# Churchill Downs

## Race 7 — 11/01/2026

Class: Clm 12500

Distance: 6f

Surface: Dirt

Purse: $45,000

Claiming Price: $12,500

Starters: 10

CLAIMING. Purse $45,000 (include $5,200 KTDF - Kentucky TB Devt Fund) FOR THREE YEAR OLDS AND UPWARD. Three Year Olds, 120 lbs.; Older, 122 lbs. Non-winners Of A Race Since October 1 Allowed 2 lbs. Claiming Price $12,500 (Races Where Entered For $8,000 Or Less Not Considered In Allowances).

*Generated by CHR version 0.5.0*

# COMPREHENSIVE HANDICAPPING REPORT (CHR)

**Churchill Downs R7**

**November 1, 2026 | 6f Dirt | Claiming $12,500**

## SECTION 1: PACE ANALYSIS

### True Front Runners

Optimal Courage and Social Hour both possess elite gate speed and have established front-running patterns across recent efforts. Optimal Courage shows consistent two-path positioning early and has won multiple sprints from the lead. Social Hour demonstrates comparable early foot with three wins in the last eight starts when allowed to control tempo. Gardiner rounds out the speed contingent with consistent three-to-four-path positioning through the opening quarter.

### Stalkers / Pressers

Gardiner and Decatur Street profile as secondary pace pressers, capable of rating just off the lead while maintaining tactical flexibility. Decatur Street's recent form shows consistent inside running through the first call before swinging out for rally attempts. Brother Rice shows mixed early patterns—sometimes stalking, occasionally pressing—making him a variable tactical piece.

### Closers

League of Legends has established an elite late-pace profile across 37 career starts, with consistent outside rallies winning 3 races from closing positions. One Cool Dude profiles as a genuine late-closer with multiple outside runs and a career 5-win total heavily skewed toward wire-to-wire or late-closing efforts. El Michoacano's recent 8/18/2025 win demonstrates sudden improvement with a 6-7 path rally in the final quarter.

### Pace Scenario Projection

MODEL PREDICTS: HOT early pace with two to three speed horses contesting (projected :22■ opening quarter, :45² half-mile). Optimal Courage and Social Hour will duel for early position; this mid-range tempo creates tactical advantage for stalkers with positional flexibility and honest closers already tracking within striking distance by the stretch. Speed horses risk fatigue; closers positioned within 4-5 lengths at the half will have room to rally.

## SECTION 2: WIN PROBABILITY MATRIX

| Post | Horse | ML Odds | Model Win % | Implied ML % | Edge |
|---|---|---|---|---|---|
| 1 | Powerized | 20-1 | 2% | 3.7% | -1.7% |
| 2 | **El Michoacano** | 30-1 | 3% | 2.5% | +0.5% |
| 3 | **League of Legends** | 15-1 | 5% | 4.9% | +0.1% |
| 4 | **Optimal Courage** | 8-1 | 18% | 8.7% | +9.3% |
| 5 | Stargazzers Dream | 30-1 | 2% | 2.5% | -0.5% |
| 6 | Gardiner | 6-5 | 17% | 35.5% | -18.5% |
| 7 | Brother Rice | 5-1 | 9% | 13.0% | -4.0% |
| 8 | Social Hour | 4-1 | 14% | 15.6% | -1.6% |
| 9 | Decatur Street | 8-1 | 7% | 8.7% | -1.7% |
| 10 | **One Cool Dude** | 15-1 | 23% | 4.9% | +18.1% |
| | **TOTAL** | | **100%** | **100.0%** | |

## SECTION 3: CONTENDER ANALYSIS

### TIER 1 — PRIMARY CONTENDERS (★★★★)

**One Cool Dude**

**PTW Profile:** Competitive 7-year-old with 31 career starts and 5 wins shows modest claiming profile dramatically elevated by elite proprietary velocity metrics and recent form resurgence. Last four starts show improved competitive level with finishes ranking 3-6, suggesting return to form after prior inconsistency. Banks barn shows 14% win rate in claiming condition but elevated ROI at 2.22 in sprint condition specifically—sharp placement strategy evident. Model identifies this horse as the field's second-highest win probability due to superior sustained-speed profile and tactical late-running positioning.

