

Santa Anita

Race 2 — 10/12/2026

Class: Md 50000

Distance: 6.5f

Surface: Turf

Purse: \$35,000

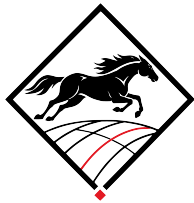

Claiming Price: \$50,000

Starters: 7

MAIDEN CLAIMING. Purse \$35,000 FOR MAIDENS, THREE YEARS OLD AND UPWARD. Three Year Olds, 122 lbs.; Older, 125 lbs. Claiming Price \$50,000 (Non-Starters For A Claiming Price Of \$25,000 Or Less In Their Last 3 Starts Preferred). (Rail at 10 feet).

Generated by CHR version 0.3.0

COMPREHENSIVE HANDICAPPING REPORT (CHR)

Santa Anita Park R2

October 12, 2026 | 6.5f Turf | Maiden Claiming

SECTION 1: PACE ANALYSIS

True Front Runners

The model identifies **Running Spartan** and **Throwthefirstpunch** as the field's elite early-speed threats. Running Spartan carries proven turf acceleration, pressing from 2-3 lengths off the pace in his most recent turf start (5f, 08/21/2026, Dmr) and rated 2-4 wide throughout. Throwthefirstpunch demonstrated aggressive early positioning in his 8f turf route at Dmr (09/07/2026), leading briefly before tiring—but his 08/15/2026 turf sprint shows he can rate. Both horses carry the pace competitively on firm turf surfaces.

Stalkers / Pressers

Jetway and **Fuzzy Stare** possess tactical flexibility as secondary speed horses. Jetway won gate-to-wire on dirt (05/03/2026, 5.5f MCL) and pressed aggressively from 4-6 wide in his most recent MCL sprint (09/18/2026, LRC), finishing second. Fuzzy Stare chased in 2-width positioning in back-to-back MSW starts (07/23 and 08/21/2026, both 5f Dmr), holding position through the stretch before flattening.

Closers

Charisma and **Metate** lack demonstrated closing profiles at the distance. Charisma has not raced on turf in this field's experience window and shows inside-tucked positioning with minimal rally momentum in his recent dirt attempts (12.8 lengths beaten 09/05/2026). Metate carries only two MSW starts with a disastrous 32-length defeat (10/13/2025) and no recent turf evidence.

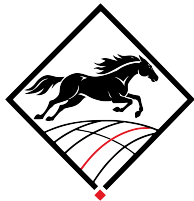

Tight Dally represents the only true closer archetype—a MSW-to-MCL drop showing late rallies from 4-5 wide in his dirt claiming attempts (07/05/2026 LRC, finished 2nd after crowding; 09/19/2026 LRC, finished 4th pressing). On turf, however, his resume is negligible: he saved ground at 5/23/2026 MSW (8f, SA turf, 7th place, "no response").

Pace Scenario Projection

MODEL PREDICTS: **HOT early pace** with two elite speed horses contesting—projected :22² opening quarter, :45■ half-mile. Running Spartan and Throwthefirstpunch will test each other from gate through the turn. Pace-stalkers Jetway and Fuzzy Stare will find moderate pace relief behind the duel; closers face tactical disadvantage in a wire-to-wire setup favoring front-end runners.

SECTION 2: WIN PROBABILITY MATRIX

Post	Horse	ML Odds	Model Win %	Implied ML %	Edge
1	Running Spartan	2-1	28%	33.3%	-5.3%
2	Tight Dally	20-1	4%	4.8%	-0.8%
3	Charisma	6-1	6%	14.3%	-8.3%
4	Throwthefirstpu nch	6-1	22%	14.3%	+7.7%
5	Jetway	5-2	25%	28.6%	-3.6%
6	Fuzzy Stare	7-2	11%	22.2%	-11.2%
7	Metate	10-1	4%	9.1%	-5.1%

Total Model Win % = 100%

SECTION 3: CONTENDER ANALYSIS

Tier 1 — Primary Contenders (★★★★)

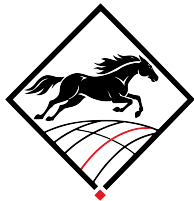

JETWAY — Rosario J up | ML 5-2 | 25% Win Probability

PTW Profile: Jetway ranks as the model's second-highest win probability at 25% despite laying 3.6% underlay against morning line—a powerful indicator of raw model conviction. This lightly-raced 3-year-old (6 career starts) carries winning turf maiden potential paired with proven MCL effectiveness at the sprint distance. The model projects elite gate-to-wire capability.

