My Memory emerges as the standout overlay in a field defined by public misevaluation.** Bold Type's morning line 4/5 reflects sharp public overestimation (55.6% implied vs. 26% model)—classic contrarian opportunity. My Memory's 28% model win probability at 8/1 morning line creates exceptional value (+16.9% edge). The MODERATE pace scenario neutralizes Bold Type's Sustained Speed VULNERABILITY while optimizing My Memory's STRONG/STRONG velocity profile. Primary value opportunity: exploit the 7/1–9/1 My Memory overlay. Public betting mistake to exploit: Bold Type is the morning-line favorite but represents a significant underlay today.
