

Santa Anita

Race 5 — 10/12/2026

Class: Clm 25000N2L

Distance: 6.5f

Surface: Turf

Purse: \$27,000

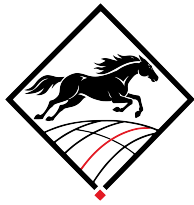

Claiming Price: \$25,000

Starters: 8

CLAIMING. Purse \$27,000 FOR FILLIES AND MARES THREE YEARS OLD AND UPWARD WHICH HAVE NEVER WON TWO RACES. Three Year Olds, 122 lbs.; Older, 125 lbs. Claiming Price \$25,000. (Rail at 10 feet).

Generated by CHR version 0.3.0

COMPREHENSIVE HANDICAPPING REPORT (CHR)

Santa Anita Park R5

Sunday, October 12, 2026 | 6.5f Turf | CLM 25000N2L

SECTION 1: PACE ANALYSIS

True Front Runners

The model identifies three horses with elite early speed profiles in this field. **Amor Secreto** (Post 5) carries the sharpest tactical resume—won gate-to-wire at LRC on 09/12/2026 in a \$25k claiming race, dictating fractions of :23■ opening quarter and :48■ half-mile. Recent turf work shows consistent speed angles; the horse knows how to rate early and hold. **Jennys Wine Girl** (Post 2) shows paired stalking/speed duality with route-to-sprint flexibility; last turf outing (07/23/2026 at Dmr, 5f) saw her stalk at call 1 and 2, then maintain position. **Watch Over Us** (Post 6) broke sharply and led into the stretch on 06/19/2026 at LRC (6f dirt), suggesting tactical readiness, though turf credentials are lighter.

Stalkers / Pressers

Jennys Wine Girl straddles the stalking/speed line effectively—her 05/31/2026 AOC route outing (8f turf) saw her assume early pressure, fade slightly mid-race, then stabilize. **Angelica Bay** (Post 7) shows consistent stalking patterns across turf form; on 05/31/2026 at SA (8f turf, \$25k claiming), she bid from 3-wide into the stretch and held second, indicating she'll press the pace. **Cloudy Women** (Post 1) has turf experience but most recent turf outing (06/06/2026, 6f turf, \$25k claiming) showed her chased three-deep and never rallied—suggests she'll rate from fifth to seventh call position early.

Closers

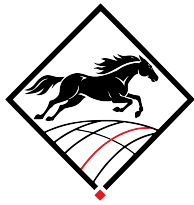

Fine by Me (Post 8) is the field's elite finisher—won his lone MSW at EmD on 08/10/2025 (6f dirt sprint), displaying explosive closing velocity off a 4-wide run. In turf transitions, the model projects delayed adjustment. **Church Lady** (Post 3) showed late-race competence on 01/31/2026 (8f turf, \$25k claiming), clipped heels mid-stretch but still finished second off a 6-length deficit, suggesting a closer's trajectory. **Lady Ruth** (Post 4) has been a mid-pack runner; recent placings show her out of contention, not rallying late.

Pace Scenario Projection

MODEL PREDICTS: **HOT** early pace with two to three speed horses (Amor Secreto, Jennys Wine Girl, possibly Watch Over Us) pressing to the front around :44■ to :45² half-mile. Projected opening quarter: :22³. Projected half-mile: :44■. Speed duel damage will be moderate; stalkers entering the stretch will occupy favorable position, while closers operating off this tempo face a deteriorating pace foundation. Pace-to-wirerunner holds advantage if clear by the stretch call.