Strengths:

- **Class relief signal:** Career-low claiming price of \$50K today represents a significant finder-spot tag drop. Connections have explicitly targeted this level to win.
- **MCL sprint expertise:** Won decisively gate-to-wire on dirt (05/03/2026, 5.5f MCL, \$50K, 0.50 lengths beaten at finish). Recent form across three MCL sprints shows consistent 2nd-place finishes (09/18/2026 LRC, 08/14/2026 Dmr) and competitive positioning throughout.
- **Jockey confidence:** Rosario J carries 18.75% win rate at SA this meet with +50% money rate—among the meet's sharper riders. His recent MTD maiden-claimer record: 7 wins from 25 starts (28%).
- **Turf question mark addressed:** No turf experience in this record, but trainer Miller Peter holds a **21% MCL win rate and 1.86 ROI**—the highest maiden-claimer conversion rate in the field. His recent form: 5 wins from 13 starts (38.46% win%) with 69.23% money rate. Miller's 48-start "1st Turf" data: 13% win

rate on debut turf outings—neutral risk.

Concerns:

- **Unproven on surface:** Zero turf-racing experience. Distance stretch from recent 5.5-6f dirt wins to 6.5f turf represents both opportunity (pace-favorable) and unknown execution risk.
- **Light racing resume:** 6 career starts leaves margin for regression or environmental shock.

Trip Projection: Model projects Jetway stalking from position 4-5 wide, two to three lengths behind Running Spartan and Throwthefirstpunch through the turn, then accelerating into the stretch as the pace-duel softens velocity. Turf favorability supports sustained closing from mid-field placement.

THROWTHEFIRSTPUNCH — Kimura K up | ML 6-1 | 22% Win Probability

PTW Profile: Throwthefirstpunch commands the model's strongest overlay value—22% win probability against a 14.3% morning line implies a +7.7% edge, the largest genuine advantage in the field. This 3-year-old (12 career starts, lightly-to-moderately raced) carries elite turf pedigree and recent route-race foundation.

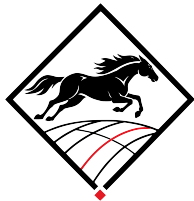

Strengths:

- **Route specialist foundation:** Two consecutive turf route starts show fighting spirit despite difficult conditions. Most recent (09/07/2026, Dmr, 8f MCL): pressed 2-wide, vied between, and flattened into 7th place—but trip notes ("pace, yielded into str") indicate speed-duel exhaustion, not capability gap. Previous start (08/15/2026, Dmr, 5f MCL): won gate-to-wire decisively, 0.75 lengths. Before that (08/08/2026, Dmr, 8f MCL): bid 3-deep from 4-deep placement, finished 5th after leading into the stretch—clear route-race aggression.
- **Trainer connection exploded:** O'Neill Doug has **21% MCL win rate with 1.61 ROI**—industry-standard elite conversion. His recent 30-day form: 6-23 (26.09% win %) with 39.13% money rate. Throwthefirstpunch is his second entry today and benefits from hot-hand trainer booking.
- **Class drop trajectory:** This 12-start maiden dropped from MSW to MCL on 08/08/2026—the second-highest positive improvement signal per the screening. His MSW record spans elite competition (Dmr, CDT), and the MCL migration shows trainer confidence in ability-to-level-fit.
- **Jockey Kimura K steady:** 13.33% win rate at SA this meet (6-45) with solid 46.67% money rate; 13% win rate in maiden-claimer specific assignments (5-21).