**Strengths:** Recent second-place finish (10/12/2025 Kee CLM 7f) shows competitive form vs. quality field; proven 6f distance specialist (13 starts at 6f, 1 win); trainer ROI elite in sprint claiming (2.22 across 28 sprint CLM starts) signaling targeted placement; consistent recent workouts (49.2 and 102.2 recent efforts, strong ranking); post draw (10) allows late running room with traffic-free lane development; STRONG sustained-speed rating confirms closing punch capability; model projects 22% win probability vs. 4.9% implied morning line, creating massive +17.1% overlay.

**Concerns:** Career 5 wins from 31 starts modest; form inconsistency typical of mid-level claimers; deceleration profile suggests moderate (not elite) finishing power; outside post requires setup-dependent victory; recent layoff pattern (45+ days) may indicate conditioning concerns requiring confirmation via late workouts.

**Trip Projection:** Will race 6-8 lengths off pace through opening quarter, typical late-closing position. Stretch run depends on pace scenario and running room availability. If HOT pace develops as projected, will position himself 4-5 lengths back entering stretch with clear outside lane for final run. Likely finish in 2-5 range if pace cooperates; otherwise 4-8 range. Elite value play candidate given massive overlay vs. morning line.

---

**Optimal Courage**

**PTW Profile:** Extremely live 8-1 overlay with 21 career wins across 63 starts—elite winning percentage for the claiming ranks. Recent form shows two wins in last four starts with both victories featuring gate-to-wire or close-pressing victory patterns. Current trainer Martinez shows 50% win rate in claiming condition (small sample: 2 of 4), suggesting targeted placement strategy with sharp intent.

**Strengths:** Superior class edge—career earnings of $145K+ dwarf field average; consistent early speed with elite gate positioning; excellent recent workout (36.8 bullet 3-furlong at Hpt 10/21) shows excellent fitness; wins often come gate-to-wire or after dueling position gained early; Rodriguez aboard has ridden this horse to multiple wins; ELITE opening speed and ELITE sustained-speed rating confirm superior velocity maintenance; model projects 18% win probability vs. 8.7% implied, creating +9.3% edge—STRONG VALUE tier.

**Concerns:** Recent loss (9/15/2026) shows vulnerability when pressed hard early—gave way to Social Hour when matched in the pace duel; typical pattern involves early position but fading in final furlong against fresher closer; deceleration profile elevated in last two efforts despite elite rating.

**Trip Projection:** Will break sharply and contest pace with Social Hour or Gardiner through first call. Likely position: two-path, 1-2 lengths off leader at :22. Critical question: can he hold position if pressed hard or does he fold when challenged? Late run depends heavily on whether he engages in pace duel; best scenario involves wire-to-wire completion under light hand.

---

**Social Hour**

**PTW Profile:** Legitimate contender at 4-1, fresh off competitive allowance condition (most recent start shows only two lengths out at CD in STR condition). Sixteen career wins in 26 starts show elite claiming versatility. Recent form pattern shows mixed results but trend is modestly positive—last four starts include one win, two second-place finishes, and only one finish worse than third. Model projects 14% win probability.

**Strengths:** Winning pattern vs. claiming company shows 17% win rate in CLM condition; excellent jockey (Esquivel 14.3% CD meet win rate); outside draw (post 8) provides stretching room; recent workouts show consistent ranking (3rd bullet, 2nd bullet, 4th-ranked workout across six recent works); proven distance specialist (13 starts at 6f, 3 wins); ELITE opening speed rating confirms competitive early foot.

**Concerns:** Field contains multiple speed horses capable of matching or exceeding early foot—will require aggressive ride early to establish position; slight class drop (off allowance start) but form trend shows recent weakness vs. stronger competition; deceleration pattern STRONG but not elite, suggesting fatigue risk if pressed hard in pace duel; gate speed slightly below Optimal Courage on recent form metrics.

**Trip Projection:** Expected to break and challenge for pace, likely settling in 2-3 path position, 1-2 lengths off leader at opening call. If he takes the lead, likely to press hard and set sloppy pace. If pressed, will likely fight back but risk getting caught late by fresh closer if pace is suicidal. Best scenario: settles into 2-3 position early and responds to stretch drive when pace slows.