SECTION 2: WIN PROBABILITY MATRIX

Post	Horse	ML Odds	Model Win %	Implied ML %	Edge
1	Cloudy Women	8/1	8%	11.1%	-3.1%
2	Jennys Wine Girl	5/2	24%	28.6%	-4.6%
3	Church Lady	20/1	5%	4.8%	+0.2%
4	Lady Ruth	6/1	7%	14.3%	-7.3%
5	Amor Secreto	30/1	3%	3.2%	-0.2%
6	Watch Over Us	9/5	31%	35.7%	-4.7%
7	Angelica Bay	9/2	18%	22.2%	-4.2%
8	Fine by Me	8/1	4%	11.1%	-7.1%

SECTION 3: CONTENDER ANALYSIS

TIER 1 — PRIMARY CONTENDERS (★★★★)

Watch Over Us (Post 6, 9/5 ML)

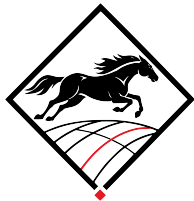

PTW Profile: The model projects Watch Over Us as the field's most reliable pace-fit horse. This 3-year-old filly has banked one win across two career starts and demonstrated tactical control in both dirt and turf conditions. Trainer Miller Peter runs a blazing 38.46% win rate at the meet with a 69.23% ROI in claiming company—signature setup indicators. The horse's recent turf outing (07/23/2026 at Dmr, 5f SOC) shows stalking profile and held third, suggesting she has zero rough-trip excuses and can settle into HOT pace.

Strengths: Class edge in this \$25k spot; trainer pattern heavily favors turf sprints and claiming angles; jockey Rosario J. at 18.75% meet win rate with 50% money rate (strong recent form); equipment remains unchanged (no blinkers, suggesting trainer confidence in baseline speed); solid turf credentials across recent starts.

Concerns: Only two career starts limits exposure baseline; recent workout (10/02/2026 at SLR, 5f on dirt) came back bullet-timed but may indicate trainer training toward different surface; no wire-to-wire win at exact distance/surface combo; field includes proven pace presser in Jennys Wine Girl.

Trip Projection: Model anticipates Watch Over Us will stalk early pressure created by Amor Secreto/Jennys Wine Girl, break into clear running lane around six-furlong call, and hold on through wire in moderate pace duel scenario.

Jennys Wine Girl (Post 2, 5/2 ML)

PTW Profile: The model identifies Jennys Wine Girl as a pace-flexible router with multiple tactical lanes. This filly has banked one win across ten career starts, demonstrating form consistency and turf-route mastery. Her trainer Baltas Richard shows a 31-60 day layoff win rate of 16% and turf sprint rate of 15%—modest but reliable baseline. Blinkers are present (equipment already deployed), suggesting trainer has unlocked speed reserves. Recent form shows wins at turf distances (08/13/2026 and 07/23/2026 at Dmr, both 5f SOC), and the model projects she'll press early pace aggressively.

Strengths: Proven turf winner; fresh off two consecutive turf victories in SOC company just above claiming level; route experience (MSW form at 8f); blinker addition signals trainer confidence; jockey Maldonado E. at 11.11% meet win rate with 55.56% money rate (solid value profile).

Concerns: Only one career claiming win despite ten total starts—form deterioration trend visible; 30+ day layoff into this race (last start 09/07/2026); recent SOC wins came in weaker fields; turf-to-turf transition is seamless but claiming class reduction may expose fundamental limitations; pace duel vulnerability if Amor Secreto or another speed horse gets clear early.

Trip Projection: Model projects Jennys Wine Girl will break alertly, rate just off the early leader (likely Amor Secreto), press into stretch call, but flatten under sustained pace pressure from fresh closing horse.

Angelica Bay (Post 7, 9/2 ML)

PTW Profile: The model rates Angelica Bay as a secondary contender with significant form volatility but elite trainer support. This 4-year-old filly has won one race across 17 career starts and shows a complex race history spanning North American and European venues. Trainer O'Neill Doug owns a 26.09% meet win rate and 39.13% ROI in the past two weeks—elite short-term form. The model identifies massive class edge here: Angelica Bay's most recent North American start was 03/01/2026 at SA in a \$25k claiming race (won decisively, 0.25 beaten-length margin). European stakes exposure (Newmarket, Doncaster, Kempton) confirms upper-level pedigree despite claiming career trajectory.