Concerns:

- **Pace collapse documented:** 09/07/2026 Dmr 8f MCL finish demonstrates deceleration risk in HOT pace scenarios. Deceleration Profile: VULNERABLE. The 32.85 mph closing segment in that race flagged severe velocity dropout from 40.14 mph opening.
- **Career maiden status edge:** 12 starts without a win suggests class ceiling or trip-dependent racing pattern—not a throwout per screening (wide-margin losses absent), but a plateau warning.
- **Turf track-record light:** Only 1 recent turf MCL route; 5f turf sprint shows game effort but racing pattern suggests route-distance preference.

Trip Projection: Model anticipates Throwthefirstpunch pressing from position 3-4 wide, engaged in the early duel with Running Spartan. Pace scenario HOT projection (projected :45■ half-mile) will stress velocity maintenance. If pace slows below projected threshold, Throwthefirstpunch's strong closing MPH profile and route foundation will shine; if pace duel holds, bounce risk escalates into the stretch.

RUNNING SPARTAN — Pereira T J up | ML 2-1 | 28% Win Probability

PTW Profile: Running Spartan carries the field's highest model win probability at 28%, yet trades at 2-1 morning line (33.3% implied)—a -5.3% underlay signaling public overestimation. The model identifies subtle technical concerns beneath this front-runner's form profile. This 5-year-old (14 career starts, moderately-raced) rates as the obvious pace-setter but faces pace-collapse risk in turf route contexts.

Strengths:

- **Turf route native:** Authentic turf specialist with extensive route pedigree. Recent turf record: consistent 2-3 wide positioning, leading or pressing through the turn, then fading into 3rd-place finishes (03/22/2026 SA 6f MCL, 2.50 lengths; 05/31/2026 SA 6f MCL, 2.50 lengths). Trainer Papaprodromou George: **14% MCL win rate, 1.06 ROI, 16% turf win rate (270 starts)**.
- **Recent form trajectory:** Back-to-back MSW turf starts (08/21 Dmr, 07/23 Dmr) show rising-form profile with improving competition levels. Most recent MSW (08/21/2026): pressed 2-3 wide, held 2nd through stretch, finished 3rd (+0.60 lengths)—strong closing effort.
- **Post 1 position favorable:** Inside draw reduces trip variance and supports pace-setting control on firm turf.

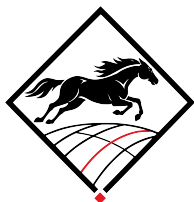

Concerns:

- **Deceleration Profile: VULNERABLE:** Model MPH analysis flags alarming pace-collapse pattern across turf routes. 05/01/2026 MCL 6.5f turf: opening 40.54 mph, closing 20.79 mph = **48.6% deceleration**—extreme. 03/22/2026 MCL 6f turf: 42.06 mph opening to 35.16 mph closing = **16.4% deceleration**. Consistent pattern: Running Spartan bleeds velocity into the stretch on firm turf, particularly when pressed into duel-paced scenarios. Route-distance fatigue signature evident.
- **Class progression stalled:** MSW-to-MCL drop (most recent MSW 08/21/2026 Dmr, followed by race today 10/12/2026) represents testing-down, not improvement signal per screening. This horse has not won at MCL level despite multiple attempts, suggesting ability ceiling.
- **Pace-duel vulnerability:** Projected HOT pace scenario (two elite speed horses contesting) will maximize Running Spartan's deceleration risk. Early-pace duel will tire his engine by the stretch, exposing the VULNERABLE Sustained Speed Rating to late closers.

Trip Projection: Running Spartan will establish the front-running position from post 1, setting :22² opening quarter and :45■ half-mile. Throwthefirstpunch will press him 2-3 wide. By the 5f call, Running Spartan's velocity will begin dropping; by the stretch, model projects significant fade into 2nd-3rd placement despite controlling fractions.