---

## TIER 2 — SECONDARY CONTENDERS (★★★)

### Gardiner

**PTW Profile:** Morning line's 6-5 favorite arrives off a competitive three-race sprint sequence at Churchill with multiple top-finishes. Recent form shows consistent inside running through the opening call with late-run threats narrowly missing in two of three efforts. Sharp Joe's claiming record shows 25% wins in the claiming condition—highest in the barn this meet—signaling intent and sharpness. Model projects 17% win probability, significantly below morning line implications—massive underlay situation.

**Strengths:** Elite trainer pattern (20% wins in claimed sprints); consistent 3-4 path positioning reduces traffic risk; two close second-place finishes in last three starts suggest fresh competitor; blinker-on debut at this level; clean bill of health (spacing shows 21 days, solid for claiming circuit); STRONG sustained-speed rating confirms competitive finishing profile.

**Concerns:** Dramatically overbet at 6-5 morning line given recent narrow defeats and only 17% model projection; finishing pattern shows vulnerability when pace heats up—last three efforts show faded efforts in final furlong when matched with speed; Ortiz Jr. aboard but has only 14.3% win rate this meet; career-best or near-best effort in recent defeats creates bounce risk.

**Trip Projection:** Expected to stalk inside through opening quarter, roughly 2-3 lengths behind Optimal Courage or Social Hour. Will target outside lane in stretch but may encounter traffic given heavy speed contingent. Finish likely determined by pace scenario and stretch running room. Vulnerability to One Cool Dude's late run high if setup allows outside runner.

---

**Brother Rice**

**PTW Profile:** Moderate 5-1 option with 19 career starts and four wins in claiming ranks. Recent form shows mixed pattern: two wins in last ten starts with sprints at Churchill being primary hunting ground (16 CD starts, 4 wins). Kordenbrock barn shows 11% win rate in claiming condition but elevated ROI at 1.54 across 19 claiming starts. Model projects 9% win probability.

**Strengths:** Trainer pattern shows solid ROI in claiming sprints; recent win (3/7/2025 MCL victory) shows capability; proven Churchill horse (4 wins at CD); solid positioning from post 7; recent workouts show consistency (46.4 bullet 9/19/2026); STRONG sustained-speed rating confirms stalking profile capability.

**Concerns:** Form trend inconsistent—last three starts show mixed results with only one finish better than third; deceleration profile STRONG but not elite, suggesting mid-pack finisher ceiling; rider Bejarano shows only 16.7% win rate this meet; class drops slightly from recent AOC/STR attempts but competition level similar to today; back-to-back starts after layoff period create incomplete sharpening risk.

**Trip Projection:** Will likely settle in mid-pack stalking position, 3-4 lengths off pace through opening calls. Stretch run depends on pace scenario; if pace collapses, could find room to rally late. Otherwise, likely to finish in 4-6 range given moderate speed profile and stalking positioning.

---

**Decatur Street**

**PTW Profile:** Multiple-claimed 6-year-old with 26 career starts and four wins shows consistency in claiming ranks but lacks recent breakthrough form. Last six starts show mixed results: two wins (9/30/2025, 3/12/2026), multiple mid-field finishes, and one well-beaten effort. Recent trainer assignment shows Galindo-Torres at 17% win rate in claiming 6f sprints—above-average but not elite. Model projects 7% win probability.

**Strengths:** Trainer pattern shows strong ROI in claiming condition (3.32 ROI across 35 claiming starts); inside draw (post 9) reduces traffic; capable of 1-2 path early positioning to stalk pace; proven ability to win from stalking position (9/30/2025 victory from inside path); STRONG opening speed but VULNERABLE sustained speed creates tactical variability.

**Concerns:** Form trend over last 12 months shows inconsistent results with multiple mid-field finishes; recent layoff pattern (45+ days from 1/21/2026 to 2/11/2026) indicates soundness/conditioning questions; deceleration profile VULNERABLE relative to field, suggesting pace compromise when matched against fresher rivals; last-out loss shows significant beaten lengths (9.2 lengths, poor effort).

**Trip Projection:** Will stalk pace from inside, likely 4-5 lengths off leader at opening quarter. Improving position through middle calls depends on pace scenario; if HOT pace develops, will likely lack finishing punch given VULNERABLE sustained-speed rating. Wire-to-wire threat unlikely; finishing position dependent on stalking setup and stretch running room.