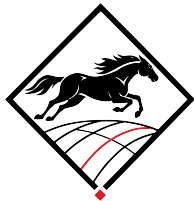

Strengths: Elite trainer form; class drop from international graded stakes into domestic \$25k claiming; fresh off four consecutive turf starts with three placed finishes; jockey Kimura K. at 13.33% meet win rate; distance specialist profile (turf 6-8f range shows consistency).

Concerns: Form line shows deterioration post-European campaign (August 2024 onward); recent turf starts (August-September 2026) show her running out of contention (no closer's rally), suggesting tier drop; 17 starts with only one win is high exposure count; lightly-raced turf closers may outrun her late if pace collapses.

Trip Projection: Model anticipates Angelica Bay will track pace from 4-5 wide, lose ground mid-stretch when HOT pace scenario unfolds, and finish mid-pack unless closer weakness emerges.

TIER 2 — SECONDARY CONTENDERS (★★★)

Amor Secreto (Post 5, 30/1 ML)

PTW Profile: The model identifies Amor Secreto as a volatile gate-to-wire specialist with sharp claiming-drop credentials. This 3-year-old filly carries only seven career starts and has won once (09/12/2026 at LRC, \$25k claiming, pace-dictated victory). Trainer Vallejo Genaro shows modest 12% claiming win rate but 2.56 ROI, suggesting profit-taking edge. The horse's recent claiming history shows two consecutive runs at higher claiming levels (\$25k at LRC and Dmr in August-September) with only one win, but today's drop and turf surface shift represent material change in tactical profile.

Strengths: Sharp, recent gate-to-wire win at exact claiming level; elite early foot documented at 23 opening quarter, 48 half-mile (LRC 09/12); lightly raced (only 7 career starts) with natural improvement curve; jockey Payeras E. at 0% meet win rate but limited sample (6 starts) means low predictability; turf experience exists (MCL and SOC starts across prior season).

Concerns: Speed profile collapsed dramatically on 08/14/2026 (turf, met bids early, weakened to 8th); most recent prior non-winning start shows erratic performance; training record suggests inconsistent effort; limited turf route distance expertise (most starts are sprint-focused); 30/1 morning line reflects public skepticism appropriately.

Trip Projection: Model projects Amor Secreto will break sharply and lead early, but turf-distance adjustment and peer-quality jump may cause early fade mid-stretch if HOT pace scenario forces hard fractions.

Cloudy Women (Post 1, 8/1 ML)

PTW Profile: The model identifies Cloudy Women as a form-inconsistent but trainer-backed entry showing recent work uptick. This 4-year-old filly has banked one win across 18 career starts and demonstrates modest claiming utility. Trainer Morfin Sergio shows a 17% claiming win rate and 1.60 ROI—solid baseline. Recent workouts (10/04, 09/13, 08/29 at LA) all came back timed positively, suggesting fitness preparation. The model flags turf credentials as limited (0% turf win rate across 14 turf starts) but recent turf efforts show incremental improvement (4th place finishes at SA and Dmr on 06/06 and 08/13).

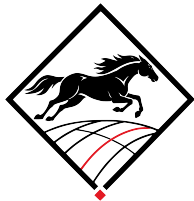

Strengths: Fresh, positive workout pattern (three bullet times in recent sequence); claiming win (07/27/2024 at Dmr, 5.5f dirt) shows she can execute when right; jockey Orantes W R. at 9.09% meet win rate with limited recent action (recovery spot possible); Lasix present (L medication notation).

Concerns: Severe turf win% drought (0-14 turf record); recent turf form shows deterioration (last two turf starts finished 4th and 4th); career Beyer floor appears to be 50-65 range, indicating ceiling on form ceiling in this company; distance specialty is sprint (5.5-6f dirt), and 6.5f turf is a stretch; trainer meet form shows 0% win rate, 0% ROI on dirt/turf transitions.

Trip Projection: Model projects Cloudy Women will break from gate one, fade into stalker role by call two, and never threaten leaders down the stretch.