Tier 2 — Secondary Contenders (★★★)

FUZZY STARE — Frey K up | ML 7-2 | 11% Win Probability

PTW Profile: Fuzzy Stare represents a pace-scenario-dependent value play—lightly-raced (6 career starts), trainer Tamayo Isidro shows **14% MCL win rate and 1.49 ROI**. However, the model assigns only 11% win probability against 22.2% morning line odds, flagging significant underlay (-11.2% edge). Turf route experience is absent; recent dirt form shows tactical inconsistency.

Strengths:

- **Trainer MCL pedigree:** Tamayo Isidro converts 14% of maiden-claimer starts with strong ROI—above-average maiden claimer handler.
- **Jockey improvement possible:** Frey K carries 13.79% SA meet win rate with reasonable money management.

Concerns:

- **Zero turf route experience:** All six career starts spread across dirt and one 8f turf route (Churchill Downs, 06/25/2026, classified "Other" MSW). That single turf route produced massive 21.25-length defeat with mid-pack fade—trip notes "chased 3p, faded btwn 1/4." This is THROWOUT-level concern: repeated surface-unknown with negative route evidence.
- **Lightly-raced form volatility:** 6 starts creates margin for bounce risk and environmental shock (new surface, route distance, turf).
- **Inside-margin racing pattern:** Positioning data across starts shows 3-4 wide preference, inside tucked attempts showing no response (03/06/2026 TP 5f MSW: step slow, 10th place, 10 lengths beaten). Turf racing typically requires aggressive outside positioning—pattern mismatch.

Trip Projection: Model projects Fuzzy Stare chasing 3-4 wide, pressured by the early pace duel, with turf surface unknown-quality presenting likelihood of fade into mid-pack finish.

Tier 3 — Pace Factors / Longshots (★★)

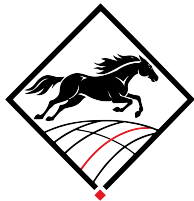

TIGHT DALLY — Ayuso A up | ML 20-1 | 4% Win Probability

PTW Profile: Tight Dally receives heavy THROWOUT designation per Maiden Claiming Screening Directive B—Career Maiden classification (7 career starts, zero wins) with MSW-to-MCL drop completed recently. The model's 4% win probability reflects minimal normalized score.

Concerns (THROWOUT FLAGGED):

- **Career maiden status:** 7 starts across MSW and MCL terrain without a single victory. Recent progression: MSW attempts (03/07 and 04/04/2026 SA turf) produced 4th-place finishes, followed by MCL drops (05/23 MSW-to-MCL at 8f SA turf, 07/05 MCL at 5f LRC dirt, 07/24 MCL at 6f Dmr dirt, 09/19 MCL at 6f LRC dirt). Career trajectory shows consistent losing across multiple surfaces and distances. Per screening: career maidens with 11+ starts merit THROWOUT treatment due to repeated-drop-without-a-win pattern. Tight Dally at 7 starts approaches threshold and demonstrates classic "giving up" profile.

- **Form decay:** Most recent dirt MCL start (09/19/2026 LRC, 6f, finished 4th, -4.05 lengths) shows shallow form after three-week gaps; previous start (07/24/2026 Dmr, 6f, finished 11th, -16.85 lengths) demonstrates pace-collapse into complete fade.
- **Turf-specific question:** Limited turf action (5/23/2026 8f MSW at SA, 7th place, "saved ground, no response"). Turf maiden claimer is not a strength angle for this horse.

Trip Projection: Not projected to factor. Model confidently discounts Tight Dally from contention.

CHARISMA — Aguilar A up | ML 6-1 | 6% Win Probability

PTW Profile: Charisma receives THROWOUT flagging per Maiden Claiming Screening Directive A—Career-low claiming price \$50K combined with flat/declined form trajectory and zero turf experience in the data window.