---

## TIER 3 — PACE FACTORS / LONGSHOTS (★★ or ★)

**League of Legends**

**PTW Profile:** Oldest horse in field (9 years old) with 37 career starts and 3 claiming-level wins shows proven but declining profile. Long career shows multiple graded-stakes starts in younger years, now fully committed to claiming ranks. Recent form shows inconsistent results: one win in last six starts (6/19/2026) with multiple off-the-board efforts. Morse barn shows 13% win rate in claiming condition across 69 starts. Model projects 5% win probability.

**Strengths:** Elite late-pace profile with multiple outside rallies and finishing kick demonstrated across career; proven 6f specialist (27 starts, 2 wins); if pace sets up favorably, can rally from deep position; 7 years more experience than field average provides tactical maturity; STRONG opening speed rating shows residual competitive profile.

**Concerns:** Age (9 years old) and long career suggest declining physical capability; form trend over last 12 months shows significant inconsistency with only 1 win in 6 starts; deceleration profile VULNERABLE to strong finishers in this field; outside draw (post 3) requires wide path and perfect setup; trainer stats not elite for claiming condition.

**Trip Projection:** Will race 8-10 lengths off pace early, typical closing pattern. If pace is moderate-to-hot, may rally late but deceleration vulnerability suggests finishing in 3-6 range. Current 15-1 pricing near fair value; no meaningful overlay exists.

---

**El Michoacano**

**PTW Profile:** Lightly raced 5-year-old with 20 career starts and only 3 wins shows developmental upside in claiming ranks. Recent form pattern shows sudden improvement—win on 8/18/2025 (67 figure, dominant rally) followed by inconsistent efforts, but latest start (10/8/2026) shows second-place finish suggesting return to form. Trainer Wiggins shows 17% win rate in 2Off45-180 situations (strong secondary trainer stat). Model projects 3% win probability.

**Strengths:** Recent second-place finish (10/8/2026) against solid allowance field suggests competitive level rising; lightly raced profile provides upside relative to more seasoned claimers; 8/18/2025 victory demonstrates capability when conditions align; excellent recent workout (48.4 bullet 10/23/2026, ranked 5th).

**Concerns:** Career 3-win total from 20 starts suggests modest ability level; inconsistent form across recent efforts with multiple mid-field finishes and one poor effort (17 lengths beaten, 10/8/2026); deceleration profile VULNERABLE, confirming pace compromise when challenged; speed does not compare favorably to Optimal Courage or Social Hour.

**Trip Projection:** Will race mid-pack, likely 5-6 lengths off pace through opening calls. Late rally attempted but deceleration vulnerability suggests insufficient punch in final furlong. Underlay candidate at 30-1 ML; model projects 3% win probability (2.4% implied), creating minimal overlay. Pass.

---

**Stargazzers Dream ★**

**PTW Profile:** Lightly raced 4-year-old with 26 starts and 4 wins shows developmental improvement in claiming ranks. Recent form shows solid second-place finish (10/9/2026) against CLM company, suggesting return to form after inconsistency. Lovell barn shows 26% win rate in claiming condition (3 of 12) across only 12 starts—excellent but minimal sample size. Model projects 2% win probability.

**Strengths:** Lightly raced profile provides development upside; recent second shows competitive form; trainer pattern shows elite win rate in claiming; good recent workouts (49.6 ranked 8th, consistent effort).

**Concerns:** Only 4 career wins from 26 starts suggests modest ability; inconsistent form across recent efforts; deceleration profile VULNERABLE; speed does not compete favorably against pace leaders; outside draw (post 5) requires late run to even be competitive.

**Trip Projection:** Mid-pack settler, 5-6 lengths off pace. Limited rally capability given deceleration profile. Finish likely in 5-8 range. Underlay candidate at 30-1 ML (model 2% vs. 2.4% implied); pass.

---

**Powerized ★**

**PTW Profile:** Moderate profile with 18 career starts and 4 wins shows inconsistent claiming trajectory. Recent form shows decline over last 12 months with only 1 win in 6 starts. Lucarelli barn shows 16% win rate in claiming sprints (266 starts, solid volume) but recent placement does not suggest elevated intent. Model projects 2% win probability.

**Strengths:** Recent workout (47.0 9th-ranked, modest) shows effort; Montalvo inexperienced but willing; MODERATE opening speed profiles above bottom tier.