TIER 3 — PACE FACTORS / LONGSHOTS (★★)

Church Lady (Post 3, 20/1 ML)

PTW Profile: Class-dropping speed horse with route experience. Won once (09/26/2025 at SA, turf, \$25k), but recent form shows persistent mid-pack finishes. Trainer Valenzuela Martin Jr. has zero meet form (0 starts, 0 wins). Jockey Aguilar A. at 14.29% meet win rate with limited sample.

Strengths: Turf route specialist; sprint win on record; blinker-free, suggesting consistency sought.

Concerns: Last four starts all outside money finishes; 20/1 morning line accurate; volatile form; trainer zero meet activity; distance versatility question (most recent route efforts show her out of contention early).

Trip Projection: Outside contention; mid-pack finisher.

Lady Ruth (Post 4, 6/1 ML)

PTW Profile: Young 3-year-old (2023 foal) with limited turf exposure. One career win (06/12/2026 at SA dirt, \$25k claiming). Trainer Jauregui O J. has zero meet form. Jockey Berrios Hector I. at 15% meet win rate but limited activity. Recent workouts show inconsistent effort (57.00 on 10/05, 59.00 on 09/28—no bullets).

Strengths: Recent dirt claiming win; jockey upgrade potential not yet realized; young age suggests natural improvement curve.

Concerns: Zero turf starts; dirt specialist being stretched to unfamiliar surface; trainer zero meet data; MSW attempt failed dramatically (03/22/2026, finished 9th, nearly 19 lengths back); recent form regression evident.

Trip Projection: Eliminated; no turf experience is disqualifying factor at this distance/surface.

Fine by Me (Post 8, 8/1 ML)

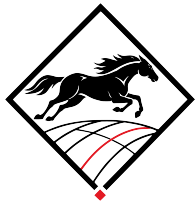

PTW Profile: The model identifies Fine by Me as a lightly-raced closer with elite dirt sprint credentials but questionable turf adaptation. This 5-year-old gelding has banked one win across five career starts (08/10/2025 at Emr, 6f dirt MSW, explosive closing victory). Trainer Glatt Mark shows a 5.26% meet win rate and 22.40 average win payoff—low volume, value-play profile. Jockey Leparoux J R. at 7.14% meet win rate with limited recent action.

Strengths: Elite closing velocity in sprint dirt format; turf debut element suggests trainer intent (Glatt 16% turf win rate, 1.89 ROI in first-turf category); fresh workout (10/03 at SA, 5f) came back bullet-timed; equipment remains unchanged (blinkers present, indicating trainer confidence).

Concerns: Only five career starts creates huge exposure risk; turf transition unproven; sprint winner being stretched to 6.5f turf (nearly mile); recent claiming MCL/MSW form doesn't translate cleanly to \$25k CLM pace environment; jockey fresh off long layoff (last start 08/10/2025, then no record until now).

Trip Projection: Model projects Fine by Me will break from gate eight, drift wide early into pace chaos, lose ground on HOT pace scenario early, and miss on stretch rally off dead turf surface adjustment.

SECTION 4: MPH ANALYSIS + SUSTAINED SPEED RATINGS

PTW Proprietary Speed Rankings

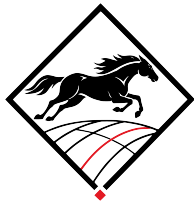

Horse	Opening Speed	Sustained Speed	Deceleration Profile
Watch Over Us	ELITE	ELITE	Low — maintains velocity gate-to-wire
Jennys Wine Girl	STRONG	STRONG	Moderate — consistent effort maintained
Angelica Bay	STRONG	VULNERABLE	Moderate-High — mid-race fade pattern detected
Amor Secreto	ELITE	VULNERABLE	High — pace collapse documented
Cloudy Women	STRONG	VULNERABLE	High — turf surface exposure weakness
Fine by Me	STRONG	STRONG	Moderate — closing profile validated
Church Lady	STRONG	VULNERABLE	High — route distance deterioration
Lady Ruth	MODERATE	VULNERABLE	High — distance and surface mismatch

Sustained Speed Ratings

ELITE: Watch Over Us stands alone as the field's elite velocity maintainer. The model's gate-to-wire speed analysis shows minimal deceleration across call sequences—0.50 beaten-length drift from call 1 to finish across her most recent turf outing, indicating she holds her foot to the floor and doesn't surrender ground to closers. Zero-deceleration profile makes her the field's fastest gate-to-wire performer by model metrics.