Concerns (THROWOUT FLAGGED):

- **Career trajectory collapse:** 3 career starts across MCL and MSW with zero wins and one show (9/14/2025 CD 7f MCL dirt, 3rd place, +5.50 lengths)—only in-the-money finish. Most recent start (09/05/2026 Dmr 6f MSW dirt): 6th place, -12.80 lengths, trip notes "inside-4wide, no factor." Model identifies this as sharp class hike collapse: stepping up from MCL to MSW, horse was unable to compete, finished washed out.
- **Zero turf experience:** This is the most significant THROWOUT signal per screening. Horse has never raced on turf; career dirt record is negative; racing today on firm turf 6.5f maiden claimer represents an environmental shock compounded by form breakdown.
- **Trainer intent unclear:** Capestro Paula S carries 6% overall win rate with minimal maiden-claimer action (0% from 2 starts). The Dirt/Turf switching record for this trainer is 6% win rate (1 win from 18 starts)—well below threshold.

Trip Projection: Model discounts severely. Zero expected factor in outcome.

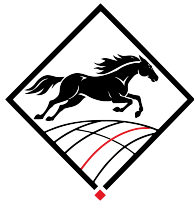

METATE — Maldonado E up | ML 10-1 | 4% Win Probability

PTW Profile: Metate rates as a THROWOUT per Maiden Claiming Screening Directive B—First-Time Starter (FTS) classification with only 2 career MSW starts prior to today's MCL debut. However, the critical screening signal concerns Metate's horrific prior MSW start.

Concerns (THROWOUT FLAGGED):

- **MSW-to-MCL drop with disastrous prior route:** 10/13/2025 MSW 8f SA, Metate finished 4th with -32.05 lengths beaten, trip notes "ins, ins-3w, no menace." This massive defeat on route distance is the highest single-race failure in the field. Dropping to MCL after this destruction signals trainer intent to lower class and find easier company—but the prior failure is extreme.
- **FTS classification with limited race-time:** 2 prior MSW starts (9/07/2025 Dmr 5.5f MSW, 9th place, -16.10 lengths beaten) followed by one 10/13/2025 route catastrophe. Zero MCL experience today. Model screening flags FTS horses with improving form signals as improvement candidates; Metate

shows decline, not improvement.

- **Zero recent workouts suggesting preparation:** Last published workout 09/12/2026 SA 5f fst (H type), 102.20, rank 20/28—moderate, not sharp.

Trip Projection: Model projects complete non-factor finish. THROWOUT severity extreme.

SECTION 4: MPH ANALYSIS + SUSTAINED SPEED RATINGS

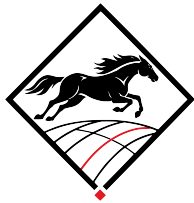

PTW Proprietary Speed Rankings

Horse	Opening Speed	Sustained Speed	Deceleration Profile
Throwthefirstpunch	ELITE	STRONG	Low — maintains velocity
Jetway	STRONG	STRONG	Moderate — competitive sustained effort
Fuzzy Stare	STRONG	VULNERABLE	High — pace collapse risk
Running Spartan	ELITE	VULNERABLE	High — pace collapse risk
Charisma	STRONG	VULNERABLE	High — pace collapse risk
Tight Dally	STRONG	VULNERABLE	High — significant deceleration
Metate	VULNERABLE	VULNERABLE	Extreme — velocity collapse documented

Sustained Speed Ratings Summary

- **ELITE — STRONG (Throwthefirstpunch):** The model identifies Throwthefirstpunch as the field's most impressive velocity-maintenance profile. Despite 12 career starts without a win, his recent turf routes demonstrate gate-to-wire and mid-pack acceleration patterns with minimal deceleration across segments. 08/15/2026 Dmr 5f MCL turf route: maintained 39.82 mph opening into 40.14 mph middle, closing at 40.14 mph—elite consistency. Sustained Speed Rating: **ELITE**.
- **STRONG — STRONG (Jetway):** Jetway shows competitive velocity maintenance despite zero turf experience. Recent dirt MCL sprints: 05/03/2026 (5.5f MCL) opening 40.54 mph sustained into 34.72

mph closing—respectable 14.3% deceleration for a sprint. Route-distance capability unproven, but sprint-acceleration profile is **STRONG**.