**Concerns:** Declining form trend; deceleration profile VULNERABLE; speed does not match pace leaders in field; recent efforts show fatigue pattern typical of aging claimers; no meaningful trainer intent signal.

**Trip Projection:** Mid-pack to off-the-board likely; finish in 6-10 range expected. Underlay at 20-1 ML (model 2% vs. 3.7% implied). Pass.

---

## SECTION 4: MPH ANALYSIS + SUSTAINED SPEED RATINGS

**PTW Proprietary Speed Rankings**

| Horse | Opening Speed | Sustained Speed | Deceleration Profile |
|---|---|---|---|
| Optimal Courage | ELITE | ELITE | Low—maintains velocity strongly |
| Social Hour | ELITE | STRONG | Moderate—maintains position into stretch |

| Horse | Opening Speed | Sustained Speed | Deceleration Profile |
|---|---|---|---|
| One Cool Dude | STRONG | STRONG | Moderate—late-running closing punch |
| Gardiner | STRONG | STRONG | Moderate—competitive finishing effort |
| Brother Rice | STRONG | STRONG | Moderate—stalker profile consistent |
| Decatur Street | STRONG | VULNERABLE | High—pace collapse in final furlong |
| League of Legends | STRONG | VULNERABLE | High—late-run limited by deceleration |
| El Michoacano | MODERATE | VULNERABLE | High—suspect finishing punch |
| Stargazzers Dream | MODERATE | VULNERABLE | High—limited closing capability |
| Powerized | MODERATE | VULNERABLE | High—tired pattern typical |

**Critical MPH Insight**

The model identifies Optimal Courage as the field's fastest gate-to-wire performer with ELITE Sustained Speed Rating, confirming superior velocity maintenance across all six furlongs. However, the model projects One Cool Dude (22% win probability) as the dominant contender due to combined STRONG sustained-speed profile, trainer Banks' elevated 2.22 ROI in sprint claiming, and massive overlay vs. 4.9% implied morning line. Optimal Courage's ELITE ratings (18% win probability, +9.3% edge) create secondary strong value. Social Hour ranks second in opening speed (ELITE) but drops to STRONG sustained-speed profile, indicating stronger early foot than closing punch (14% win probability). The pace scenario identified as HOT creates tactical advantage for these three speed horses, but Optimal Courage's superior deceleration resilience positions him as most likely to hold if pressed. One Cool Dude's STRONG sustained speed combined with post-10 late-running position creates ideal setup if HOT pace develops—22% projection reflects this positioning advantage. Gardiner and Brother Rice both rank STRONG across metrics but offer significantly less value than projections suggest (Gardiner 17% vs. 35.8% morning line implications, massive underlay). Decatur Street and League of Legends both rank VULNERABLE in sustained speed, indicating significant deceleration when pushed hard; this vulnerability directly opposes their tactical positioning. El Michoacano, Stargazzers Dream, and Powerized all profile VULNERABLE.

## SECTION 5: IMPROVEMENT & REGRESSION CANDIDATES

**Likely to Improve**

**One Cool Dude** — Bank trainer (Chris Banks) shows elevated 2.22 ROI in sprint claiming specifically; recent second-place finish (10/12/2025) suggests competitiveness returning after layoff; 6f specialist profile; post 10 provides natural late-running advantage; model projects 22% win probability reflecting improvement trajectory and ideal setup vs. projected HOT pace.

**Optimal Courage** — Trainer Martinez shows 50% win rate in claiming condition with sharp recent placement (off 18-day rest, consistent workout pattern, class-appropriate spot). Gate positioning improves significantly with blinkers off in recent win; return to natural running style suggests improvement path. Significant class edge vs. field ($145K+ earnings vs. field average $80K) proposes dominant performance angle.

**Social Hour** — Sharp barn move by Garcia shows 17% claiming CLM wins (399 starts, solid volume); recent allowance drop creates winnable spot; four recent works show consistent top-ranking (multiple bullets, consistent effort progression). Second-out-of-claim profile traditionally favorable; 31-60-day spacing aligns with trainer's strong statistics.

**Bounce / Regression Risks**

**Gardiner** — Morning line at 6-5 represents massive public overbet relative to model projection of 17%; recent form shows two narrow defeats suggesting fresh legs may be less available than perception suggests. Career-best or near-best effort in recent defeats creates bounce risk if pace scenario shifts unfavorably. Regression significant.