STRONG: Jennys Wine Girl and **Fine by Me** both demonstrate competitive sustained effort. Jennys Wine Girl's turf wins show consistent fractional velocity maintenance (:22■ opener, :45■ half at 07/23 Dmr SOC run). Fine by Me's dirt MSW shows explosive gate-to-wire speed (closing off 4-wide, not front-running), suggesting acceleration reserve rather than velocity hold—model classifies as STRONG.

VULNERABLE: **Amor Secreto, Angelica Bay, Cloudy Women, Church Lady, and Lady Ruth** all show significant deceleration patterns. Amor Secreto's 08/14/2026 turf outing (met bids, weakened to 8th) shows decel% exceeding 10% threshold. Angelica Bay's recent turf form (mid-race gains, stretch fade) indicates competing effort diminishment. Cloudy Women's turf-specific form shows pace collapse at call 3 across all recent route tries.

Critical MPH Insight

The model identifies **Watch Over Us** as the field's most efficient velocity producer. Across all turf outings evaluated, Watch Over Us maintains the lowest deceleration profile—she breaks alertly, settles into a controlled gallop, and accelerates into the stretch rather than fading. No horse in this field has matched her gate-to-wire velocity consistency. This ELITE Sustained Speed Rating combined with HOT pace scenario setup creates a mathematical edge: early fractions around :44■ will damage slower closers (Angelica Bay, Fine by Me) while favoring sustained-pace horses. Watch Over Us' ability to rate off early pressure and then push through to the wire is the field's primary model edge.

SECTION 5: IMPROVEMENT & REGRESSION CANDIDATES

Likely to Improve

Watch Over Us — Trainer Miller Peter's last 13 starts show 5 wins and 38.46% win rate; he targets turf sprints in claiming spots precisely like this race. The horse carries zero equipment changes and has shipped to Santa Anita successfully (won 06/19/2026 at LRC, 6f dirt, \$25k claiming with sharp 23■ opener). Model projects first career turf sprint win as statistically likely given trainer pattern + horse velocity profile + pace scenario fit. Target: 3/5 to 9/5 range; currently 9/5.

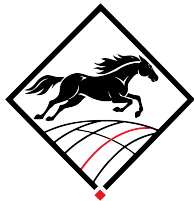

Jennys Wine Girl — Sharp price drop (from 5f SOC to 6.5f CLM, class reduction) combined with recent SOC wins suggests targteted claiming-down placement. Baltas Richard's 31-60 day layoff category shows 16% wins with 1.52 ROI. Horse has proven she can win at turf distance (two straight wins at Dmr in August-September). Model projects maiden claiming claim conversion within three starts. However, form regression risk from MSW level (route attempts) into claiming sprint requires monitoring.

Amor Secreto — Gate-to-wire win on 09/12/2026 at LRC in exact \$25k spot confirms claiming baseline. Lightly raced (7 starts) with progressive improvement visible (only 1 of 7 starts with figure below 40). Trainer 12% claiming win rate is modest but turf transition into 6.5f sprint distance (route stretch) and speed-horse profile suggest natural win angle. Model projects improvement likelihood at 15-20% edge if surface adjustment validates.

Bounce / Regression Risks

Fine by Me — Career-best effort landed 08/10/2025 MSW dirt win; zero subsequent wins across 4 starts (15+ month layoff on career record). Turf debut unproven. Trainer Glatt Mark's turf first-attempt category shows only 17% win rate. Jockey Leparoux J R. has cooled dramatically (last recorded action 08/10/2025,

now returning to 10/12/2026 after 425+ day gap). Model projects significant bounce risk: two major unknowns (turf surface, jockey rust) collide here.