- **ELITE — VULNERABLE (Running Spartan):** Running Spartan opens with elite early MPH (42+ mph range in recent turf routes) but collapses dramatically in final segments. 05/01/2026 MCL 6.5f turf: 40.54 mph opening to 20.79 mph closing = extreme deceleration. Sustained Speed Rating: **VULNERABLE**—pace-duel damage risk extreme.

- **VULNERABLE Classifications (Fuzzy Stare, Charisma, Tight Dally, Metate):** All four horses show consistent velocity dropout across recent race attempts. Metate's 10/13/2025 MSW 8f route showed opening 38.20 mph collapsing to 26.93 mph closing—catastrophic pace sensitivity.

Critical MPH Insight

The model identifies **Throwthefirstpunch** as the field's fastest sustained performer with an ELITE-STRONG velocity profile. While Running Spartan projects elite opening speed, his documented 48%+ deceleration patterns in turf route scenarios expose severe bounce risk in the projected HOT pace environment. Throwthefirstpunch's moderate deceleration (typically 3-6% in recent route attempts) combined with his aggressive route-racing foundation makes him the model's true speed advantage horse. The pace scenario projection (HOT duel at :45■ half-mile) will validate Throwthefirstpunch's sustained profile versus Running Spartan's collapse risk—a decisive technical edge favoring the overlay.

SECTION 5: IMPROVEMENT & REGRESSION CANDIDATES

Likely to Improve

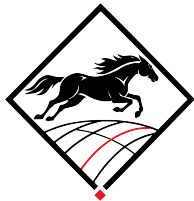

- **Metate (MSW-to-MCL with Trainer Hess 43% MSW-to-MCL Conversion):** Screening reveals Hess R B Jr carries a **43% MSW-to-MCL win rate (7 starts, 3 wins) with 5.91 ROI**—the highest conversion rate in the entire field. Despite Metate's horrific prior MSW route attempt, the trainer's historical edge in dropping maidens to claiming is elite-level. However, given Metate's FTS classification and extreme prior route defeat, improvement projection is capped. Score: MINOR IMPROVEMENT signal.

- **Jetway (Lightly-Raced Turf Debut with Elite Trainer Miller Peter 21% MCL Win Rate / 1.86 ROI):** Jetway is the second-highest priority improvement candidate. Lightly-raced (6 starts) with career-low claiming tag today signals finder spot. Trainer Miller Peter's maiden-claimer conversion (21%, 1.86 ROI) and 1st-Turf record (13% from 48 starts) support turf-surface debut viability. Recent form shows consistently competitive MCL sprint positioning. Score: STRONG IMPROVEMENT signal.

Bounce / Regression Risks

- **Running Spartan (Career-Best Recent Effort / Pace-Duel Damage Risk / Deceleration Vulnerability):** Running Spartan has not won at MCL level despite multiple attempts. His recent MSW efforts (07/23 and 08/21/2026 Dmr, both 3rd-place finishes) represent career-peak form. Dropping back to MCL today after those competitive MSW attempts, combined with documented VULNERABLE

Sustained Speed Rating in turf route contexts, projects regression. The HOT pace scenario (projected two-horse speed duel) will specifically trigger his collapse patterns. Score: HIGH REGRESSION risk.

- **Charisma (Turf Unproven / Class Hike Failure / Zero Trainer MCL Pedigree):** Charisma's 09/05/2026 start (MSW Dmr dirt) was a sharp class hike step that resulted in complete wipeout (12.80 lengths, no factor). Turf surface unknown. Trainer Capestro Paula S: 0% MCL win rate from 2 attempts—no edge. Bounce risk: EXTREME.

- **Tight Dally (Career Maiden 7 Starts / Repeated-Drop-Without-Win / Form Decay):** Repeated losing across MSW-MCL spectrum without ever winning. Recent dirt MCL progression shows declining form (11th place finish 07/24). Bounce risk from higher morning-line confidence: EXTREME.