**Social Hour** — Back-to-back consecutive starts (off allowance, now back to claiming) may indicate incomplete recovery from recent conditioning demands. Esquivel riding but modest 14.3% meet win rate may not align with public expectations supporting 4-1 price.

**Brother Rice** — Back-to-back starts (consecutive racing) after layoff period; last three finishes show inconsistent results suggesting incomplete sharpening. Bouncing from competitive MCL to $12,500 tag creates regression risk if class drop insufficient for current fitness level.

## SECTION 6: SUGGESTED BETS

**WIN BET: ONE COOL DUDE — Confidence 9/10 — Target odds: 12-1 or higher**

Model projects 22% win probability—highest in the field. One Cool Dude represents the most valuable proposition based on proprietary velocity analysis combined with trainer placement signal and exceptional morning line value. STRONG sustained-speed rating confirms closing punch capability superior to visual form analysis. Trainer Banks shows 2.22 ROI in sprint claiming specifically, indicating sharp targeted

placement. Post 10 provides ideal late-running lane with traffic-free stretch development. Extraordinary value at current 15-1 morning line: 22% win probability translates to 4.9% implied, creating +17.1% edge—EXCEPTIONAL VALUE tier. Recent second-place finish (10/12/2025) against quality CLM field confirms competitive status. Projected HOT pace scenario (projected :22■/:45²) creates optimal setup for late closer with fresh closing reserves. Model projects this horse as the clear betting vehicle, offering rare alignment of elite metrics, outstanding value, and favorable pace setup.

---

**VALUE PLAY: OPTIMAL COURAGE — Confidence 8/10 — Target odds: 7-1 to 10-1**

Model projects 18% win probability—second-highest in field. Optimal Courage commands elite pace profile with ELITE opening speed and ELITE sustained-speed rating, confirming superior velocity maintenance across all six furlongs. Superior class edge (21 career wins, $145K+ earnings significantly eclipsing field average) combined with consistent recent victory pattern (two wins in last four starts, gate-to-wire and pressing victories) projects strong profile. Trainer Martinez shows 50% win rate in claiming condition (targeted placement strategy evident). Rodriguez has ridden this horse to multiple wins, creating jockey-trainer synergy. Strong value at current 8-1 morning line: 18% win probability translates to 8.7% implied, creating +9.3% edge—STRONG VALUE tier. Recent workout (36.8 bullet at Hpt 10/21) shows excellent fitness. Only concern: recent loss to Social Hour when pressed hard early suggests vulnerability to pace duel, but ELITE sustained-speed rating predicts wire-to-wire hold if allowed to establish position.

---

**Multi-Race Wagers — Pick 3/4/5/6 Top 3:**

- A: One Cool Dude — 22% *(Win Bet selection)*
- B: Optimal Courage — 18%
- C: Social Hour — 14%

Combined projected probability: 54%

---

## SECTION 7: CONFIDENCE RATING

★★★★★

The model projects One Cool Dude as the dominant contender with massive overlay vs. morning line (22% projection vs. 4.9% implied), creating exceptional-confidence win selection at 15-1 morning line odds. Elite sustained-speed profile combined with trainer Banks' elevated 2.22 ROI in sprint claiming and post-10 late-running advantage creates rare alignment of superior metrics, outstanding value, and optimal setup. HOT pace scenario confirmed by multiple speed horses (Optimal Courage, Social Hour, Gardiner) creates predictable race dynamics tilted toward late-running closers positioned outside, making One Cool Dude's post draw ideal. Secondary strong value emerges with Optimal Courage at 8-1 (+9.3% edge), representing legitimate second choice if early speed holds up better than projected. Gardiner represents significant public overbet at 6-5, with only 17% model projection far below morning line implications; this horse rates as massive underlay despite trainer quality. Key exploit: public dramatically overweighting Gardiner's favorite

status while dramatically underweighting One Cool Dude's closing potential given outside post and projected HOT pace setup. Winning strike rate projects 22% for model top selection with exceptional confidence. Expected outcome: HOT pace between Optimal Courage/Social Hour/Gardiner early; One Cool Dude stalks 5-7 lengths back in traffic-free lane; late closing punch carries to wire under stretch drive when speed horses tire. This race setup perfectly suited to one-clear-best-choice profile, making One Cool Dude rare confident overlay opportunity.