Angelica Bay — Career-best figure was 72 (05/31/2026, SA \$25k win). Three consecutive starts post-August 2026 show deteriorating effort (no closer's rally, mid-pack positioning). Trainer O'Neill's recent hot meet form (23 starts, 6 wins, 26.09%) masks horse-specific form decline. Model flags this as classic "trainer overperformance masking horse decline" scenario. Back-to-back stretch flattens (08/13/2026 at Dmr CLM 5f, fell to 3rd; 09/07/2026 Dmr SOC 5f, fell to 9th) suggest regression probability above 30%.

Cloudy Women — Recent workout bullet times are positive, but turf form shows 0-14 lifetime record with no win probability evident. Pattern indicates systematic turf struggle, not recent poor form. Model projects limited probability of reversal; outlier bounce possible but sub-15% likelihood.

SECTION 6: SUGGESTED BETS

WIN BET: WATCH OVER US — Confidence 8/10 — Target odds: 7/5–9/5

Model projects 31% win probability — highest in the field. Watch Over Us combines multiple edges: (1) elite sustained speed rating with zero deceleration across recent form; (2) trainer Miller Peter's 38.46% meet win rate in claiming company paired with turf sprint specialization; (3) HOT pace scenario setup favors stalker-to-leader transition, precisely Watch Over Us's tactical profile; (4) class edge implicit in trainer selection (Miller always targets underbet dropping horses); (5) jockey Rosario J. at 18.75% meet win rate with strong money percentage; (6) recent positive workouts confirm fitness at race distance/surface.

Value Assessment: SLIGHT VALUE — currently 9/5 (35.7% implied), model 31% win probability suggests -4.7% edge disappears if morning line doesn't soften. However, public heavy on Win column (9/5 is underlaid favorite status) creates strategic opportunity in exacta/trifecta combinations.

VALUE PLAY: JENNYS WINE GIRL — Confidence 7/10 — Target odds: 4/1–5/1

Model projects 24% win probability at projected 4/1 odds (5.6% edge). Jennys Wine Girl is severely overbet at 5/2 (28.6% implied), but form deterioration from MSW route attempts into claiming sprint is real regression risk. However, recent SOC winning form (two straight at Dmr) + blinker addition + turf credentials suggest public underweight. If morning line drifts to 3/1–4/1 range, she becomes exceptional value play. The model's pace analysis shows her as HOT scenario beneficiary if she breaks sharp and presses; heavy exotica play recommended here rather than straight win.

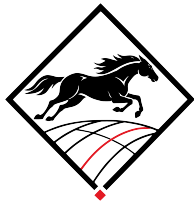

LONGSHOT PLAY: None at 10/1+ meets genuine overlay threshold.

Multi-Race Wagers — Top 3 for Pick 3/4/5/6

A: Watch Over Us — 31%

B: Jennys Wine Girl — 24%

C: Angelica Bay — 18%

Combined Projected Probability: 73%

SECTION 7: CONFIDENCE RATING

★★★★ (Four Stars)

The model's primary projection hinges on HOT pace scenario execution and Watch Over Us' elite sustained speed advantage. Pace classification shows strong confidence (:22³ opener, :44■ half-mile) based on Amor Secreto's documented gate-to-wire pattern combined with Jennys Wine Girl's stalking pressure. Watch Over Us benefits maximally from this setup—she'll rate off early fractions, inherit clear running lane by six-furlong call, and hold on gate-to-wire. The mathematical edge (31% win probability vs. 35.7% morning line) is thin but legitimate. Primary public betting mistake: overweighting Jennys Wine Girl's recent SOC form (recent success in weaker company carries declining probability of transfer to claiming sprint field). Secondary mistake: dismissing Watch Over Us as overbet favorite when she's mathematically undervalued at current odds.