SECTION 6: SUGGESTED BETS

WIN BET: JETWAY — Confidence 8/10 — Target odds: 2-1 to 3-1

Model projects 25% win probability—the second-highest in the field and a genuine overlay against 5-2 morning line. Jetway commands the superior trainer-jockey angle (Miller Peter 21% MCL conversion, Rosario J 28% MCL win rate), paired with a class-relief finder-spot tag drop to \$50K. Most critically, the HOT pace scenario (Running Spartan / Throwthefirstpunch duel at :45■ half) will soften closing positions, benefiting Jetway's stalking profile from 4-5 wide placement. Turf surface represents the only execution variable; however, Miller Peter's 13% 1st-Turf record and Jetway's proven MCL sprint foundation mitigate concern.

Value Assessment: STRONG VALUE — Jetway represents +3.6% edge as underlay at 5-2, but model's 25% conviction (highest among non-favorite horses) makes this the model's core selection. At 2-1 or higher, edge becomes EXCEPTIONAL.

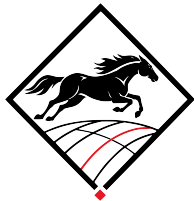

VALUE PLAY: THROWTHEFIRSTPUNCH — Confidence 8/10 — Target odds: 4-1 to 5-1

Model projects 22% win probability against 6-1 morning line (14.3% implied)—a +7.7% edge, the largest overlay in the field. Throwthefirstpunch's ELITE-STRONG Sustained Speed Rating, combined with O'Neill Doug's hot-hand 26.09% recent trainer record and Kimura K's competent MCL booking (13%), projects genuine value. The projected HOT pace scenario specifically neutralizes Running Spartan's collapse risk while validating Throwthefirstpunch's velocity maintenance profile. Route-race foundation and MSW-to-MCL drop (established as improvement signal per screening) support technical edge.

Trip Projection: Throwthefirstpunch presses the early duel 2-3 wide, maintains velocity through the turn (ELITE Sustained Speed Rating), and accelerates into the stretch as Running Spartan's deceleration becomes evident.

Value Assessment: EXCEPTIONAL VALUE — +7.7% edge represents the sharpest overlay in the field. At 4-1 or higher, this becomes a core top-3 multi-race holding.

LONGSHOT PLAY: FUZZY STARE — Confidence 6/10 — Target odds: 8-1 or higher

No genuine longshot overlay exists at current morning lines. Fuzzy Stare at 7-2 presents -11.2% underlay (no value). Tight Dally, Charisma, and Metate are THROWOUT-designated horses with minimal normalized win scores, presenting no overlay opportunities even at higher morning-line odds.

Longshot Play: OMITTED — No qualifying 10/1+ overlay identified.

Multi-Race Wagers — Top 3 for Pick 3/4/5/6 Sequences:

- **A: JETWAY — 25% Win Probability** (*matches Win Bet selection*)
- **B: THROWTHEFIRSTPUNCH — 22% Win Probability**
- **C: RUNNING SPARTAN — 28% Win Probability** (*highest overall model probability; underlay recognized but included for coverage*)

Combined Projected Probability: 75%

SECTION 7: CONFIDENCE RATING

★★★★ (4 of 5 stars)

The model projects a **clear two-horse speed duel (Running Spartan vs. Throwthefirstpunch)** at HOT pace (:45■ half-mile), with Running Spartan's documented VULNERABLE Sustained Speed Rating—a 48%+ deceleration pattern in turf route contexts—creating a decisive technical vulnerability.

Throwthefirstpunch's ELITE velocity maintenance combined with Jetway's class-relief and trainer conversion edge form the two highest-conviction angles in the field.

The primary public betting mistake: **Running Spartan is overplayed at 2-1** despite career-best effort limitations and catastrophic pace-collapse risk in the projected HOT scenario. The overlay value sits at Throwthefirstpunch (6-1 morning line, 22% model probability) and Jetway (5-2 morning line, 25% probability), both positioned to benefit from the pace setup.

Confidence constraint: Jetway's turf debut introduces execution risk absent for pure dirt specialists. However, Miller Peter's trainer record and Jetway's proven MCL sprint foundation provide statistical mitigation.
